**Watching Slavery** Joe Lockard  
2008 How did witnesses of  
slavery relate their experiences  
and what effect did their

reports have? This book  
examines travel accounts,  
fictions, poetry, and legal texts  
to analyze direct and indirect  
encounters with slavery in the

antebellum United States. It discusses the rhetorical politics of British and American, and black and white, observations of slavery. The discussion raises critical questions about the role of witness and its link with political action, both in antebellum and contemporary America.

**Righteous Violence** Larry J. Reynolds 2011-12-01  
Righteous Violence examines the struggles with the violence of slavery and revolution that engaged the imaginations of seven nineteenth-century American writers--Margaret Fuller, Ralph Waldo Emerson, Frederick Douglass, Henry David Thoreau, Louisa May Alcott, Nathaniel Hawthorne, and Herman Melville. These authors responded not only to the state terror of slavery and the Civil War but also to more problematic violent acts, including unlawful revolts, insurrections, riots, and strikes that resulted in bloodshed and death. Rather than position these writers for or against the struggle for liberty, Larry J. Reynolds examines the profoundly contingent and morally complex perspectives of each author. Tracing the shifting and troubled moral arguments in their work, Reynolds shows that these writers, though committed to peace and civil order, at times succumbed to bloodlust, even while they expressed

ambivalence about the very violence they approved. For many of these authors, the figure of John Brown loomed large as an influence and a challenge. Reynolds examines key works such as Fuller's European dispatches, Emerson's political lectures, Douglass's novella *The Heroic Slave*, Thoreau's *Walden*, Alcott's *Moods*, Hawthorne's late unfinished romances, and Melville's *Billy Budd*. In addition to demonstrating the centrality of righteous violence to the American Renaissance, this study deepens and complicates our understanding of political violence beyond the dichotomies of revolution and murder, liberty and oppression, good and evil.

**Literary Research and the American Realism and Naturalism Period** Linda L. Stein 2008-12-12 *Literary Research and the American Realism and Naturalism Period: Strategies and Sources* will help those interested in researching this era. Authors Linda L. Stein and Peter J. Lehu emphasize research

methodology and outline the best practices for the research process, paying attention to the unique challenges inherent in conducting studies of national literature.

*Technologies of Memory in the Arts* L. Plate 2009-05-14 In this collection of essays, a range of scholars from different disciplines look through the prism of technology at the much-debated notion of cultural memory, analysing how the past is shaped or unsettled by cultural texts including visual art, literature, cinema, photographs and souvenirs.

*Ambivalent Transnational Belonging in American Literature* Silvia Schultersmandl 2021-06-08 *Ambivalent Transnational Belonging in American Literature* discusses the extent to which transnational concepts of identity and community are cast within nationalist frameworks. It analyzes how the different narrative perspectives in texts by Olaudah Equiano, Catharina Maria Sedgwick, Henry James,

Jamaica Kincaid, and Mohsin Hamid shape protagonists' complex transnational subjectivities, which exist between or outside national frameworks but are nevertheless interpellated through the nation-state and through particular myths about liberal, sentimental, or cosmopolitan subjects. The notion of ambivalent transnational belonging yields insights into the affective appeal of the transnational as a category of analysis, as an aesthetic experience, and as an idea of belonging. This means bringing the transnational into conversation with the aesthetic and the affective so we may fully address the new conceptual challenges faced by literary studies due to the transnational turn in American studies.

*Representations of Emotional Excess* Jürgen Schlaeger 2000

**Carl Hiaasen** David Geherin 2018-11-21 Carl Hiaasen has been described as "one of the funniest crime writers in decades," "America's finest satirical novelist," and a "great

American writer about the great American subjects of ambition, greed, vanity, and disappointment." A columnist for thirty years, Hiaasen also wrote several award-winning young adult books but is best known for his 14 crime novels. His distinctive blend of outrageous humor and biting satire appeals to mystery fans, as well as readers of comic fiction and those interested in social and environmental issues. The author examines Hiaasen's entire body of work, from his earliest writing as a reporter and then columnist for the Miami Herald to his bestselling novels for both adult and young readers. While much of his writing focuses on his beloved Florida, his work has a universal appeal that has earned him global fame.

