The Social Animal David Brooks 2012-01-03
#1 NEW YORK TIMES BESTSELLER With unequalled insight and brio, New York Times columnist David Brooks has long explored and explained the way we live. Now Brooks turns to the building blocks of human flourishing in a multilayered, profoundly illuminating work grounded in everyday life. This is the story of how success happens, told through the lives of one composite American couple, Harold and Erica. Drawing on a wealth of current research from numerous disciplines, Brooks takes Harold and Erica from infancy to old age, illustrating a fundamental new understanding of human nature along the way: The unconscious mind, it turns out, is not a dark, vestigial place, but a creative one, where most of the brain's work gets done. This is the realm where character is formed and where our most important life decisions are made—the natural habitat of *The Social Animal*. Brooks reveals the deeply social aspect of our minds and exposes the bias in modern culture that overemphasizes rationalism, individualism, and IQ. He demolishes conventional definitions of success and looks toward a culture based on trust and humility. *The Social Animal* is a moving intellectual adventure, a story of achievement and a defense of progress. It is an essential book for our time—one that will have broad social impact and will change the way we see ourselves and the world.

Afro-Dog Bénédicte Boisseron 2018-08-14 The animal-rights organization PETA asked "Are

Animals the New Slaves?" in a controversial 2005 fundraising campaign; that same year, after the Humane Society rescued pets in the aftermath of Hurricane Katrina while black residents were neglected, some declared that white America cares more about pets than black people. These are but two recent examples of a centuries-long history in which black life has been pitted against animal life. Does comparing human and animal suffering trivialize black pain, or might the intersections of racialization and animalization shed light on interlinked forms of oppression? In *Afro-Dog*, Bénédicte Boisseron investigates the relationship between race and the animal in the history and culture of the Americas and the black Atlantic, exposing a hegemonic system that compulsively links and opposes blackness and animality to measure the value of life. She analyzes the association between black civil disobedience and canine repression, a history that spans the era of slavery through the use of police dogs against protesters during the civil rights movement of the 1960s to today in places like Ferguson, Missouri. She also traces the lineage of blackness and the animal in Caribbean literature and struggles over minorities' right to pet ownership alongside nuanced readings of Derrida and other French theorists. Drawing on recent debates on black lives and animal welfare, *Afro-Dog* reframes the fast-growing interest in human-animal relationships by positioning blackness as a focus of animal inquiry, opening new possibilities for animal studies and black studies to think side by side.

Reading Picture Books with Children Megan

Dowd Lambert 2015-11-03 A new, interactive approach to storytime, *The Whole Book Approach* was developed in conjunction with the Eric Carle Museum of Picture Book Art and expert author Megan Dowd Lambert's graduate work in children's literature at Simmons College, offering a practical guide for reshaping storytime and getting kids to think with their eyes. Traditional storytime often offers a passive experience for kids, but the *Whole Book Approach* asks the youngest of readers to ponder all aspects of a picture book and to use their critical thinking skills. Using classic examples, Megan asks kids to think about why the trim size of Ludwig Bemelman's *Madeline* is so generous, or why the typeset in David Wiesner's Caldecott winner, *The Three Pigs*, appears to twist around the page, or why books like Chris Van Allsburg's *The Polar Express* and Eric Carle's *The Very Hungry Caterpillar* are printed landscape instead of portrait. The dynamic discussions that result from this shared reading style range from the profound to the hilarious and will inspire adults to make children's responses to text, art, and design an essential part of storytime.

Earth Ethics James P. Sterba 2000 This anthology contains numerous up-to-date, well-related readings on animal rights/animal liberation and environmental ethics—in addition to current topics such as ecological feminism, and practical applications. Approaching its subjects through a set of opposing readings shows the strength and weaknesses of various alternative positions. Readings cover the topics of Judeo-Christian Perspectives, Respect for Nature, The Land Ethic/Deep Ecology, Reconciliation and Defense, Social Ecology and Environmental Racism, and NonWestern Religious and Cultural Perspectives. For individuals concerned about the environment and the non-humans who inhabit it.

