**Our Way Home** Heide Hendricks 2023-09-05 The glorious Connecticut property of Heide Hendricks and Rafe Churchill (of the architecture and interior design firm Hendricks Churchill) illustrates how a late nineteenth-century farmhouse can be adapted for stylish and comfortable twenty-first-century living. Rafe and Heide discovered their true home in

a late 1800s New England farmhouse after a decade of living in Brooklyn, New York. The historic property, Ellsworth, is a showplace for their shared aesthetic and sensibility of designing for real life, and not for formality. At the core is a house of pared-down traditionalism with references to Shaker tranquility, Arts & Crafts practicality, and bohemian chic. Whimsical wallcoverings, striking colors, a mix of contemporary furniture and antiques, exciting works of art, and comfort abound—turning a workaday house from the nineteenth century into a creative laboratory of the twenty-first. The house and its surroundings—a constant work in progress with evolving interiors, landscaping objectives, a reconfigured sunroom, a barn restoration, and planned hiking trails—have become an endless source of inspiration for the couple's many projects, which include residences in New England, New York's Hudson Valley, New York City, Oyster Bay, Boulder, and Austin. The narrative of the book addresses the couple's design process in terms of architecture, decoration, and final installation. As many Americans are deciding to leave cities for calmer, more connected lives in the country, Heide and Rafe illustrate how this transition can be one of beauty and logic.

**Brewing Local** Stan Hieronymus 2016-10-07 Americans have brewed beers using native ingredients since pre-Columbian times, and a new wave of brewers has always been at the forefront of the locavore movement. Brewers use locally-grown, traditional ingredients as well as

cultivated and foraged flora to produce beers that capture the essence of the place they were made. In *Brewing Local*, Stan Hieronymus examines the history of how distinctly American beers came about, visits farm breweries, and goes foraging for both plants and yeast to discover how brewers are using novel ingredients to create unique beers. The book introduces brewers and drinkers to the ways herbs, flowers, plants, trees, and shrubs flavor distinctive beers. A catalog of over 170 different ingredients describes the aroma and flavor influence they have on beer. *Brewing Local* includes 22 recipes from nationally recognized craft brewers and homebrewers.

**Reinventing the Wheel** Bronwen Percival 2017-09-05 "Reinventing the Wheel is equal parts popular science, history, and muckraking. Over the past hundred and fifty years, dairy farming and cheesemaking have been transformed, and this book explores what has been lost along the way. Today, using cutting-edge technologies like high-throughput DNA sequencing, scientists are beginning to understand the techniques of our great-grandparents. The authors describe how geneticists are helping conservationists rescue rare dairy cow breeds on the brink of extinction, microbiologists are teaching cheesemakers to nurture the naturally occurring microbes in their raw milk rather than destroying them, and communities of cheesemakers are producing "real" cheeses that reunite farming and flavor, rewarding diversity and sustainability at every level."--Provided by publisher.

*Farmhouse Revival* Steve Gross 2018-12-15 A look at the farmhouses of the northeastern United States and their many approaches to their renovation, restoration, and interior design. The American farmhouse represents integrity, ingenuity, capability, and our rural and agricultural heritage. Farmhouses today are survivors from another era, constantly being rediscovered, revived, and restored in different, creative ways—though all share the same timeless aesthetic. In this fresh look at the American vernacular farmhouse, photographers Steve Gross and Susan Daley set out to document twenty revived farmhouses, and their stunning photographs illustrate the many individual approaches to the renovation, restoration, and interior design of the modern farmhouse. Found in many architectural styles, from humble Cape Cods to refined Greek Revivals, the homes in this book have all been reinvented over the years to accommodate individual tastes and changing needs while maintaining the spirit of a true American farmhouse. Furnished with vintage details—wood-burning stoves, enameled kitchen sinks, chenille bedspreads—and rooted in landscapes of rolling fields and mountains, these are the homes of the multigenerational families, solitary shepherds, graphic artists, architects, and organic farmers at the forefront of the renewed interest in the farming lifestyle. The accompanying text tells the history of each house, how it has been passed down from generation to generation or rescued from abandonment and neglect, and how the inhabitants live in and use the homes today. From three-hundred-year-old Sydenham House in Newark, New Jersey, to Sylvester Manor on Shelter Island, New York, this is a look at American culture through that most celebrated and quintessential building style, the farmhouse. Praise for *Farmhouse Revival* "Those interested in a homey, country style of decorating or in home restoration will be inspired." —Library Journal "Above all, the greatest joy is just looking at the beautiful time-worn places and appreciating the way those that came before led a happy and fulfilling life of simplicity and utility within their walls. For once you have read this book, you will realize that in many ways, it is the farmhouse that helps to restore us, and not the other way around." —Preservation.com "Buy the book *Farmhouse*

Revival for the photos—for inspiration . . . the authors clearly know architecture and antiques.” —Dan’s Paper “Perusing Farmhouse Revival is a marvelous experience . . . and is sure to make readers wonder what stories the farmhouses in their towns could tell.” —Cleveland Plain Dealer

