The Sociology of Urban Living Harold E.

Nottridge 2013-06-17 The urban setting in which people live has an important influence upon the organization and planning of their social lives.

H. E. Nottridge here presents a valuable introduction to the field of urban sociology, showing that it is a theoretical discipline which is worthy of consideration in its own right.

Throughout his account Mr Nottridge places strong emphasis on the need for comparative perspectives. He uses a wide range of source material from urban environments as far apart as shanty towns in developing countries and the great metropolitan complexity of London. He covers such topics as scope and methods in urban sociology, social differences in towns and , in the context of urban social structure, the family and network theories. He also analyses

the work of the Chicago School of Weber, Tonnies, Park, Redfield and Wirth, assessing their value for modern urban sociology. The author concludes with an examination of housing, migration and urban poverty. This book was first published in 1972.

Reading in Kinship in Urban Society C. C. Harris 2013-10-22 Reading in Kinship in Urban Society is a collection of articles that deal with family and kinship in urban settlements. It provides comparative ethnographic data and introduces studies and approaches found outside British social inquiry. Organized into four parts, this book first introduces kinship systems and the recognition of relationships in various communities. It then identifies the functions of kinship systems and pays particular attention to inheritance of property. After discussing patterns of mate selection and marital relationships, it turns to the effects of urbanization on family life. This book ends with a discussion about the family life of elderly people.

Anthropologists and sociologists studying the relation of kinship to societies will find this book invaluable.

Family and Social Change Angelique Janssens
2002-04-18 This book is a quantitative study into the influence of the process of industrialisation on the nature and strength of family relationships in a Dutch community between 1850 and 1920. The study makes use of the unique and unusually rich source of Dutch population registers, which enables the author to trace the history of individual households. The study closely relates aspects of family and household with the social processes characteristic of an industrialising society, such as increasing rates of social and geographical mobility and the shift of production from the home into the factory. Results reveal a striking continuity in the strength of nineteenth-century family relations despite the gradual but profound process of social change surrounding these families. Changes in behavioural patterns did

occur, however, under the influence of changes in demographic rates, regional geographical mobility systems and local developments in the housing market. Nevertheless, these changes cannot be taken as a weakening of family relationships.

Persistence and Flexibility Walter P. Zenner
1988-01-01 Using a variety of anthropological approaches, the authors illustrate how the Jewish identity has persisted in the United States despite great subcultural variation and a wide range of adaptations. Within the various essays, attention is given to both mainstream Jews and to the Hasidim, Yemenites, Indian Sephardim, Soviet Emigres, and "Jews for Jesus." Institutions such as the family, the school, and the synagogue, are considered through techniques of participation/ observation and in archeological research. Persistence and Flexibility provides a means of viewing the Jewish community through the prism of key events, or rituals, and symbols.

Field Research Robert G. Burgess 2003-09-02

There are now numerous textbooks, sets of readings and reflections on doing social research. Much of this textbook material is American and deals with the way in which social research and in particular social surveys should be done. These 'cookbook' approaches to social research omit discussions of the interplay between research methods and research experience. Accordingly, research biographies have been produced in which editors have invited researchers to 'come clean' about the way in which research is actually done. While such accounts are high on description of the research process, they are often

Readings in Kinship in Urban Society C. C. Harris 2013-10-22 Readings in Kinship in Urban Society is a collection of articles on a specialized aspect of Sociology and Social Psychology, mainly focusing on the web of social relationships in urban setting. This book is divided into five major parts, discussing different areas of kinship in urban society. The first part

This book then explains the functions of kinship. Mate selection, as well as urbanization and the family, is also tackled. This text concludes by explaining a study of the family life of old people. This publication will be invaluable to anthropologists, sociologists, human ecologists, and other experts interested in studying kinship systems. Theory in Social and Cultural Anthropology

R. Jon McGee 2013-08-28 Social and cultural anthropology and archaeology are rich subjects with deep connections in the social and physical sciences. Over the past 150 years, the subject matter and different theoretical perspectives have expanded so greatly that no single individual can command all of it. Consequently,

both advanced students and professionals may be confronted with theoretical positions and names of theorists with whom they are only partially familiar, if they have heard of them at all. Students, in particular, are likely to turn to the web to find quick background information on theorists and theories. However, most web-based information is inaccurate and/or lacks depth. Students and professionals need a source to provide a quick overview of a particular theory and theorist with just the basics—the "who, what, where, how, and why". In response, SAGE Reference is publishing the two-volume *Theory in Social and Cultural Anthropology: An Encyclopedia*. Features & Benefits: Two volumes containing approximately 335 signed entries provide users with the most authoritative and thorough reference resource available on anthropology theory, both in terms of breadth and depth of coverage. To ease navigation between and among related entries, a Reader's Guide groups entries thematically and each

entry is followed by Cross-References. In the electronic version, the Reader's Guide combines with the Cross-References and a detailed Index to provide robust search-and-browse capabilities. An appendix with a Chronology of Anthropology Theory allows students to easily chart directions and trends in thought and theory from early times to the present. Suggestions for Further Reading at the end of each entry and a Master Bibliography at the end guide readers to sources for more detailed research and discussion.

A Mexican Elite Family, 1820-1980 Larissa Adler Lomnitz 2021-03-09 This book presents the history of the Gomez, an elite family of Mexico that today includes several hundred individuals, plus their spouses and the families of their spouses, all living in Mexico City. Tracing the family from its origins in mid-nineteenth-century Mexico through its rise under the Porfirio Diaz regime and focusing especially on the last three generations, the work shows how the Gomez have evolved a distinctive subculture and an ability to advance their economic interests under changing political and economic conditions. One of the authors' major findings is the importance of the kinship system, particularly the three-generation "grandfamily" as a basic unit binding together people of different generations and different classes. The authors show that the top entrepreneurs in the family, the direct descendants of its founder, remain the

acknowledged leaders of the kin, each one ruling his business as a patron-owner through a network of clienty relatives. Other family members, though belonging to the middle class, identify ideologically with the family leadership and the bourgeoisie, and family values tend to overrule considerations of strictly business interest even among entrepreneurs.

Historical Anthropology of the Family

Martine Segalen 1986-11-28 Over the past decade or so, the social scientific sociological analysis of the family has been obliged to reconsider its traditional view that industrialisation triggered a shift within society from the 'large family', which fulfilled all social functions from socialising the children to caring for the sick and the old, to the modern nuclear family, which was regarded solely as being the locus for emotional relationships. Historians have shown that in the past there was a variety of family structures within a range of varying demographic, economic and cultural frameworks, distinctive for each society. At the

same time, the interaction between sociology and social anthropology has led to a clearer conceptual analysis of that vague, polysemic term 'family'; and notions of dwelling-place, descent, marriage, the relative roles of husband and wife and parent-child relations, as well as the more general relations between generations, have in a variety of past and present social contexts been taken apart and analysed. In this book, the author synthesises European and North American historical and social anthropological material on the family that shows the reversal of the frequently held view of the family as an institution in decline, showing it instead to be both dynamic and resistant.
