Nian, The Chinese New Year Dragon Virginia Loh-Hagan 2019-12-15 Mei hates springtime. Why?

Because it's only in the spring that Nian, a fierce dragon, is able to leave his mountain prison under the sea to terrorize the local village. When the villagers hear the rumblings of Nian's hungry stomach, they know that winter has ended and spring is coming. But this year on the night before the first day of spring, a magical warrior visits Mei in her dreams. He tells Mei that it is her destiny to face and defeat Nian. But she must do it within 15 days or the dragon will be free forever. Author Virginia Loh-Hagan (PoPo's Lucky Chinese New Year) gives this retelling of the Nian legend an original twist, while explaining the origins of Chinese New Year traditions.

Domesticated: Evolution in a Man-Made World Richard C. Francis 2015-05-25 "An essential read for anyone interested in the stories of the animals in our home or on our plate."—BBC Focus Without our domesticated plants and animals, human civilization as we know it would not exist. We would still be living

at subsistence level as hunter-gatherers if not for domestication. It is no accident that the cradle of civilization—the Middle East—is where sheep, goats, pigs, cattle, and cats commenced their fatefully intimate association with humans. Before the agricultural revolution, there were perhaps 10 million humans on earth. Now there are more than 7 billion of us. Our domesticated species have also thrived, in stark contrast to their wild ancestors. In a human-constructed environment—or man-made world—it pays to be domesticated. Domestication is an evolutionary process first and foremost. What most distinguishes domesticated animals from their wild ancestors are genetic alterations resulting in tameness, the capacity to tolerate close human proximity. But selection for tameness often results in a host of seemingly unrelated by-products, including floppy ears, skeletal alterations, reduced aggression, increased sociality, and reduced brain size. It's a package deal known as the domestication syndrome. Elements of the domestication syndrome can be found in every domesticated species—not only cats, dogs, pigs, sheep, cattle, and horses but also more recent human creations, such as domesticated camels, reindeer, and laboratory rats. That domestication results in this suite of changes in such a wide variety of mammals is a fascinating evolutionary story, one that sheds much light on the evolutionary process in general. We humans, too, show signs of the domestication syndrome, which some believe was key to our evolutionary success. By this view, human evolution parallels the evolution of dogs from wolves, in particular. A natural storyteller, Richard C. Francis weaves history, archaeology, and anthropology to create a fascinating narrative while seamlessly integrating the most cutting-edge ideas in twenty-first-century biology, from genomics to evo-devo.

Near a Thousand Tables Felipe Fernandez-Armesto 2002-06-04 In *Near a Thousand Tables*, acclaimed food historian Felipe Fernández-Armesto tells the fascinating story of food as cultural as well as culinary history -- a window on the history of mankind. In this "appetizingly provocative" (Los Angeles Times) book, he guides readers through the eight great revolutions in the world history of food: the origins of cooking, which set humankind on a course apart from other species; the ritualization of eating, which brought magic and meaning into people's relationship with what they ate; the inception of herding and the invention of agriculture, perhaps the two greatest revolutions of all; the rise of inequality, which led to the development of haute cuisine; the long-range trade in food which, practically alone, broke down cultural barriers; the ecological exchanges, which revolutionized the global distribution of plants and livestock; and, finally, the industrialization and globalization of mass-produced food. From prehistoric snail "herding" to Roman banquets to Big Macs to genetically modified tomatoes, *Near a Thousand Tables* is a full-course meal of extraordinary narrative, brilliant insight, and fascinating explorations that will satisfy the hungriest of readers.

Abel's Island William Steig 2013-07-30 Abel's place in his familiar, mouse world has always been secure; he had an allowance from his mother, a comfortable home, and a lovely wife, Amanda. But one stormy August day, furious flood water carry him off and dump him on an uninhabited island. Despite his determination and stubborn resourcefulness—he tried crossing the river with boats and ropes and even on stepping-stones—Abel can't find a way to get back home. Days, then weeks and months, pass. Slowly, his soft habits disappear as he forages for food, fashions a warm nest in a hollow log, models clay statues of his family for company, and continues to brood on the problem of how to get across the river—and home. Abel's time on the island brings him a new understanding of the world he's separated from. Faced with the daily adventure of survival in his solitary, somewhat hostile domain, he is moved to reexamine the easy way of life he had always accepted and discovers skills and talents in himself that hold promise of a more meaningful life, if and when he should finally return to Mossville and his dear Amanda again. *Abel's Island* is a 1976 New York Times Book Review Notable Children's Book of the Year and Outstanding Book of the Year, and a 1977 Newbery Honor Book.

Written in the year after Northup was freed and published in the wake of Harriet Beecher Stowe's *Uncle Tom's Cabin*, Northup's story was quickly taken up by abolitionist groups and news organizations as part of the fight against slavery, and continues to resonate more than a century after the end of the American Civil War.
