**Identity** Francis Fukuyama 2018-09-11 The New York Times bestselling author of *The Origins of Political Order* offers a provocative examination of modern identity politics: its origins, its effects, and what it means for domestic and international affairs of state In 2014, Francis Fukuyama wrote that American institutions were in decay, as the state was progressively captured by powerful interest groups. Two years later, his predictions were borne out by the rise to power of a series of political outsiders whose economic nationalism and authoritarian tendencies threatened to destabilize the entire international order. These populist nationalists seek direct charismatic connection to "the people," who are usually defined in narrow identity terms that offer an irresistible call to an in-group and exclude large parts of the population as a whole. Demand for recognition of one's identity is a master concept that unifies much of what is going on in world politics today. The universal recognition on which liberal democracy is based has been increasingly challenged by narrower forms of recognition based on nation, religion, sect, race, ethnicity, or gender, which have resulted in anti-immigrant populism, the upsurge of politicized Islam, the fractious "identity liberalism" of college campuses, and the emergence of white nationalism. Populist nationalism, said to be rooted in economic motivation, actually springs from the demand for recognition and therefore cannot simply be satisfied by economic means. The demand for identity cannot be transcended; we must begin to shape identity in a way that supports rather than undermines democracy. Identity is an urgent and necessary book—a sharp warning that unless we forge a universal understanding of human dignity, we will doom ourselves to continuing conflict.

Cox 2016-01-09 The first major study of the history of British "bad girls," this book uses a wide range of professional, popular and personal texts to explore the experiences of girls in the twentieth century juvenile justice system, examine the processes leading to their definition as delinquent, defective or neglected, and analyses possibilities for reform.

**Sourcebook of Family Theories and Methods** Pauline Boss 2008-11-19 Origins We call this book on theoretical orientations and methodological strategies in family studies a sourcebook because it details the social and personal roots (i.e., sources) from which these orientations and strategies flow. Thus, an appropriate way to preface this book is to talk first of its roots, its beginnings. In the mid 1980s there emerged in some quarters the sense that it was time for family studies to take stock of itself. A goal was thus set to write a book that, like Janus, would face both backward and forward a book that would give readers both a perspective on the past and a map for the future. There were precedents for such a project: *The Handbook of Marriage and the Family* edited by Harold Christensen and published in 1964; the two *Contemporary Theories about the Family* volumes edited by Wesley Burr, Reuben Hill, F. Ivan Nye, and Ira Reiss, published in 1979; and the *Handbook of Marriage and the Family* edited by Marvin Sussman and Suzanne Steinmetz, then in production.

**The Psychological Foundations of Culture** Mark Schaller 2003-09-12 How is it that cultures come into existence at all? How do cultures develop particular customs and characteristics rather than others? How

do cultures persist and change over time? Most previous attempts to address these questions have been descriptive and historical. The purpose of this book is to provide answers that are explanatory, predictive, and relevant to the emergence and continuing evolution of cultures past, present, and future. Most other investigations into "cultural psychology" have focused on the impact that culture has on the psychology of the individual. The focus of this book is the reverse. The authors show how questions about the origins and evolution of culture can be fruitfully answered through rigorous and creative examination of fundamental characteristics of human cognition, motivation, and social interaction. They review recent theory and research that, in many different ways, points to the influence of basic psychological processes on the collective structures that define cultures. These processes operate in all sorts of different populations, ranging from very small interacting groups to grand-scale masses of people occupying the same demographic or geographic category. The cultural effects—often unintended—of individuals' thoughts and actions are demonstrated in a wide variety of customs, ritualized practices, and shared mythologies: for example, religious beliefs, moral standards, rules for the allocation of resources, norms for the acceptable expression of aggression, gender stereotypes, and scientific values. *The Psychological Foundations of Culture* reveals that the consequences of psychological processes resonate well beyond the disciplinary constraints of psychology. By taking a psychological approach to questions usually addressed by anthropologists, sociologists, and other social scientists, it suggests that psychological research into the foundations of culture is a useful—perhaps even necessary—complement to other forms of inquiry.