*The Performance of Religion*  
Cia Sautter 2017-01-12 The performing arts are uniquely capable of translating a vision of an ideal or sacred reality into lived practice, allowing an audience to confront deeply held values and beliefs as they observe a performance. However, there is often a reluctance to approach distinctly religious topics from a performance studies perspective. This book addresses this issue by exploring how religious values are acted out and reflected on in classic Western theatre, with a particular emphasis on the plays put on during the Globe Theatre's yearlong season of 'Shakespeare and the Bible'. Looking at plays such as *Much Ado About Nothing*, *Dr. Faustus* and *Macbeth*, each chapter includes ethnographic overviews of the performance of these plays as well as historical and theological perspectives on the issues they address. The author also utilizes scholarship from other academics, such as Paul Tillich

and Martin Buber, in examining the relationship between art and culture. This helps readers of this book to look at religion in culture, and raise questions and explore ideas about how people appraise their religious values through an encounter with a performance. *The Performance of Religion: Seeing the sacred in the theatre* treads new ground in bringing performance and religious studies scholarship into direct conversation with one another. As such, it is essential reading for any academic with an interest in theology, religion and ethics and their expression in culture through the performing arts.

*Charlotte Smith in British Romanticism* Jacqueline Labbe 2015-10-06 Charlotte Smith's early sonnets established the genre as a Romantic form; her novels advanced sensibility beyond its reliance on emotional facility; and her blank verse initiated one of the most familiar of Romantic

verse forms. This volume draws together the best of current scholarship.

*The Grounds of English*

*Literature* Christopher Cannon  
2004-12-09 The centuries just after the Norman Conquest are the forgotten period of English literary history. In fact, the years 1066-1300 witnessed an unparalleled ingenuity in the creation of written forms, for this was a time when almost every writer was unaware of the existence of other English writing. In a series of detailed readings of the more important early Middle English works, Cannon shows how the many and varied texts of the period laid the foundations for the project of English literature. This richness is for the first time given credit in these readings by means of an innovative theory of literary form that accepts every written shape as itself a unique contribution to the history of ideas. This theory also suggests that the impoverished understanding of literature we now commonly employ is itself a legacy of this early period, an

attribute of the single form we have learned to call 'romance'. A number of reading methods have lately taught us to be more generous in our understandings of what literature might be, but this book shows us that the very variety we now strive to embrace anew actually formed the grounds of English literature—a richness we only lost when we forgot how to recognize it.

**The Transformative Power of Literature and Narrative: Promoting Positive Change**

Corinna Assmann 2023-01-16

Narrative plays a central role for individual and collective lives - this insight has arguably only grown at a time of multiple social and cultural challenges in the 21st century. The present volume aims to actualize and further substantiate the case for literature and narrative, taking inspiration from Vera Nünning's eminent scholarship over the past decades.

Engaging with her formative

interdisciplinary work, the volume seeks to explore potentials of change through the transformative power of literature and narrative - to be harnessed by individuals and groups as agents of positive change in today's world. The book is located at the intersection of cognitive and cultural narratology and is concerned with the way literature affects individuals, how it works at an intersubjective level, enabling communication and community, and how it furthers social and cultural change.

[Aporias of Translation](#) Elias Schwieler 2022-06-06 This book proposes a new way for scholars in, for example, Education, Literary Studies, and Philosophy to approach texts and other phenomena through the concept and practice of translation. Its interdisciplinary perspective makes the book of value for graduate students and scholars in the Humanities and Social Sciences. The unique take on translation as related to the notion of *aporia* is applied to a

number of seminal and classical texts within literature, poetry, and philosophy, which gives the reader new understandings of the workings of language and what happens within and between languages, as well as within and between disciplines, when some form of interpretation or analysis is at work. Importantly, the book develops the notion of *aporias* of translation as a way to learn and develop our understanding of texts and phenomena, and thus functions as a pedagogical process, which helps us come to terms with the boundaries of language and academic disciplines.

**So Black and Blue** Kenneth W. Warren 2003-11 "So Black and Blue is the best work we have on Ellison in his combined roles of writer, critic, and intellectual. By locating him in the precarious cultural transition between Jim Crow and the era of promised civil rights, Warren has produced a thoroughly engaging and compelling book, original in its treatment of Ellison and his part in shaping the history of

ideas in the twentieth century."—Eric J. Sundquist, University of California, Los Angeles What would it mean to read *Invisible Man* as a document of Jim Crow America? Using Ralph Ellison's classic novel and many of his essays as starting points, Kenneth W. Warren illuminates the peculiar interrelation of politics, culture, and social scientific inquiry that arose during the post-Reconstruction era and persisted through the Civil Rights movement. Warren argues that Ellison's novel expresses the problem of who or what could represent and speak for the Negro in an age of limited political representation. So *Black and Blue* shows that Ellison's successful transformation of these limits into possibilities has also, paradoxically, cast a shadow on the postsegregation world. What can be the direction of African American culture once the limits that have shaped it are stricken down? Here Warren takes up the recent, ongoing, and often contradictory veneration of

Ellison's artistry by black writers and intellectuals to reveal the impoverished terms often used in discussions about the political and cultural future of African Americans. Ultimately, by showing what it would mean to take seriously the idea of American novels as creatures of their moment, Warren questions whether there can be anything that deserves the label of classic American literature.