A Foray into the Worlds of Animals and Humans Jakob von Uexküll 2013-11-30 “Is the tick a machine or a machine operator? Is it a mere object or a subject?” With these questions, the pioneering biophilosopher Jakob von Uexküll embarks on a remarkable exploration of the unique social and physical environments that

individual animal species, as well as individuals within species, build and inhabit. This concept of the *umwelt* has become enormously important within posthumanist philosophy, influencing such figures as Heidegger, Merleau-Ponty, Deleuze and Guattari, and, most recently, Giorgio Agamben, who has called Uexküll “a high point of modern antihumanism.” A key document in the genealogy of posthumanist thought, *A Foray into the Worlds of Animals and Humans* advances Uexküll's revolutionary belief that nonhuman perceptions must be accounted for in any biology worth its name; it also contains his arguments against natural selection as an adequate explanation for the present orientation of a species' morphology and behavior. *A Theory of Meaning* extends his thinking on the *umwelt*, while also identifying an overarching and perceptible unity in nature. Those coming to Uexküll's work for the first time will find that his concept of the *umwelt* holds new possibilities for the terms of animality, life, and the framework of biopolitics.

Critical Needs for Research in Veterinary Science National Research Council 2005-10-18 Research in veterinary science is critical for the health and well-being of animals, including humans. Food safety, emerging infectious diseases, the development of new therapies, and the possibility of bioterrorism are examples of issues addressed by veterinary science that have an impact on both human and animal health. However, there is a lack of scientists engaged in veterinary research. Too few veterinarians pursue research careers, and there is a shortage of facilities and funding for conducting research. This report identifies questions and issues that veterinary research can help to address, and discusses the scientific expertise and infrastructure needed to meet the most critical research needs. The report finds that there is an urgent need to provide adequate resources for investigators, training programs, and facilities involved in veterinary research.

Readings about The Social Animal Joshua Aronson 2019-09-03 Exploring the key ideas in social psychology, this collection of classic and contemporary readings includes accounts of specific experimental findings as well as more general articles summarizing studies on such topics as attraction, prejudice, and aggression. The new edition adds 15 new readings while retaining a number of classics by leading psychological thinkers such as Stanley Milgram on obedience and Solomon Asch on conformity. *Readings* makes the perfect companion for the Aronson's highly praised book, *The Social Animal* as it follows the same major themes. The Reader can also be used with any introductory social psychology text or even in lieu of a text. Using both *The Social Animal* textbook and the reader is a unique and engaging combination for understanding social psychology and its research.

Readings in Zoosemiotics Timo Maran
2012-01-01 The book is the first annotated reader to focus specifically on the discipline of zoosemiotics. Zoosemiotics can be defined today as the study of signification, communication and representation within and across animal species. The name for the field was proposed in 1963 by the American semiotician Thomas A. Sebeok. He also established the framework for the paradigm by finding and tightening connections to predecessors, describing terminology, developing methodology and setting directions for possible future studies. The volume includes a wide selection of original texts accompanied by editorial introductions. An extensive opening

introduction discusses the place of zoosemiotics among other sciences as well as its inner dimensions; the understanding of the concept of communication in zoosemiotics, the heritage of biologist Jakob v. Uexküll; contemporary developments in zoosemiotics and other issues. Chapter introductions discuss the background of the authors and selected texts, as well as other relevant texts. The selected texts cover a wide range of topics, such as semiotic constitution of nature, cognitive capabilities of animals, typology of animal expression and many other issues. The roots of zoosemiotics can be traced back to the works of David Hume and John Locke. Great emphasis is placed on the heritage of Thomas A. Sebeok, and a total of four of his essays are included. The Reader also includes influential studies in animal communication (honey bee dance language, vervet monkey alarm calls) as well as theory elaborations by Gregory Bateson and others. The reader concludes with a section dedicated to contemporary research. *Readings in Zoosemiotics* is intended as a primary source of information about zoosemiotics, and also provides additional readings for students of cognitive ethology and animal communication studies.