**The Church Impotent** Leon J. Podles 1999 The current preoccupation with the role of women in the church obscures the more serious problem of the perennial absence of men. This provocative book argues that Western churches have become women's clubs, that the emasculation of Christianity is dangerous for the church and society, and that a masculine presence can and must be restored. After documenting the highly feminized state of Western Christianity, Dr. Podles identifies the masculine traits that once characterized the Christian life but are now commonly considered incompatible with it. He contends that though masculinity has been marginalized within Christianity, it cannot be expunged from human society. If detached from Christianity, it reappears as a substitute religion, with unwholesome and even horrific consequences. The church, too, is diminished by its emasculation. Dr. Podles concludes by considering how Christianity's virility might be restored. In the otherwise stale and overworked field of gender studies, *The Church Impotent* is the only book to confront the lopsidedly feminine cast of modern Christianity with a profound analysis of its historical and sociological roots.

**Gender Hierarchy of Masculinity and Femininity during the Chinese Cultural Revolution** Zhuying Li 2020-11-26 Focusing on the influence of Maoist ideology and masculinist power on the representations of women in revolutionary opera films made during the Cultural Revolution, this book considers the gendered hierarchy between masculinity and femininity in relation to the historic and cultural context in which they were made. Using feminist methodology and epistemology to locate women's social identity, this book explores the sociological connections between the masculinisation of women and masculinist domination in the context of the Cultural Revolution. Through film analysis, the author examines whether women, rather than 'liberated', were in fact re-gendered and oppressed by masculinist power. By critically evaluating gender hierarchy during the Chinese Cultural Revolution, the book provides hitherto neglected insights into gender within its social and cultural context. This an interdisciplinary book which should appeal to students

and scholars across a range of disciplines, including gender studies, Asian studies, China studies, cultural studies and film studies.

**The Innovative Bureaucracy** Alexander Styhre 2007-03-06 Highly original and based on unique empirical research in the fields of organization theory and organization behaviour, this work makes an invaluable contribution to the literature on bureaucracy and innovation. Focusing on a study of two major companies working with innovation and new product development Styhre's critical analysis pushes the boundaries of bureaucracy studies beyond its current entrenched position. Departing from the traditional view that bureaucratic organizations are inefficient, incapable of responding to external changes, unable to orchestrate innovative work and provide meaningful jobs for its co-workers, this empirical study underlines the merits of a functional organization, the presence of specialist and expertise groups and hierarchical structures. Analyzing the literature of bureaucracy, the new forms of post-bureaucratic organizations and drawing on the philosophy of Henri Bergson, the author offers a model of bureaucracy, capable of both apprehending its functional organization and its continuous and ongoing modifications and changes to adapt to external conditions. Innovative and compelling, this book is an excellent text for advanced students of organization and management theory and managerial strategists and decision-makers across the globe.

**Culture, Society and Sexuality** Richard Guy Parker 1999 This work offers an introduction to the central debates in sexuality research. Among the issues examined are the social and cultural dimensions of sex, human sexuality and sex research.

**The Crisis of Political Modernism** D. N. Rodowick 2023-04-28 D.N. Rodowick offers a critical analysis of the development of film theory since 1968. He shows how debates concerning the literary principles of modernism—semiotics, structuralism, psychoanalysis, Marxism, and feminism—have transformed our understanding of cinematic meaning. Rodowick explores the literary paradigms established in France during the late 1960s and traces their influence on the work of diverse filmmaker/theorists including Jean-Luc Godard, Peter Gidal, Laura Mulvey, and Peter Wollen. By exploring the "new French feminisms" of Irigaray and Kristeva, he investigates the relation of political modernism to psychoanalysis and theories of sexual difference. In a new introduction written especially for this edition, Rodowick considers the continuing legacy of this theoretical tradition in relation to the emergence of cultural studies approaches to film.

*Being Feminist, Being Christian* A. Jule 2006-06-10 Can a person be Christian and Feminist at the same time? In these extended essays, authors explore the various intersections of feminism, feminist theory and practice, and Christian tradition as it is lived out in the lives of Christian academics.

