*Carl Friedrich von Weizsäcker: Major Texts in Physics* Michael Drieschner 2014-06-13 This book presents a collection of texts by the German physicist and philosopher Carl Friedrich von Weizsäcker (1912-2007), for use in seminars on the history, epistemology and structure of physics. Most texts appear in English for the first time. Weizsäcker became famous through his works in physics, mainly in the early development of nuclear physics. Later he would also become well known as a philosopher and analyst of contemporary culture. Texts include the original publications of the "Weizsäcker-Bethe formula" of nuclear masses and the "Bethe-Weizsäcker cycle," which explains the source of energy in the sun; both were developed by Bethe at the same time and independently of Weizsäcker. Further texts deal with Weizsäcker's explanation of the origin of planets, his explanation of the "time arrow" in Statistical Mechanics and his analyses of Quantum Mechanics and the structure of physics in general.

*Progress* Robert David Sack 2002-06-06 "The connection between geography and progress is fundamental," writes Robert Sack in the introduction to the present volume. Touching on both moral and material progress, six of the world's leading geographers and environmental historians explore differing aspects of this connection. Thomas Vale discusses whether progress is discernible in the natural realm; Kenneth Olwig examines fundamental changes that occurred to the notion of progress with the rise of modernity, while David Lowenthal and Yi-Fu Tuan discuss recent geographical changes that have resulted in an increasing societal disenchantment and anxiety. Nicholas Entrikin looks at progress as "moral perfectibility, and its connection to democratic places," a theme which Robert Sack further explores by prescribing ways in which geographers and citizens can evaluate and create places that increase our awareness of reality in its variety and complexity. Contributors: J. Nicholas Entrikin, University of California-Los Angeles; David Lowenthal, University College, London; Kenneth Olwig, University in Trondheim, Norway; Robert David Sack, University of Wisconsin-Madison; Yi-Fu Tuan, University of Wisconsin-Madison; Thomas R. Vale, University of Wisconsin-Madison.

Carl Friedrich von Weizsäcker: Pioneer of Physics, Philosophy, Religion, Politics and Peace Research Ulrich Bartosch 2015-04-22 This book offers a collection of texts by Carl Friedrich von Weizsäcker (1912-2007), a major German universal scientist who was a pioneer in physics, philosophy, religion, politics and peace research. He started as an assistant to the physicist, Werner Heisenberg, held professorships in theoretical physics (Strasbourg), physics (Goettingen) and philosophy (Hamburg) and was a co-director (with Juergen Habermas) of a Max Planck Institute for Research into living conditions in a world of science and technology in Starnberg. Citizenship and National Identity in Twentieth-Century Germany Geoff Eley 2007-11-09 This book is one of the first to use citizenship as a lens through which to understand German history in the twentieth century. By considering how Germans defined themselves and others, the book explores how nationality and citizenship rights were constructed, and how Germans defined—and contested—their national community over the century. The volume presents new research informed by cultural, political, legal, and institutional history to obtain a fresh understanding of German history in a century marked by traumatic historical ruptures. By investigating a concept that has been widely discussed in the social sciences, Citizenship and National Identity in Twentieth-Century Germany engages with scholarly debates in sociology, anthropology, and political science.

Carl Friedrich von Weizsäcker: Major Texts on Politics and Peace Research Ulrich Bartosch 2015-04-25 This book offers a collection of texts by Carl Friedrich von Weizsäcker (1912-2007), a major German universal scientist who was also a pioneer in physics, philosophy, religion on issues of politics and peace research. He worked with Werner Heisenberg and Otto Hahn in the German "Uranverein", obtained a patent for plutonium during World War II and was an opponent of the nuclear armament of the German armed forces (1957). Furthermore, he published a study on the inability to defend Germany (1971) that was

instrumental in the debate on defensive defense since the mid 1970s. He wrote on war and peace, peace and truth, policy implications of nuclear energy, on ethical issues of modern strategy, on consequences of war and war prevention and on the theory of power. He coined the term "world domestic policy" which still covers a valid theory for political, institutional secured world peace in the atomic age.