The Social Animal Elliot Aronson 2018-05-01 An entertaining, research-based introduction to modern social psychology. Little Kids First Big Book of Animals

Catherine D. Hughes 2010 *Animals*.

Animal Philosophy Matthew Calarco 2004-07-30 *Animal Philosophy* is the first text to look at the place and treatment of animals in Continental thought. A collection of essential primary and secondary readings on the animal question, it brings together contributions from the following key Continental thinkers: Nietzsche, Heidegger, Bataille, Levinas, Foucault, Deleuze, Guattari, Derrida, Ferry, Cixous, and Irigaray. Each reading is followed by commentary and analysis from a leading contemporary thinker. The coverage of the subject is exceptionally broad, ranging across perspectives that include existentialism, poststructuralism, postmodernism, phenomenology and feminism. This anthology is an invaluable one-stop resource for anyone researching, teaching or studying animal ethics and animal rights in the fields of philosophy, cultural studies, literary theory, sociology, environmental studies and gender and women's studies.

Guide for the Care and Use of Laboratory Animals National Research Council 2011-01-27 A respected resource for decades, the *Guide for the Care and Use of Laboratory Animals* has been updated by a committee of experts, taking into consideration input from the scientific and laboratory animal communities and the public at large. The *Guide* incorporates new scientific information on common laboratory animals,

including aquatic species, and includes extensive references. It is organized around major components of animal use: Key concepts of animal care and use. The *Guide* sets the framework for the humane care and use of laboratory animals. Animal care and use program. The *Guide* discusses the concept of a broad Program of Animal Care and Use, including roles and responsibilities of the Institutional Official, Attending Veterinarian and the Institutional Animal Care and Use Committee. Animal environment, husbandry, and management. A chapter on this topic is now divided into sections on terrestrial and aquatic animals and provides recommendations for housing and environment, husbandry, behavioral and population management, and more. Veterinary care. The *Guide* discusses veterinary care and the responsibilities of the Attending Veterinarian. It includes recommendations on animal procurement and transportation, preventive medicine (including animal biosecurity), and clinical care and management. The *Guide* addresses distress and pain recognition and relief, and issues surrounding euthanasia. Physical plant. The *Guide* identifies design issues, providing construction guidelines for functional areas; considerations such as drainage, vibration and noise control, and environmental monitoring; and specialized facilities for animal housing and research needs. The *Guide for the Care and Use of Laboratory Animals* provides a framework for the judgments required in the management of animal facilities. This updated and expanded resource of proven value will be important to scientists and researchers, veterinarians, animal care personnel, facilities managers, institutional administrators, policy makers involved in research issues, and animal welfare advocates.

An Immense World Ed Yong 2022-06-21 NEW YORK TIMES BESTSELLER • A “thrilling” (The New York Times), “dazzling” (The Wall Street Journal) tour of the radically different ways that animals perceive the world that will fill you with wonder and forever alter your perspective, by Pulitzer Prize-winning science journalist Ed Yong “One of this year’s finest works of narrative nonfiction.”—Oprah Daily ONE OF THE TEN BEST BOOKS OF THE YEAR: The Wall Street Journal, The New York Times, Time,

