American Mythologies William Blazek 2005-05-01 This challenging new book looks at the current reinvention of American Studies: a reinvention that, among other things, has put the whole issue of just what is 'American' and what is 'American Studies' into contention. The collection focuses, in particular, on American mythology. The editors themselves have written essays that examine the connections between mythologies of the United States and those of either classical European or Native American traditions. William Blazek considers Louise Erdrich's Love Medicine novels as chronicles combining Ojibwa mythology and contemporary U.S. culture in ways that reinvest a sense of mythic identity within a multicultural, postmodern America. Michael K Glenday's analysis of Jayne Anne Phillips' work and explores in it the contexts where myth and dream interact with each other. Betty Louise Bell is one of four essayists in this collection who focus their criticism on authors of Native American heritage. In the first part of 'Indians with Voices', Bell carefully argues that Roy Harvey Pearce's seminal Native American studies text *Savagism and Civilization* fails to acknowledge its white elitist assumptions about what constitutes The American Mind and views Native Americans along a primitive-savage binary that helped to create a twentieth-century 'national mythos of innocence and destiny'. Other essays include Christopher Brookeman's study of the impact of Muhammad Ali on Norman Mailer's non-fiction writing about heavyweight boxing.

Track Changes Matthew G. Kirschenbaum 2016-05-02 Writing in the digital age has been as messy as the inky rags in Gutenberg's shop or the molten lead of a Linotype machine. Matthew Kirschenbaum examines how creative authorship came to coexist with the computer revolution. Who were the early adopters, and what made others anxious? Was word processing just a better typewriter, or something more?

Fritz Leiber and H.P. Lovecraft Fritz Leiber 2004 While Howard Phillips Lovecraft was closing the final chapter of his writing career, Fritz Reuter Leiber was only beginning to open his own. The year was 1936 and Jonquil Leiber, Fritz's first wife, sent a letter on her own initiative to Lovecraft, knowing that her husband had been an avid admirer of his work, ever since his first reading of "The Colour out of Space" and hoping that Lovecraft's presence in Fritz's slow-paced writing career might be the source of inspiration he so dearly needed. Lovecraft replied promptly on November 2 of that year, the seed of an invigorating correspondence, which lasted till Lovecraft's passing. Fritz Leiber and H.P. Lovecraft: Writers of the Dark presents Lovecraft's letters to Leiber, an impressive selection of Leiber's fiction which shows Lovecraft's influence, and a selection of Leiber's essays on Lovecraft and Matters Lovecraftian. Features an introduction by Ben J. S. Szumskyj and an afterword by S.T. Joshi.

Science Fiction and the Dismal Science Gary Westfahl 2019-11-30

Despite the growing importance of economics in our lives, literary scholars have long been reluctant to consider economic issues as they examine key texts. This volume seeks to fill one of these conspicuous gaps in the critical literature by focusing on various connections between science fiction and economics, with some attention to related fields such as politics and government. Its seventeen contributors include five award-winning scholars, five science fiction writers, and a widely published economist. Three topics are covered: what noted science fiction writers like Robert A. Heinlein, Frank Herbert, and Kim Stanley Robinson have had to say about our economic and political future; how the competitive and ever-changing publishing marketplace has affected the growth and development of science fiction from the nineteenth century to today; and how the scholars who examine science fiction have themselves been influenced by the economics of academia. Although the essays focus primarily on American science fiction, the traditions of Russian and Chinese science fiction are also examined. A comprehensive bibliography of works related to science fiction and economics will assist other readers and critics who are interested in this subject.