**Minka** John Roderick 2012-03-20 In 1959 journalist John Roderick joined the Tokyo bureau of the Associated Press. There, he befriended a Japanese family, the Takishitas. After musing offhandedly that he would like to one day have his own house in Japan, the family—unbeknownst to John—set out to grant his wish. They found Roderick a 250-year-old minka, or hand-built farmhouse, with a thatched roof and held together entirely by wooden pegs and joinery. It was about to be washed away by flooding and was being offered for only fourteen dollars. Roderick graciously bought the house, but was privately dismayed at the prospect of living in this enormous old relic lacking heating, bathing, plumbing, and proper kitchen facilities. So the minka was dismantled and stored, where Roderick secretly hoped it would stay, as it did for several years. But Roderick's reverence for natural materials and his appreciation of traditional Japanese and Shinto craftsmanship eventually got the better of him. Before long a team of experienced carpenters were hoisting massive beams, laying wide wooden floors, and attaching the split-bamboo ceiling. In just forty days they rebuilt the house on a hill overlooking Kamakura, the ancient capital of Japan. Working together, they renovated the farmhouse, adding features such as floor-to-ceiling sliding glass doors and a modern kitchen, bath, and toilet. From these humble beginnings, Roderick's minka has become internationally known and has hosted such luminaries as President George H. W. Bush, and Senator Hillary Clinton. John Roderick's architectural memoir *Minka* tells the compelling and often poignant story of how one man fell in love with the people, culture, and ancient building traditions of Japan, and reminds us all about the importance of craftsmanship and the meaning of place and home in the process.

**Farmhouse** Fine Homebuilding 2021-08-03 The farmhouse is a classic American icon, combining comfort and simplicity, elegance and nostalgia, all without pretension. No matter the age or condition, these historic homesteads call to mind the pragmatism of the pioneers who worked the land and raised their families at a time when practicality was key to prosperity. But the farmhouse is more than a historic artifact. Farmhouse style continues to evolve into the 21st century, carrying with it the best of the past while adapting to our modern lifestyle. Whether built in 1720 or 2020, a farmhouse is instantly recognizable for its main rectangular form, gabled or lean-to additions, various outbuildings, and spartan architecture, among other hallmarks. While the farmhouse's use of natural materials and basic construction is indicative of its traditional, sensible nature, modern farmhouses might equally be built according to Passive House or other energy-efficient standards. Whether true to tradition or adapted for a modern lifestyle, the houses featured in *Farmhouse* are a testament to the flexibility, durability, longevity, and—above all else—the everlasting appeal of the American farmhouse.

**Clearing Land** Jane Brox 2005-09-14 Though few of us now live close to the soil, the world we inhabit has been sculpted by our long national saga of settlement. At the heart of our identity lies the notion of the family farm, as shaped by European history and reshaped by the vast opportunities of the continent. It lies at the heart of Jane Brox's personal story, too: she is the daughter of immigrant New England farmers whose way of life she memorialized in her first two books but has not carried on. In this clear-eyed, lyrical account, Brox twines the two narratives, personal and historical, to explore the place of the family farm as it has evolved from the pilgrims' brutal progress at Plymouth to the modern world, where much of our food is produced by industrial agriculture while the small farm is both marginalized and romanticized. In considering the place of the farm, Brox also considers the rise of textile cities in America, which encroached not only upon farms and farmers but upon the sense of commonality that once sustained them; and she traces the transformation of the idea of wilderness—and its intricate connection to cultivation—which changed as our ties to the land loosened, as terror of the wild was replaced by desire for it. Exploring these strands with neither judgment nor sentimentality, Brox arrives at something beyond a biography of the farm: a vivid depiction of the half-life it carries on in our collective imagination.

*The Growing Season* Sarah Frey 2021-10-05 "A gutsy success story" (The New York Times Book Review) about one tenacious woman's journey to escape rural poverty and create a billion-dollar farming business—without ever leaving the land she loves. The youngest of her parents' combined twenty-one children, Sarah Frey grew up on a struggling farm in southern Illinois, often having to grow, catch, or hunt her own dinner alongside her brothers. She spent much of her early childhood dreaming of running away to the big city—or really anywhere with central heating. At fifteen, she moved out of her family home and started her own fresh produce delivery business with nothing more than an old pickup truck. Two years later, when the family farm faced inevitable foreclosure, Frey gave up on her dreams of escape, took over the farm, and created her own produce company. Refusing to play by traditional rules, at seventeen she began talking her way into suit-filled boardrooms, making deals with the nation's largest retailers. Her early negotiations became so legendary that Harvard Business School published some of her deals as case studies, which have turned out to be favorites among its students. Today, her family-operated company, Frey Farms, has become one of America's largest fresh produce growers and shippers, with farmland spread across seven states. Thanks to the millions of melons and pumpkins she sells annually, Frey has been dubbed "America's Pumpkin Queen" by the national press. *The Growing Season* tells the inspiring story of how a scrappy rural childhood gave Frey the grit and resiliency to take risks that paid off in unexpected ways. Rather than leaving her community, she found adventure and opportunity in one of the most forgotten parts of our country. With fearlessness and creativity, she literally dug her destiny out of the dirt.