**For Her Own Good** Barbara Ehrenreich 2013-10-02 This women's history classic brilliantly exposed the constraints imposed on women in the name of science and exposes the myths used to control them. Since the nineteenth century, professionals have been invoking scientific expertise to prescribe what women should do for their own good. Among the experts' diagnoses and remedies: menstruation was an illness requiring seclusion; pregnancy, a disabling condition; and higher education, a threat to long-term health of the uterus. From clitoridectomies to tame women's behavior in the nineteenth century to the censure of a generation of mothers as castrators in the 1950s, doctors have not hesitated to intervene in women's sexual, emotional, and maternal lives. Even domesticity, the most popular prescription for a safe environment for woman, spawned legions of "scientific" experts. Barbara Ehrenreich and Dierdre English has never lost faith in science itself, but insists that we hold those who interpret it to higher standards. Women are entering the medical and scientific professions in greater numbers but as recent research shows, experts continue to use pseudoscience to tell women how to live. For Her Own Good provides today's readers with an indispensable dose of informed skepticism.

**The Psychology of Politics** William F. Stone 2012-12-06 The Psychology of Politics is an introduction to political psychology. The field has a long past, but as an organized discipline, it has a short history. The long past is detailed in Jaap van Ginneken's historical first chapter of the book. The short history of political psychology as an organized discipline dates from 1978, when the International Society of Political Psychology (ISPP) was founded (Stone, 1981, 1988). The formal establishment of an interdiscipline drawing upon various social sciences had numerous predecessors in the 20th century: Wallas's (1908) Human Nature in

Politics, Harold Lasswell's Psychopathology and Politics in 1930, a book with the present title by Eysenck (1954), and The Handbook of Political Psychology, edited by the founder of the ISPP, Jeanne Knutson. Her Handbook defined the field at the time of its publication in 1973 (see especially Davies' chapter). The present revision of Stone's (1974) work is more modest in its aspirations. It provides a selective introduction to the field, emphasizing topics that the authors believe to be representative and important. Many psychologically relevant topics, such as political socialization, participation, voting behavior, and leadership, are not represented among our chapter titles.

**Education and Masculinities** Chris Haywood 2013-06-19 Across media, academy and popular culture in western societies there is much talk of an implosion of the modern gender order. Education is often presented as a key site in which a crisis of masculinity is played out, and schools have become a focus for practical attempts to reconcile social and cultural transformations through the recalibration of teaching and learning, increasing male teachers and masculinising the content of subjects. Education and Masculinities argues that we are experiencing a shift from the establishment of the social constitution of gender associated with modernity politics, to the gendering of society that has an intensified resonance among men and women in a global-based late modernity. The book explores the main social and cultural approaches to education and masculinities within the broader context of sex and gender relations, considering the masculinity question alongside local and global changes in society, and bringing a fresh evaluation of key issues. Included in the book: -how the suggestion of 'academically successful girls' and 'failing boys' plays out in relation to issues of inequality across class and ethnicity -a current empirical analyses of gender inequality across schools, higher education and the labour market -representation, identity and cultural difference with reference to male and female social experiences and cultural meanings -forms of power connected to social divisions and cultural differences. Education and Masculinities provides a critical yet constructive diagnosis of gender relations across educational sites, exploring both academic accounts and alternative global responses that illustrate the limits of Western models and sensibilities. This accessible book will be valuable reading for students following courses in education, sociology, gender studies, and other social sciences and humanities courses.

**Letters from a war zone** Andrea Dworkin 1993 The nonconformist and social commentator discusses her experiences as a woman and a battered wife, her life of demonstrating, organizing, and addressing other women and the government, and the current state of the women's movement.

**Discovering Reality** Sandra Harding 2005-12-30 Are Western epistemology, metaphysics, methodology and the philosophy of science grounded only in men's distinctive understandings of themselves, others, and nature? Does this less than human understanding distort our models of reason and of scientific inquiry? In different ways, the papers in this collection explore the evidence for these increasingly reasonable and intriguing questions. They identify how it is distinctively masculine perspectives on masculine experience which have shaped the most fundamental and formal aspects of systematic thought in philosophy and the natural and social sciences - precisely the aspects of thought believed most gender-neutral. They show how these understandings ground Aristotle's biology and metaphysics; the very definition of the problems of philosophy in Plato, Descartes, Hobbes and Rousseau; the 'adversary method' which is the paradigm of philosophic and scientific reasoning; principles of individuation in philosophical ontology and the philosophy of language; individualistic assumptions in psychology; functionalism in sociological and biological theory; evolutionary theory; the methodology of political science; Marxist political economy; and conceptions of 'objective inquiry' in the social and natural sciences. These essays also begin to identify for us the distinctive aspects of women's experience which can provide the resources needed for the creation of a truly human understanding. Audience: The book will be of interest to those involved in epistemology, and philosophy of the natural and social sciences, as well as feminist scholars in philosophy. The work will also be of value for theorists, methodologists, and feminist scholars in the natural and social sciences.