Snakes & Spiders Fritz Leiber 2012-03-27 "Have you ever worried about your memory, because it doesn't seem to be bringing you exactly the same picture of the past from one day to the next? Have you ever been afraid that your personality was changing because of forces beyond your knowledge or control? Have you ever felt sure that sudden death was about to jump you from nowhere? Have you ever been scared of Ghosts--not the story-book kind, but the billions of beings who were once so real and strong it's hard to believe they'll just sleep harmlessly forever? Have you ever wondered about those things you may call devils or Demons--spirits able to range through all time and space, through the hot hearts of stars and the cold skeleton of space between the galaxies? Have you ever thought that the whole universe might be a crazy, mixed-up dream? If you have, you've had hints of the Change War." This collection gathers the original magazine versions of every canonical story in Fritz Leiber's iconic Change War time travel series for the first time. It includes an introduction by Kevin A. Straight, comprehensive Guide to the Change World, timeline of Fritz Leiber's life and works, and list of Change War apocrypha. Physical book editions include full index.

Bread Overhead Fritz Leiber 2011-06-01 "Bread Overhead" is a story Fritz Leiber could have written to send up today's bewildering bread aisle -- all those claims of low-cal and low-low-carb. In fact, the story probably reads better now than it did in 1958, back when the choice came down to white or whole wheat. Leiber slyly imagines a near-future when giant machines not only harvest the wheat field, but grind flour and bake bread on the spot -- the ultimate in big farming. In this toasted tomorrow, the highly-mechanized Puffy Products is bent on producing the supremely lightest loaf. The story is what happens if bread isn't just airy, but pumped full of lighter-than-air helium. Leiber (Ships to the Stars) didn't often bake up such a soufflé of spoof, but he's a master in the kitchen. And "Bread Overhead" has just enough to say about human nature to be filling, besides.

Media Law Through Science Fiction Daxton R. Stewart 2019-08-20 Attorney and legal scholar Daxton Stewart examines the intersection of media law and science fiction, exploring the past, present, and future of communication technology and policy debates. Science fiction offers a vast array of possibilities anticipating future communication technologies and their implications on human affairs. In this book, Stewart looks at potential legal challenges presented by plausible communication technologies that may arise 20 or 50 or 100 years from today. Performing what he calls "speculative legal research," Stewart identifies the kinds of topics we should be talking about relating to speech, privacy, surveillance, and more, and considers the debates that would be likely to arise if such technologies become a reality. Featuring interviews with prominent science fiction authors and legal scholars, and a foreword by Malka Older, this book considers the speculative solutions of science fiction and their implications in law and policy scholarship. Chapters feature specific literary examples to examine how cultural awareness and policy creation are informed by fictional technology, future societies, and legal disputes. Looking forward, beyond traditional legal research and scholarship to the possible and even very likely future of communication technology, this fascinating work of speculative legal research will give students and scholars of media law, science fiction, and technology much to discuss and debate.

The Vampire in Science Fiction Film and Literature Paul Meehan 2014-07-09 Vampires have been a popular subject for writers since their inception in 19th century Gothic literature and, later, became popular with filmmakers. Now the classical vampire is extinct, and in its place are new vampires who embrace the hi-tech worlds of science fiction. This book is the first to examine the history of vampires in science fiction. The first part considers the role of science and pseudo-science, from late Victorian to modern times, in the creation of the vampire, as well as the "sensation fiction" of J. Sheridan Le Fanu, Bram Stoker, Arthur Conan Doyle and H.G. Wells. The second part focuses on the history of the science fiction vampire in the cinema, from the silent era to the present. More than sixty films are discussed, including films from such acclaimed directors as Roger Corman, David Cronenberg, Guillermo del Toro and Steven Spielberg, among others.

When the Machine Made Art Grant D. Taylor 2014-04-10 "When the Machine Made Art" covers the reception and criticism of computer art from its emergence in 1963 to its crisis in 1989, when ideological differences fragment the art movement. The text begins by identifying the various divisions between the humanistic and scientific cultures that inform early criticism. The fact that the first computer art has military origins and is imbued with various techno-science mythologies, places the movement at odds with artworld orthodoxy. Yet, while mainstream art critics reproach computerized art, a comparison between similar art forms of the era, such as conceptual art, reveals that the criticism of computer art was motivated more by the fear of the machine than by aesthetics. Dr. Grant Taylor shows that social anxiety, often fueled by Cold War dystopianism, posited the computer as a powerful instrument in the overall subordination of the individual to the emerging technocracy. But even though anti-computer sentiment abated in the late 1970s, computer art did not find acceptance. The book illustrates how computer art's exponents, desiring artworld legitimacy, traced its lineage back to modernism. Conversely, in the 1980s, art theorists, employing the latest critical theory, began critiquing the assumptions of modernism,