**The Task of Utopia** Erin McKenna 2001-11-13 At their best, both American pragmatism and utopianism are about hope. Both encourage people to think about the future as a guide to understanding the past and forming the present. Just as pragmatism has often been misunderstood as valueless instrumentalism, utopianism has been limited to dreams of a static perfect world. In this book, Erin McKenna argues that utopian vision informed by pragmatism results in a process model of utopia that can help form the future based on critical intelligence. Using

John Dewey's works with feminist theory and literature, McKenna develops this pragmatist feminist model of utopia.

**Edward Thomas** Judy Kendall  
2012-02-15 Edward Thomas: The Origins of his Poetry builds a new theoretical framework for critical work on imaginative composition through an investigation of Edward Thomas's composing processes, on material from his letters, his poems and his prose books. It looks at his relation to the land and landscape and includes detailed and illuminating new readings of his poems. It traces connections between Thomas's approach to composition and the writing and thought of Freud, Woolf and William James, and the influence of Japanese aesthetics, and draws surprising and far-reaching conclusions for the study of poetic composition.

*A Companion to Twentieth-Century Poetry* Neil Roberts  
2008-06-09 In the twentieth century more people spoke English and more people wrote

poetry than in the whole of previous history, and this Companion strives to make sense of this crowded poetical era. The original contributions by leading international scholars and practising poets were written as the contributors adjusted to the idea that the possibilities of twentieth-century poetry were exhausted and finite. However, the volume also looks forward to the poetry and readings that the new century will bring. The Companion embraces the extraordinary development of poetry over the century in twenty English-speaking countries; a century which began with a bipolar transatlantic connection in modernism and ended with the decentred heterogeneity of post-colonialism.

Representation of the 'canonical' and the 'marginal' is therefore balanced, including the full integration of women poets and feminist approaches and the in-depth treatment of post-colonial poets from various national traditions.

Discussion of context,

intertextualities and formal approaches illustrates the increasing self-consciousness and self-reflexivity of the period, whilst a 'Readings' section offers new readings of key selected texts. The volume as a whole offers critical and contextual coverage of the full range of English-language poetry in the last century.

**American Studies as Transnational Practice** Yuan

Shu 2015-12-22 This wide-ranging collection brings together an eclectic group of scholars to reflect upon the transnational configurations of the field of American studies and how these have affected its localizations, epistemological perspectives, ecological imaginaries, and politics of translation. The volume elaborates on the causes of the

transnational paradigm shift in American studies and describes the material changes that this new paradigm has effected during the past two decades. The contributors hail from a variety of postcolonial, transoceanic, hemispheric, and post-national positions and sensibilities, enabling them to theorize a "crossroads of cultures" explanation of transnational American studies that moves beyond the multicultural studies model. Offering a rich and rewarding mix of essays and case studies, this collection will satisfy a broad range of students and scholars.

**America Embattled** Richard Crockatt 2012-10-12 What causes Anti- Americanism and where are its historical roots? What is the impact of 9/11 on America's sense of itself and its role in the world? Is America paradoxically a victim of its own political and economic power? This book seeks to understand the terrible attacks of September 11th within a broader historical, political and ideological context. Rather

than drawing on simple 'clash of civilisation' oppositions, the author argues that it is important to have an awareness of the complex historical processes which influence: America's sense of itself and its changing view of the world How the world, especially the Muslim world, views America The changing nature of international politics and the global system since the end of the cold war. Drawing on a wide range of contemporary and historical sources Richard Crockatt has written a balanced, subtle and highly readable book which provides genuine insight into American foreign policy, anti-Americanism and Islamic fundamentalism. It will be important reading for all those seeking to understand the background to the 'war on terror'.

