[I Never Met a Dog I Didn't Like](#): Miranda McAdams 2014-04-11 This book details the true stories of the author's and her husband's many dogs and cats—from Lizzie, who loved to be dressed up as a witch and give out Halloween treats--to Lucky, whose life was saved just in time--to Anton, who survived distemper, a disease that kills many dogs and cats. All of the animals featured in this book came from animal rescue groups and shelters, with most of them coming from out-of-state kill shelters. For the most part, these animals had problematic behaviors, and were adults, except for the two puppies, Lucky and Anton. Some of these animals growled as their main form of communication to both humans and dogs alike and many of the male dogs marked or were incontinent indoors. Most of the animals needed obedience and leash training, and some dogs exhibited aggression over food, toys, and space. The growling, marking, lack of obedience to basic commands, absence of leash training, and aggressive tendencies all had made these otherwise good-natured animals unattractive to potential and first-time adopters. Another issue that surfaced was the fact that black animals are often overlooked or even avoided by adopters. The chapter, entitled "Ashley, the Black Dog,"

addresses this unfortunate and widespread prejudice toward black dogs and cats. The author found that it was extremely rewarding to adopt rescue dogs. Although they were difficult at times, she found them to be interesting, challenging, and loveable. She also felt that they had taught her a lot about how to handle dogs with their particular problems. The author also loved adopting the less complicated dogs—the ones who just eat, play, sleep, and lick your hand—like Ashley, Lucky, Pooky, and Gumby. These dogs may not have been the most intelligent dogs, but because of their gentle natures, they got along well with, and balanced out, the author's more difficult and aggressive dogs.

The Lives and Deaths of Shelter Animals Katja M Guenther 2020-08-18 "By investigating the . . . connection between the . . . shelter and the community . . . vastly expands . . . notions of intersectionality, democracy, and inclusivity." —Leslie Irvine, *American Journal of Sociology* Monster is an adult pit bull, muscular and grey, who is impounded in a large animal shelter in Los Angeles. Like many other dogs at the shelter, Monster is associated with marginalized humans and assumed to embody certain behaviors because of his breed. And like

approximately one million shelter animals each year, Monster will be killed. The Lives and Deaths of Shelter Animals takes us inside one of the country's highest-intake animal shelters. Katja M. Guenther witnesses the dramatic variance in the narratives assigned different animals, including Monster, which dictate their chances for survival. She argues that these inequalities are powerfully linked to human ideas about race, class, gender, ability, and species. Guenther deftly explores internal hierarchies, breed discrimination, and importantly, instances of resistance and agency. "Powerful and timely. . . . Katja M. Guenther unlocks the shelter door and eloquently explains this complicated and contested multispecies space, as she reflects on issues such as witnessing, vulnerability, advocacy, grievability, compassion, and animal resistance." —Carol J. Adams, author of *The Sexual Politics of Meat* "In this compassionate, incisive ethnography . . . Katja M. Guenther illuminates the entangled injustices that shape human relationships with other animals." —Lori Gruen, author of *Entangled Empathy* "With the perfect balance of intimacy and analytical depth, the author reminds us of how messy things can get when caring and killing become one, or when the value of the animal companion's life is measured by the race, gender, and zip code of the owner." —Bénédicte Boisseron, author of *Afro-Dog*

Finding Shelter Jesse Freidin 2017-04-01 The healing, beauty, and joy of the animal shelter system Without volunteers, our nation's animal shelter system simply would not exist. Volunteers speak for those that cannot speak, pick up the pieces for abandoned animals that have been let down by previous owners or unfortunate circumstances, and do whatever it takes to heal the deepest of wounds. In *Finding Shelter*, award-winning photographer Jesse Freidin shows the softer side of this story. He witnessed firsthand how many of the volunteers were able to mend their own emotional hurts with the love the shelter animals gave back to them, and how the power of these relationships transforms shelters into places where humans and animals can heal together. This realization propelled him to take a two-year journey across the country to document the tenderness and healing, beauty and joy he encountered within the shelter system. The result is a heartwarming inspiration for people to look differently at how to save shelter pets. In *Finding Shelter*, Freidin sparks a new discussion about animal rescue and what it feels like to truly love an animal.

The Ethics of Animal Shelters Voigt 2023 Ethical dilemmas and decision-making are a persistent feature of the everyday operations of animal shelters and animal protection organizations. These organizations frequently face difficult decisions about how to treat the animals in their care, decisions that are made all the more difficult by limited funding, material resources, and human labor. Moreover, animal protection organizations must also determine how to act within and toward the wider social and institutional environment in which non-human animals are routinely exploited. The first section of *The Ethics of Animal Shelters* contains practical recommendations developed by ethicists in response to the ethical challenges identified by employees of the Montreal Society for the Prevention of Cruelty to Animals. These challenges arise across the organization's activities, including its internal structure; shelter operations; public campaigns and advocacy work; dealing with the public, animal agriculture and governmental agencies; and their work with feral animals. The second section offers philosophical analyses of the ethical challenges unique to animal shelters. Issues explored include the killing of shelter animals; shelter animals' diets; medical decision-making procedures; adoption policies; and the role shelters might play in transforming social attitudes and norms.

From the weekly adoption days, when families come to find a new dog or cat, to investigations of animal abuse and a thrilling puppy mill raid, we come to know both the animals and their caretakers on a deeply personal level. With a keen eye for detail and profound emotional insight, Hess dispels common myths about shelter animals and captures the boundless compassion and courage of the people who comfort and defend them, especially during their desperate efforts to find homes for the animals, lest they be put to sleep. Bridging the Bond Tami L. Harbolt 2009-08 What happens behind the doors of the animal shelter? This book will introduce the reader to the work culture of animal shelter employees, volunteers, activists, educators, and pets. By weaving together her own personal memoirs with interviews of workers, the author describes the traditions, philosophies, history, and current social dynamics of a typical animal welfare community. She examines how the daily interactions, personal philosophies, disparate methods, technology, and life experiences of the humans and pets influence the care of homeless animals, often playing an intricate role in the life or death situation each pet eventually faces.

Animal Control Management Stephen Aronson 2010 This book is the first of its kind to discuss in detail the actual management of local animal control programs as opposed to the care of the animals. It covers financial, personnel, legal, health, and safety issues that animal control directors and management staff need to know in providing direction and oversight of animal control programs. Chapters examine selected

topics in which the author assesses strengths and weaknesses and offers new insights and strategies for more effective management. For example, the two chapters on contracting discuss the steps in the process, strategies, and suggested provisions in the written agreement to make the program more effective. The animal law chapters explain the basis for the laws, and highlight those provisions, that if enacted into law, can strengthen enforcement options. In addition, the author discusses and assesses interacting with the public and the media, liability issues, wildlife problems, and the politics of animal control.