**Modern Misogyny** Kristin J. Anderson 2015 'Modern Misogyny' examines contemporary antifeminism in a 'postfeminist' era. It considers the widespread idea that the feminist movement has ended, it achieved what it set out to achieve and is irrelevant to contemporary women's lives. The book argues that equality has not been achieved and that sexism and discrimination are now packaged in a more palatable but stealthy form.

**In the Wake of Terror** Epifanio San Juan 2007 In the Wake of Terror focuses on the controversies over the linkage of class exploitation and the ideology of racism, the role of nationalism in postcolonial politics, and ethnic exclusion.

*Jewish Immigrant Associations and American Identity in New York, 1880-1939* Daniel Soyer 2018-02-05 Landsmanshaftn, associations of immigrants from the same hometown, became the most popular form of organization among Eastern European Jewish immigrants to the United States in the late 19th and early 20th centuries. *Jewish Immigrant Associations and American Identity in New York, 1880-1939*, by Daniel Soyer, holds an in-depth discussion on the importance of these hometown societies that provided members with valuable material benefits and served as arenas for formal and informal social interaction. In addition to discussing both continuity and transformation as features of the immigrant experience, this approach recognizes that ethnic identity is a socially constructed and malleable phenomenon. Soyer explores this process of construction by raising more specific questions about what immigrants themselves have meant by Americanization and how their hometown associations played an important part in the process.

**Secret Identity Crisis** Matthew J. Costello 2009-03-01 What Cold War-era superheroes reveal about American society and foreign policy Physicist Bruce Banner, caught in the nuclear explosion of his experimental gamma bomb, is transformed into the rampaging green monster, the Hulk. High school student Peter Parker, bitten by an irradiated spider, gains its powers and becomes Spiderman. Reed Richards and his friends are caught in a belt of cosmic radiation while orbiting the Earth in a spacecraft and are transformed into the Fantastic Four. While Stan Lee suggests he clung to the hackneyed idea of radioactivity in creating Marvel's stable of superheroes because of his limited imagination, radiation and the bomb are nonetheless the big bang that spawned the Marvel universe. The Marvel superheroes that came to dominate the comic book industry for most of the last five decades were born under the mushroom cloud of potential nuclear war that was a cornerstone of the four-decade bipolar division of the world between the US and USSR. These stories were consciously set in this world and reflect the changing culture of cold War (and post-cold War) America. Like other forms of popular entertainment, comic books tend to be very receptive to cultural trends, reflect them, comment on them, and sometimes inaugurate them. *Secret Identity Crisis* follows the trajectory of the breakdown of the cold War consensus after 1960 through the lens of superhero comic books. Those developed by Marvel, because of their conscious setting in the contemporary world, and because of attempts to maintain a continuous story line across and within books, constitute a system of signs that reflect, comment upon, and interact with the American political economy. This groundbreaking new study focuses on a handful of titles and signs that specifically involve political economic codes, including Captain America, the Invincible Iron Man, Nick Fury, Agent of SHIELD, the Incredible Hulk to reveal how the American self was transformed and/or reproduced during the late Cold War and after.

*The Homoerotics of Orientalism* Joseph A. Boone 2014-03-25 One of the largely untold stories of Orientalism is the degree to which the Middle East has been associated with "deviant" male homosexuality by scores of Western travelers, historians, writers, and artists for well over four hundred years. And this story stands to shatter our preconceptions of Orientalism. To illuminate why and how the Islamic world became the locus for such fantasies and desires, Boone deploys a supple mode of analysis that reveals how the cultural exchanges between Middle East and West have always been reciprocal and often mutual, amatory as well as bellicose. Whether examining European accounts of Istanbul and Egypt as hotbeds of forbidden desire, juxtaposing Ottoman homoerotic genres and their European imitators, or unlocking the homoerotic encoding in Persian miniatures and Orientalist paintings, this remarkable study models an ethics of crosscultural reading that exposes, with nuance and economy, the crucial role played by the homoerotics of Orientalism in shaping the world as we know it today. A contribution to studies in visual culture as well as literary and social history, *The Homoerotics of Orientalism* draws on primary sources ranging from untranslated Middle Eastern manuscripts and European belles-lettres to miniature paintings and photographic erotica that are presented here for the first time.