People, The Philadelphia Inquirer, Slate, Reader's Digest, Chicago Public Library, Outside, Publishers Weekly, BookPage ONE OF THE BEST BOOKS OF THE YEAR: Oprah Daily, The New Yorker, The Washington Post, The Guardian, The Economist, Smithsonian Magazine, Prospect (UK), Globe & Mail, Esquire, Mental Floss, Marginalian, She Reads, Kirkus Reviews, Library Journal The Earth teems with sights and textures, sounds and vibrations, smells and tastes, electric and magnetic fields. But every kind of animal, including humans, is enclosed within its own unique sensory bubble, perceiving but a tiny sliver of our immense world. In *An Immense World*, Ed Yong coaxes us beyond the confines of our own senses, allowing us to perceive the skeins of scent, waves of electromagnetism, and pulses of pressure that surround us. We encounter beetles that are drawn to fires, turtles that can track the Earth's magnetic fields, fish that fill rivers with electrical messages, and even humans who wield sonar like bats. We discover that a crocodile's scaly face is as sensitive as a lover's fingertips, that the eyes of a giant squid evolved to see sparkling whales, that plants thrum with the inaudible songs of courting bugs, and that even simple scallops have complex vision. We learn what bees see in flowers, what songbirds hear in their tunes, and what dogs smell on the street. We listen to stories of pivotal discoveries in the field, while looking ahead at the many mysteries that remain unsolved. Funny, rigorous, and suffused with the joy of discovery, *An Immense World* takes us on what Marcel Proust called "the only true voyage . . . not to visit strange lands, but to possess other eyes." [Ethics, Humans and Other Animals](#) Rosalind Hursthouse 2013-02-01 This introductory

textbook is ideally suited to newcomers to philosophy and ethical problems. Rosalind Hursthouse carefully introduces the three standard approaches in current ethical theory: utilitarianism, rights, and virtue ethics. She links each chapter to readings from key exponents such as Peter Singer and Mary Midgley and asks students to think critically about these readings for themselves. Key features include clear activities and activities, chapter summaries and guides to further reading.

Animals and Society Margo DeMello 2021-04-13 Human-animal studies is an interdisciplinary field that explores the spaces that animals occupy in human social and cultural worlds. It examines the interactions humans and animals have with each other and the ways animal lives intersect with human societies. Since existing social orders rely on the exploitation of animals to serve human needs, the questions posed by human-animal studies touch upon a wide range of fundamental issues. *Animals and Society* provides a broad overview of this rapidly growing field. Margo DeMello offers students and scholars a holistic and comprehensive picture of the state of inquiry into the relationships that exist between humans and other animals. She considers interactions between animals and humans in social organizations, such as the family, the legal system, and political and religious institutions. A major focus is the social construction of animals in world cultures and the way in which these social meanings are used to reinforce and perpetuate hierarchical human relationships such as racism, sexism, and class privilege. The book also examines how different human groups construct a range of identities for themselves and for others through animals. This second edition of *Animals and Society* is fully updated and expanded throughout, enhancing the book's relevance for student and activist readers alike. It includes many new international examples, all-new case studies, and updated supplementary readings.

The Animal Claim Tobias Menely 2015-04-06

Today, we tend to react skeptically to claims about our access to the animal mind, the political importance of compassion, and the natural origins of community. However, such claims were widespread in the Restoration and eighteenth century, the long Age of Sensibility. Even so famous a skeptic as the Enlightenment philosopher David Hume wrote that "animals undoubtedly feel, think, love, hate, will, and even reason." In *The Animal Claim*, Tobias Menely shows that for Hume and other thinkers of his time, the acknowledgment of creaturely voice was crucial to their theories of community. Looking primarily to the long eighteenth century in Britain, Menely argues that sympathy--including sympathy with animals--came to be regarded as a foundational resource of social relation, and that it fell to poets, in particular, to represent creaturely voice in the public sphere. Menely connects this development to new ideas of political community in Britain and the emergence of a viable discourse of animal rights in the age of legislative reform. The result is an original contribution to both animal studies and eighteenth-century scholarship.