and thus viewed computer art's modernist history as hopelessly outdated. And yet other critics reconciled computer technology with the critical insights of postmodernism, viewing the computer as a pluralistic agent that could challenge modernist conventions. Nonetheless, while postmodernist criticism enabled the formation of new discourses for emerging digital arts, it left computer art, which was committed to modernist and techno-science philosophies, in a state of crisis"-- **Science Fiction and Fantasy Literature, Vol 1** R. Reginald 2010-09 Science Fiction and Fantasy Literature, A Checklist, 1700-1974, Volume one of Two, contains an Author Index, Title Index, Series Index, Awards Index, and the Ace and Belmont Doubles Index.

Mariana Fritz Leiber 2011-05-01 Jonathan told her not to touch the switches, but it was cold and lonely and isolated...ExcerptMariana had been living in the big villa and hating the tall pine trees around it for what seemed like an eternity when she found the secret panel in the master control panel of the house. The secret panel was simply a narrow blank of aluminum-she'd thought of it as room for more switches if they ever needed any, perish the thought! - between the air-conditioning controls and the gravity controls. Above the switches for the three dimensional TV but below those for the robot butler and maids. Jonathan had told her not to fool with the master control panel while he was in the city, because she would wreck anything electrical, so when the secret panel came loose under her aimlessly questing fingers and fell to the solid rock floor of the patio with a musical twing her first reaction was fear. Then she saw it was only a small blank oblong of sheet aluminum that had fallen and that in the space it had covered was a column of six little switches. Only the top one was identified. Tiny glowing letters beside it spelled trees and it was on. When Jonathan got home from the city that evening she gathered her courage and told him about it. He was neither particularly angry nor impressed. "Of course there's a switch for the trees," he informed her deflatingly, motioning the robot butler to cut his steak.

A Short Media History of English Literature Ingo Berensmeyer 2022-08-01 This book explores the history of literature as a history of changing media and modes of communication, from manuscript to print, from the codex to the computer, and from paper to digital platforms. It argues that literature has evolved, and continues to evolve, in sync with material forms and formats that engage our senses in multiple ways. Because literary experiences are embedded in, and enabled by, media, the book focuses on literature as a changing combination of material and immaterial features. The principal agents of this history are no longer genres, authors, and texts but configurations of media and technologies. In telling the story of these combinations from prehistory to the present, Ingo Berensmeyer distinguishes between three successive dominants of media usage that have shaped literary history: performance, representation, and connection. Using English literature as a test case for a long view of media history, this book combines an unusual bird's eye view across periods with illuminating readings of key texts. It will prove an invaluable resource for teaching and for independent study in English or comparative literature and media studies.

New Worlds: Before the New Wave, 1960-1964 John Boston 2013-04-30 In the mid-1960s, British science fiction and fantasy were convulsed by the "New Wave." This movement emerged from the SF magazines edited by John Carnell. Such brilliant NEW WORLDS and SCIENCE FANTASY writers as J. G. Ballard, Brian W. Aldiss, John Brunner, and Michael Moorcock heralded the rise of this new kind of fantastic fiction. John Boston and Damien Broderick's concluding volume of their critical trilogy examines the history and development of these important magazines--and the fiction that they championed. By the end of this period (1964), Carnell had set the stage for that major development in UK science fiction--the new wave adventures of the transformed NEW WORLDS, under the editorship of Moorcock--and had himself shifted gear into the next mode of SF publishing as editor of the paperback anthology series, New Writings in SF. Boston and Broderick's series will become the definitive critical histories of these important British magazines. Complete with indices of names and titles cited.

