Teach Like a Human Miriam Hirsch 2020-10-15 Teach Like a Human: Essays for Parents and Teachers is a collection of essays focused on educating children to care about themselves, their communities, and the world we are privileged to share. Written for parents and teachers, the book highlights the importance of listening, caring, communicating, discerning,

and managing relationships effectively. The author draws on principles from organizational theory, curriculum study, and arts education, to encourage mindful reflection about educational practices and policies in pursuit of education for life. Standards based teaching strategies with its culture of testing will never solve the problem of teaching all children according to their needs. Physical, social, and emotional health are each important aspects of human development and children need strong relationships, positive role models, good friends, and high expectations from people who care about them. It truly all matters. Peppered with humor, metaphor and narrative, this book illuminates how educators, both parents and teachers, can galvanize experiences to deepen character, insight, empathy and joy in the people and things around us. To teach like a human means to teach with consciousness of what it means to be human, by focusing on qualitative aspects of life with sensitivity and strategy.

Left Behind Edward P. St. John 2015-11-30 Urban schools are falling short of preparing students for college. In *Left Behind*, a team of education scholars led by Edward P. St. John argues that American cities have been engaged for the past three decades in a radical—but failing—effort to transform general and

vocational high schools into college preparatory institutions. By examining the educational reforms in four urban charter schools across the United States and four public high schools in New York City, *Left Behind* reveals how educators contend with the challenge of developing new courses while providing social support for students to build college-going cultures. The research shows that district schools struggle to comply with standards that leave little room to develop advanced thematic curricula and that charter schools have not succeeded in substantially raising student test scores. Many students who start in rigorous charter schools transfer back to public schools while both public and charter schools struggle to prepare their students for college-level work. *Left Behind* provides crucial insights into the troubling trajectory of public policy while offering teachers and administrators effective strategies for overcoming barriers.