**Re-thinking Sexualities in Africa** Signe Arnfred 2004 "This volume sets out to investigate critically existing lines of thought about sexuality in Africa, while also creating space for alternative approaches"--P. [4] of cover.

*Theorizing Patriarchy* Sylvia Walby 1991-01-08 Sylvia Walby provides an overview of recent theoretical debates - Marxism, radical and liberal feminism, post-structuralism and dual systems theory. She shows how each can be applied to a range of substantive topics from paid work, housework and the state, to culture, sexuality and violence, relying on the most up-to-date empirical findings. Arguing that patriarchy has been vigorously adaptable to the changes in women's position, and that some of women's hard-won social gains have been transformed into new traps, Walby proposes a combination of class analysis with radical feminist theory to explain gender relations in terms of both patriarchal and capitalist structure.

The new material includes a development of Lukes's theory of power and presents empirical cases to exemplify this. Including a refreshed introduction, this third edition brings a book that has consolidated its reputation as a classic work and a major reference point within Social and Political Theory to a whole new audience. It can be used on modules across the Social and Political Sciences dealing with the concept of power and its manifestation in the world. It is also essential reading for all undergraduate and postgraduate students interested in the history of Social and Political Thought. New to this Edition: - A revised and refreshed introduction - Two new chapters on 'Domination and Consent' and 'Exploring the Third Dimension'

**Epistemology for the Rest of the World** Stephen Stich 2018-06-06 Since the heyday of ordinary language philosophy, Anglophone epistemologists have devoted a great deal of attention to the English word 'know' and to English sentences used to attribute knowledge. Even today, many epistemologists, including contextualists and subject-sensitive invariantists are concerned with the truth conditions of "S knows that p," or the proposition it expresses. In all of this literature, the method of cases is used, where a situation is described in English, and then philosophers judge whether it is true that S knows that p, or whether saying "S knows that p" is false, deviant, etc. in that situation. However, English is just one of over 6000 languages spoken around the world, and is the native language of less than 6% of the world's population. When Western epistemology first emerged, in ancient Greece, English did not even exist. So why should we think that facts about the English word "know," the concept it expresses, or subtle semantic properties of "S knows that p" have important implications for epistemology? Are the properties of the English word "know" and the English sentence 'S knows that p' shared by their translations in most or all languages? If that turned out to be true, it would be a remarkable fact that cries out for an explanation. But if it turned out to be false, what are the implications for epistemology? Should epistemologists study knowledge attributions in languages other than English with the same diligence they have shown for the study of English knowledge attributions? If not, why not? In what ways do the concepts expressed by 'know' and its counterparts in different languages differ? And what should epistemologists make of all this? The papers collected here discuss these questions and related issues, and aim to contribute to this important topic and epistemology in general.

*Appealing Because He Is Appalling* Tamari Kitossa 2021-07-02 This collection invites us to think about how African-descended men are seen as both appealing and appalling, and exposed to eroticized hatred and violence and how some resist, accommodate, and capitalize on their eroticization. Drawing on James Baldwin and Frantz Fanon, the contributors examine the contradictions, paradoxes, and politico-psychosexual implications of Black men as objects of sexual desire, fear, and loathing. Kitossa and the contributing authors use Baldwin's and Fanon's cultural and psychoanalytic interpretations of Black masculinities to demonstrate their neglected contributions to thinking about and beyond colonialist and Western gender and masculinity studies. This innovative and sophisticated work will be of interest to scholars and students of cultural and media studies, gender and masculinities studies, sociology, political science, history, and critical race and racialization. Contributors: Katerina Deliovsky, Delroy Hall, Dennis O. Howard, Elishma Khokhar, Tamari Kitossa, Kemar McIntosh, Leroy F. Moore Jr., Watufani M. Poe, Satwinder Rehal, John G. Russell, Mohan Siddi

