Dictionnaire de la Philosophie Encyclopaedia Universalis, 2015-10-27

Le Dictionnaire de la Philosophie d'Encyclopaedia Universalis dresse un

vaste panorama des thèmes et questions propres à la philosophie, de la lointaine Antiquité aux questionnements actuels. Les grands courants de la philosophie, les débats qui la traversent, les concepts qu'elle élabore sont la matière vivante de quelque 280 articles écrits par les meilleurs spécialistes. Au fil des textes, c'est le laboratoire des philosophes qui se découvre. Du stoïcisme à la phénoménologie, de l'idéalisme à l'herméneutique, les outils de la pensée philosophique sont mis en place. La réflexion peut commencer : tout y incite. Les concepts forgés par vingt-cinq siècles de philosophie sont à portée de main. Et une large place est faite aussi aux formes prises par le travail philosophique hors du monde occidental (dans l'Islam ou en Extrême-Orient, par exemple). Pour les étudiants et de ceux qui, professionnellement ou en amateurs, pratiquent la philosophie, le Dictionnaire est à la fois un stimulant et une solide référence. 1800 pages. Plus de 150 auteurs, parmi lesquels Étienne Balibar, Georges Canguilhem, Hans-Georg Gadamer, Lucien Jerphagnon, Emmanuel Levinas, Paul Ricœur... Un ouvrage de référence à l'usage des étudiants comme des professionnels. A Natural History of Natural Theology Helen De Cruz 2014-12-19 An examination of the cognitive foundations of intuitions about the existence and attributes of God. Questions about the existence and attributes of God form the subject matter of natural theology, which seeks to gain knowledge of the divine by relying on reason and experience of the world. Arguments in natural theology rely largely on intuitions and inferences that seem natural to us, occurring spontaneously—at the sight of a beautiful landscape, perhaps, or in wonderment at the complexity of the cosmos—even to a nonphilosopher. In this book, Helen De Cruz and Johan De Smedt examine the cognitive origins of arguments in natural theology. They find that although natural theological arguments can be very sophisticated, they are rooted in everyday intuitions about purpose, causation, agency, and morality. Using evidence and theories from disciplines including the cognitive science of religion, evolutionary ethics, evolutionary aesthetics, and the cognitive science of testimony, they show that these intuitions emerge early in development and are a stable part of human cognition. De Cruz and De Smedt analyze the cognitive underpinnings of five well-known arguments for the existence of God: the argument from design, the cosmological argument, the moral argument, the argument from beauty, and the argument from miracles. Finally, they consider whether the cognitive origins of these natural theological arguments should affect their rationality.

Adult Interests Edward Lee Thorndike 1935 "This book by Dr. Thorndike and his coworkers is a sequel to the volume entitled "Adult Learning" and performs a similar service for anybody who is interested in improving his own interests or those of other in adult years. This book states the main results of experiments carried out in 1931 to 1934 on changes in the intensity of interests with age, on the possibility of modifying and improving interests in adult years, and on means and methods of doing this effectively. Facts are also presented concerning individual differences in interests among adults, and differences between old and young. There are practical discussions of the means and methods desirable in the teaching of adults"--Résumé de l'éditeur. (PsycINFO Database Record (c) 2014 APA, all rights reserved).

Still Life Elisha Cohn 2015-12-01 *Still Life: Suspended Development in the Victorian Novel* rethinks the nineteenth-century aesthetics of agency through the Victorian novel's fascination with states of reverie, trance, and sleep. These states challenge contemporary scientific and philosophical accounts of the perfectibility of the self, which privileged reflective self-awareness. In dialogue with the field of literature and science studies and affect studies, this book shows how Victorian writers used narrative form to respond to the analytical practices and knowledge

production of those other disciplines. Drawing upon canonical texts--by Charlotte Brontë, George Eliot, George Meredith, and Thomas Hardy--*Still Life* contends that depictions of non-purposive perceptual experience suspend the processes of self-cultivation (*Bildung*) central to Victorian aesthetics, science, psychology, and political theory, as well as most critical accounts of the novel form. Departing from the values of individual cultivation and moral revelation associated with the genre, these writers offer an affective framework for understanding the subtly non-instrumental powers of narrative. Victorian novels ostensibly working within the parameters of the *Bildungsroman* are suspended by moments of "still life": a decentered lyricism associated with states of diminished consciousness. They use this style to narrate what should be unnarratable: experiences not dependent on reflective consciousness, which express a distinctive ambivalence toward dominant developmental frameworks of individual self-culture.