**The Origin of Ideas** Mark Turner 2014-01-02 What makes human beings so innovative, so adept at rapid, creative thinking? Where do new ideas come from, and once we have them, how can we carry them

mentally into new situations? What allows our thinking to range easily over time, space, causation, and agency-so easily that we take this truly remarkable ability for granted? In *The Origin of Ideas*, Mark Turner offers a provocative new theory to answer these and many other questions. While other species do what we cannot-fly, run amazingly fast, see in the dark-only human beings can innovate so rapidly and widely. Turner argues that this distinctively human spark was an evolutionary advance that developed from a particular kind of mental operation, which he calls "blending": our ability to take two or more ideas and create a new idea in the "blend." Turner begins by looking at the "lionman," a 32,000-year-old ivory figurine, one of the earliest examples of blending. Here, the concepts "lion" and "man" are merged into a new figure, the "lionman." Turner argues that at some stage during the Paleolithic Age, humans reached a tipping point. Before that, we were a

bunch of large, unimaginative mammals. After that, we were poised to take over the world. Once biological evolution hit upon making brains that could do advanced blending, we possessed the capacity to invent and maintain culture. Cultural innovation could then progress by leaps and bounds over biological evolution itself, leading to the highest forms of human cognition and creativity. For anyone interested in how and why our minds work the way they do, *The Origin of Ideas* offers a wealth of original insights-and is itself a brilliant example of the innovative thinking it describes.

*Fictions of Western American Domesticity* Amanda J. Zink 2018-06-01 This work provides a compelling explanation of something that has bedeviled a number of feminist scholars: Why did popular authors like Edna Ferber continue to write conventional fiction while living lives that were far from conventional? Amanda J. Zink argues that white writers like Ferber and Willa Cather avoided the subject of their

own domestic labor by writing about the performance of domestic labor by "others," showing that American print culture, both in novels and through advertisements, moved away from portraying women as angels in the house and instead sought to persuade other women to be angels in their houses. Zink further explores lesser-known works such as Mexican American cookbooks and essays in Indian boarding school magazines to show how women writers "dialoging domesticity" exemplify the cross-cultural encounters between "colonial domesticity" and "sovereign domesticity." By situating these interpretations of literature within their historical contexts, Zink shows how these writers championed and challenged the ideology of domesticity.

**Pragmatism and Literary Studies** Winfried Fluck 1999

**Literary Research and the American Modernist Era** Robert N. Matuozzi 2008-07-31 Characterized by its move away from Romanticism and toward mundane, every day

subjects, as well as incorporating such ideas as metanarrative, stream of consciousness, and disjointed timelines, the American Modernist Era was at its heyday during the years 1914-1949. It produced such great authors as Ernest Hemingway, William Faulkner, and F. Scott Fitzgerald, and memorable works like *As I Lay Dying* and *The Great Gatsby*. *Literary Research and the American Modernist Era* offers the scholar and researcher a clear introduction to the best contemporary library resources and practices for researching American modernist writing. Graduate students, advanced undergraduates, researchers, and scholars specializing in American modernist writing will improve their information skills and fluency, whether in the real or the virtual library. Even those lacking access to some of the resources described here can profit from this overview of literary research because it will help them frame questions, indicate where to go for answers, and

demonstrate useful connections between many of the secondary scholarly sources. This guide offers a coherent account of how contemporary research skills and resources can complement one another in helping the scholar effectively deal with typical challenges they encounter in their work *Speech Acts in Literature* Joseph Hillis Miller 2001 This book demonstrates the presence of literature within speech act theory and the utility of speech act theory in reading literary works. Though the founding text of speech act theory, J. L. Austin's *How to Do Things with Words*, repeatedly expels literature from the domain of felicitous speech acts, literature is an indispensable presence within Austin's book. It contains many literary references but also uses as essential tools literary devices of its own: imaginary stories that serve as examples and imaginary dialogues that forestall potential objections. *How to Do Things with Words* is not the triumphant

establishment of a fully elaborated theory of speech acts, but the story of a failure to do that, the story of what Austin calls a "bogging down." After an introductory chapter that explores Austin's book in detail, the two following chapters show how Jacques Derrida and Paul de Man in different ways challenge Austin's speech act theory generally and his expulsion of literature specifically. Derrida shows that literature cannot be expelled from speech acts—rather that what he calls "iterability" means that any speech act may be literature. De Man asserts that speech act theory involves a radical dissociation between the cognitive and positing dimensions of language, what Austin calls language's "constative" and "performative" aspects. Both Derrida and de Man elaborate new speech act theories that form the basis of new notions of responsible and effective politico-ethical decision and action. The fourth chapter explores the role of strong emotion in effective

speech acts through a discussion of passages in Derrida, Wittgenstein, and Austin. The final chapter demonstrates, through close readings of three passages in Proust, the way speech act theory can be employed in an illuminating way in the accurate reading of literary works.

**The New North American Studies**

Winfried Siemerling  
2005 Winner of the English Book Award, Grand Prix du Livre 2006 de la Ville de Sherbrooke. In this original and groundbreaking study, Winfried Siemerling examines the complexities of identity and recognition in the meaning of 'American'.