Science Fact and Science Fiction Brian M. Stableford 2006 Publisher description

The Silver Eggheads Fritz Leiber A HEADLONG RIOT OF HILARIOUS SCIENCE FICTION SATIRE MEET SOME INSUFFERABLY WONDERFUL CHARACTERS, from the mad, gay, heady world of the "arts" GASPARD DE LA NUIT—human journeyman writer. He has problems with his rampant lover, Heloise Ibsen (assigned to him by his publisher). What he really loves is the giant computer-word-machine that produces his novels—read by other humans—which he oils with devoted care. His closest friend is ZANE GORT—a fine, upstanding, self-employed robot writer. Zane writes books for other robots and is madly in love with MISS BLUSHES—a censor-robix (female robot) of delicate pink. Miss Blushes is something of a prude and rather hysterical: very logical when you consider that her circuits are wired for censorship, but it makes life difficult for Zane. He turns for help to NURSE BISHOP—a small, but formidably beautiful human, who (in addition to the remarkable advice she offers Zane) plays nursemaid to a mysterious group of near-human entities owned by FLAXMAN AND CULLINGHAM—human publishers, whose language is frequently deplorable. To say nothing of the peculiar interest at least one of them has in a luscious platinum robot no, the daring reader must discover this for himself... AND THERE ARE MANY, MANY MORE...

What's He Doing in There? Fritz Leiber 2011-06-01 He went where no Martian ever went before--but would he come out--or had he gone for good?ExcerptThe Professor was congratulating Earth's first visitor from another planet on his wisdom in getting in touch with a cultural

anthropologist before contacting any other scientists (or governments, God forbid!), and in learning English from radio and TV before landing from his orbit-parked rocket, when the Martian stood up and said hesitantly, "Excuse me, please, but where is it?" That baffled the Professor and the Martian seemed to grow anxious--at least his long mouth curved upward, and he had earlier explained that it curling downward was his smile--and he repeated, "Please, where is it?" He was surprisingly humanoid in most respects, but his complexion was textured so like the rich dark armchair he'd just been occupying that the Professor's pin-striped gray suit, which he had eagerly consented to wear, seemed an arbitrary interruption between him and the chair--a sort of Mother Hubbard dress on a phantom conjured from its leather. The Professor's Wife, always a perceptive hostess, came to her husband's rescue by saying with equal rapidity, "Top of the stairs, end of the hall, last door." The Martian's mouth curled happily downward and he said, "Thank you very much," and was off. Comprehension burst on the Professor. He caught up with his guest at the foot of the stairs. "Here, I'll show you the way," he said. "No, I can find it myself, thank you," the Martian assured him.

Excerpt My name is Greta Forzane. Twenty-nine and a party girl would describe me. I was born in Chicago, of Scandinavian parents, but now I operate chiefly outside space and time--not in Heaven or Hell, if there are such places, but not in the cosmos or universe you know either. I am not as romantically entrancing as the immortal film star who also bears my first name, but I have a rough-and-ready charm of my own. I need it, for my job is to nurse back to health and kid back to sanity Soldiers badly roughed up in the biggest war going. This war is the Change War, a war of time travelers--in fact, our private name for being in this war is being on the Big Time. Our Soldiers fight by going back to change the past, or even ahead to change the future, in ways to help our side win the final victory a billion or more years from now. A long killing business, believe me. You don't know about the Change War, but it's influencing your lives all the time and maybe you've had hints of it without realizing. Have you ever worried about your memory, because it doesn't seem to be bringing you exactly the same picture of the past from one day to the next? Have you ever been afraid that your personality was changing because of forces beyond your knowledge or control? Have you ever felt sure that sudden death was about to jump you from nowhere? Have you ever been scared of Ghosts--not the story-book kind, but the billions of beings who were once so real and strong it's hard to believe they'll just sleep harmlessly forever? Have you ever wondered about those things you may call devils or Demons--spirits able to range through all time and space, through the hot hearts of stars and the cold skeleton of space between the galaxies? Have you ever thought that the whole universe might be a crazy, mixed-up dream? If you have, you've had hints of the Change War. How I got recruited into the Change War, how it's conducted, what the two sides are, why you don't consciously know about it, what I really think about it--you'll learn in due course.