*Purple Hibiscus* Chimamanda Ngozi Adichie 2012-04-17 "One of the most vital and original novelists of her generation." —Larissa MacFarquhar, *The New Yorker* From the bestselling author of *Americanah* and *We Should All Be Feminists* Fifteen-year-old Kambili and her older brother Jaja lead a privileged life in Enugu, Nigeria. They live in a beautiful house, with a caring family, and attend an exclusive missionary school. They're completely shielded from the troubles of the world. Yet, as Kambili reveals in her tender-voiced account, things are less perfect than they appear. Although her Papa is generous and well respected, he is fanatically religious and tyrannical at home—a home that is silent and suffocating. As the country begins to fall apart under a military coup, Kambili and Jaja are sent to their aunt, a university professor outside the city, where they discover a life beyond the confines of their father's authority. Books cram the shelves, curry and nutmeg permeate the air, and their cousins' laughter rings throughout the house. When they return home, tensions within the family escalate, and Kambili must find the strength to keep her loved ones together. *Purple Hibiscus* is an exquisite novel about the emotional turmoil of adolescence, the powerful bonds of family, and the bright promise of freedom.

**The Ritual Process** Victor Turner 2017-07-05 In *The Ritual Process: Structure and Anti-Structure*, Victor Turner examines rituals of the Ndembu in Zambia and develops his now-famous concept of "Communitas." He characterizes it as an absolute inter-human relation beyond any form of structure. *The Ritual Process* has acquired the status of a small classic since these lectures were first published in 1969. Turner demonstrates how the analysis of ritual behavior and symbolism may be used as a key to understanding social structure and processes. He extends Van Gennep's notion of the "liminal phase" of rites of passage to a more general level, and applies it to gain understanding of a wide range of social phenomena. Once thought to be the "vestigial" organs of social conservatism, rituals are now seen as arenas in which social change may emerge and be absorbed into social practice. As Roger Abrahams writes in his foreword to the revised edition: "Turner argued from specific field data. His special eloquence resided in his ability to lay open a sub-Saharan African system of belief and practice in terms that took the reader beyond the exotic features of the group among whom he carried out his fieldwork, translating his experience into the terms of contemporary Western perceptions. Reflecting Turner's range of intellectual interests, the book emerged as exceptional and eccentric in many ways: yet it achieved its place within the intellectual world because it so successfully synthesized continental theory with the practices of ethnographic reports."

**Bachelors** Rosalind E. Krauss 2000-08-25 These essays on nine women artists are framed by the question, born of feminism, "What evaluative criteria can be applied to women's art?" Since the 1970s Rosalind Krauss has been exploring the art of painters, sculptors, and photographers, examining the intersection of these artists concerns with the major currents of postwar visual culture: the question of the commodity, the status of the subject, issues of representation and abstraction, and the viability of individual media. These essays on nine women artists are framed by the question, born of feminism, "What evaluative criteria can be applied to women's art?" In the case of surrealism, in particular, some have claimed that surrealist women artists must either redraw the lines of their practice or participate in the movement's misogyny. Krauss resists that claim, for these "bachelors" are artists whose expressive strategies challenge the very ideals of unity and mastery identified with masculinist aesthetics. Some of this work, such as the "part object" (Louise Bourgeois) or the "formless" (Cindy Sherman) could be said to find its power in strategies associated with such concepts as *écriture féminine*. In the work of Agnes Martin, Eva Hesse, or Sherrie Levine, one can make the case that the power of the work can be revealed only by recourse to another type of logic altogether. *Bachelors* attempts to do justice to these and other artists (Claude Cahun, Dora Maar, Louise Lawler, Francesca Woodman) in the terms their works demand.

*The Death of Nature* Carolyn Merchant 2019-09-10 UPDATED 40TH ANNIVERSARY EDITION WITH 2020 PREFACE An examination of the Scientific Revolution that shows how the mechanistic world view of modern science has sanctioned the exploitation of nature, unrestrained commercial expansion, and a new socioeconomic order that subordinates women.

*Anarchy and Society* Jeffrey Shantz 2013-11-14 *Anarchy and Society* constructs a tentative synthesis of sociological and anarchist thought, providing a roadmap to a future 'anarchist sociology'.