*Ideology and Desire in*

*Renaissance Poetry* Ronald Corthell 1997 Each chapter explores the interrelationships of representation, identification, and desire, while the book as a whole gradually shifts in emphasis from new historicist concerns with representation and the social realm toward psychoanalytic themes of identification, desire,

Fictive Fathers in the Contemporary American Novel

Debra Shostak 2020-02-20

Fictive Fathers in the Contemporary American Novel explores the unstable construction of

heteronormative white masculinity in the

contemporary United States by focusing on relationships between fathers and their

children. Debra Shostak reads the novels of 18 North

American writers publishing in the late 20th and early 21st centuries as allegories of

cultural conflict and change within the nuclear family; the

authors considered include Paul Auster, Don DeLillo,

Jeffrey Eugenides, Jonathan

Safran Foer, Jonathan Franzen,

John Irving, Jonathan Lethem,

Carole Maso, Bobbie Ann

Mason, Cormac McCarthy,

Claire Messud, Viet Thanh

Nguyen, Tim O'Brien,

Marilynne Robinson, Philip

Roth, Mona Simpson, Jane

Smiley, and Anne Tyler. These

novelists portray father figures who, often literally or

figuratively absent from the family scene, disrupt the familial order and their family members' identities. Shostak's close readings illuminate unexpectedly conservative, even subversive, ideological positions at the heart of these fictions. Fictive Fathers traces the eroding myth of paternal authority that sustained a patriarchal model within real American families and their literary representations.

Space in America 2005-01-01

America's sense of space has always been tied to what Hayden White called the narrativization of real events. If the awe-inspiring

manifestations of nature in America (Niagara Falls,

Virginia's Natural Bridge, the

Grand Canyon, etc.) were often

used as a foil for projecting

utopian visions and

idealizations of the nation's

exceptional place among the

nations of the world, the rapid

technological progress and its

concomitant appropriation of

natural spaces served equally

well, as David Nye argues, to

promote the dominant cultural

idiom of exploration and conquest. From the beginning, American attitudes towards space were thus utterly contradictory if not paradoxical; a paradox that scholars tried to capture in such hybrid concepts as the middle landscape (Leo Marx), an engineered New Earth (Cecelia Tichi), or the technological sublime (David Nye). Not only was America's concept of space paradoxical, it has always also been a contested terrain, a site of continuous social and cultural conflict. Many foundational issues in American history (the dislocation of Native and African Americans, the geopolitical implications of nation-building, immigration and transmigration, the increasing division and clustering of contemporary American society, etc.) involve differing ideals and notions of space. Quite literally, space and its various ideological appropriations formed the arena where America's search for identity (national, political, cultural) has been staged. If

American democracy, as Frederick Jackson Turner claimed, is born of free land, then its history may well be defined as the history of the fierce struggles to gain and maintain power over both the geographical, social and political spaces of America and its concomitant narratives. The number and range of topics, interests, and critical approaches of the essays gathered here open up exciting new avenues of inquiry into the tangled, contentious relations of space in America. Topics include: Theories of Space - Landscape / Nature - Technoscape / Architecture / Urban Utopia - Literature - Performance / Film / Visual Arts.

Humane Readings Jason Finch  
2009-12-10 Since the 1980s, Roger D. Sell's literary criticism has striven to take account of the (often conflicting) approaches available without compromising the human importance of the literary work: either in terms of its creation or its reception. Sell's

theory of literature draws strength from the interface between literary studies and linguistics and is grounded on the argument that literary making is a primary communicational act between human beings. Other critics have found Sell's work inspirational. This book both responds to Sell's ideas and demonstrates the multifaceted potential of his work. Aware of his trajectory through Literary-Pragmatic, 'Humanizing' and 'Mediating' criticism, *Humane Readings* offers a series of original and focused studies which demonstrate the power, provenance and importance of Sell's approach. Ranging in subject matter from the Early Modern Period to the present, a reconfiguration of literary criticism by contemporary readers and practitioners is urged here. Case studies are presented on a range of poetic, novelistic, dramatic and children's works. Each illuminates different aspects of Sell's critical thought.

**Rethinking Atlantic Empire**  
Scott Eastman 2021-06-11 In

recent years, the historiography of nineteenth-century Spain and Latin America has been invigorated by interdisciplinary engagement with scholars working on topics such as empire, slavery, abolition, race, identity, and captivity. No scholar better exemplified these developments than Christopher Schmidt-Nowara, a specialist on Spain and its Caribbean colonies in Cuba and Puerto Rico. A brilliant career was cut short in 2015 when he died at the age of 48. *Rethinking Atlantic Empire* takes Schmidt-Nowara's work as a point of departure, charting scholarly paths that move past reductive national narratives and embrace transnational approaches to the entangled empires of the Atlantic world.