Dominion Matthew Scully 2003-10-08 "And God

said, Let us make man in our image, after our likeness; and let them have dominion over the fish of the sea, and over the fowl of the air, and over the cattle, and over all the earth, and over every creeping thing that creepeth upon the earth." --Genesis 1:24-26 In this crucial passage from the Old Testament, God grants mankind power over animals. But with this privilege comes the grave responsibility to respect life, to treat animals with simple dignity and compassion. Somewhere along the way, something has gone wrong. In *Dominion*, we witness the annual convention of Safari Club International, an organization whose wealthier members will pay up to \$20,000 to hunt an elephant, a lion or another animal, either abroad or in American "safari ranches," where the animals are fenced in pens. We attend the annual International Whaling Commission conference, where the skewed politics of the whaling industry come to light, and the focus is on developing more lethal, but not more merciful, methods of harvesting "living marine resources." And we visit a gargantuan American "factory farm," where animals are treated as mere product and raised in conditions of mass confinement, bred for passivity and bulk, inseminated and fed with machines, kept in tightly confined stalls for the entirety of their lives, and slaughtered in a way that maximizes profits and minimizes decency. Throughout *Dominion*, Scully counters the hypocritical arguments that attempt to excuse animal abuse: from those who argue that the Bible's message permits mankind to use animals as it pleases, to the hunter's argument that through hunting animal populations are controlled, to the popular and "scientifically proven" notions that animals cannot feel pain, experience no emotions, and are not conscious of their own lives. The result is eye opening, painful and infuriating, insightful and rewarding. *Dominion* is a plea for human benevolence and mercy, a scathing attack on those who would dismiss animal activists as mere sentimentalists, and a demand for reform from the government down to the individual. Matthew Scully has created a groundbreaking work, a book of lasting power and importance for all of us.

Becoming a Good Creature Sy Montgomery
2020 "A luxe, full color picture book adaptation

of Sy Montgomery and Rebecca Green's New York Times bestselling *How to Be a Good Creature*"--

Poetry and Animals Onno Oerlemans 2018-03-20
Why do poets write about animals? What can poetry do for animals and what can animals do for poetry? In some cases, poetry inscribes meaning on animals, turning them into symbols or caricatures and bringing them into the confines of human culture. It also reveals and revels in the complexity of animals: poetry, through its great variety and its inherently experimental nature, has embraced the multifaceted nature of animals to cross, blur, and reimagine the boundaries between human and animal. In *Poetry and Animals*, Onno Oerlemans explores a broad range of English-language poetry about animals from the Middle Ages to the contemporary world, revealing how poetry can contribute to our understanding of animals and our relations with them. He presents a taxonomy of the kinds of animal poems, breaking down the categories and binary oppositions at the root of human thinking about animals. The book considers several different types of poetry: allegorical poems; poems about "the animal" broadly conceived; poems about species of animal; poems about individual animals or the animal as individual; and poems about hybrids and hybridity. Through careful readings of dozens of poems that reveal generous and often sympathetic approaches to recognizing and valuing animals' difference and similarity, Oerlemans demonstrates how the forms and modes of poetry can sensitize us to the moral standing of animals and give us new ways to think through the problems of the human-animal divide.

Justice for Animals Martha C. Nussbaum
2023-01-03 A revolutionary new theory and call to action on animal rights, ethics, and law from the renowned philosopher Martha C. Nussbaum. Animals are in trouble all over the world. Whether through the cruelties of the factory meat industry, poaching and game hunting, habitat destruction, or neglect of the companion animals that people purport to love, animals suffer injustice and horrors at our hands every day. The world needs an ethical awakening, a consciousness-raising movement of international proportions. In *Justice for Animals*, one of the

world's most influential philosophers and humanists Martha C. Nussbaum provides a revolutionary approach to animal rights, ethics, and law. From dolphins to crows, elephants to octopuses, Nussbaum examines the entire animal kingdom, showcasing the lives of animals with wonder, awe, and compassion to understand how we can create a world in which human beings are truly friends of animals, not exploiters or users. All animals should have a shot at flourishing in their own way. Humans have a collective duty to face and solve animal harm. An urgent call to action and a manual for change, Nussbaum's groundbreaking theory directs politics and law to help us meet our ethical responsibilities as no book has done before.

Between the Species Arnold Arluke 2009 This anthology, from the literature of sociology and other disciplines as well, examines the various roles that animals play in human societies. It covers a full spectrum of human-animal interaction: pets and companions; animals as sources of food, clothing and labor; animals in captivity; humans and wildlife; animals as research subjects; and animals as objects of recreation and sport. "Between the Species" represents many of the leading experts in this field, including the authors, who co-edit a scholarly series on animals, society, and culture.