*Time, Quantum and Information* Lutz Castell 2013-04-17 The articles treat subjects such as the social responsibility of scientists, thermonuclear processes in stars and stellar neutrinos, turbulence and the emergence of planetary systems. Considerable attention is paid to the unity of nature, the nature of time, and to information about, and interpretation of, the structure of quantum theory, all important philosophical problems of our times. The last section describes von Weizsäcker's ur-hypothesis and how it will theoretically permit the construction of particles and interactions from quantized bits of information.

**The Structure of Physics** Carl F. von Weizsäcker 2007-01-15 The book is a newly arranged and revised English version of "Aufbau der Physik" by Carl Friedrich von Weizsäcker. Some original chapters and sections have been deleted, and a new chapter about further insights and results of ur-theoretic research of the late 1980's and 1990's has been included. Carl Friedrich von Weizsäcker combines the perspectives of science, philosophy, religion and politics with a view towards the challenges as well as the responsibilities of our time.

**Toward a Science of Man** Timothy H. Thoresen 2011-06-03 *Toward a Science of Man: Essays in the History of Anthropology.*

*The Anthropology of the Enlightenment* Larry Wolff 2007-09-04 The modern enterprise of anthropology, with all of its important implications for cross-cultural perceptions, perspectives, and self-consciousness emerged from the eighteenth-century intellectual context of the Enlightenment. If the Renaissance discovered perspective in art, it was the Enlightenment that articulated and explored the problem of perspective in viewing history, culture, and society. If the Renaissance was the age of oceanic discovery—most dramatically the discovery of the New World of America—the critical reflections of the Enlightenment brought about an intellectual rediscovery of the New World and thus laid the foundations for modern anthropology. The contributions that constitute this book present the multiple anthropological facets of the Enlightenment, and suggest that the character of its intellectual engagements—acknowledging global diversity, interpreting human societies, and bridging cultural difference—must be understood as a whole to be fundamentally anthropological.

*Strange Glory* Charles Marsh 2015-04-28 Winner, Christianity Today 2015 Book Award in History/Biography Shortlisted for the PEN/Jacqueline Bograd Weld Award for Biography In the decades since his execution by the Nazis in 1945, Dietrich Bonhoeffer, the German pastor, theologian, and anti-Hitler conspirator, has become one of the most widely read and inspiring Christian thinkers of our time. With unprecedented archival access and definitive scope, Charles Marsh captures the life of this remarkable man who searched for the goodness in his religion against the backdrop of a steadily darkening Europe. From his brilliant student days in Berlin to his transformative sojourn in America, across Harlem to the Jim Crow South, and finally once again to Germany where he was called to a ministry for the downtrodden, we follow Bonhoeffer on his search for true fellowship and observe the development of his teachings on the shared life in Christ. We witness his growing convictions and theological beliefs, culminating in his vocal denunciation of Germany's treatment of the Jews that would put him on a crash course with Hitler. Bringing to life for the first time this complex human being—his substantial flaws, inner torment, the friendships and the faith that sustained and finally redeemed him—*Strange Glory* is a momentous achievement.

**Carl Friedrich von Weizsäcker: Major Texts on Religion** Konrad Raiser 2014-05-27 This book presents a collection of texts by the German physicist and philosopher Carl Friedrich von Weizsäcker (1912-2007) in English, for use in seminars on the philosophy of religion, the comparative study of religion, but as well on the relationship between religion and the scientific worldview. Most texts appear in English for the first time. Weizsäcker became famous through his works in physics, mainly in the early development of nuclear physics. Later he would also become well known as a philosopher and analyst of contemporary culture. He also worked very intensely on projects for the prevention of nuclear war and for peace in general.

*Romantic Motives* George W. Stocking 1989-12-12 *Romantic Motives* explores a topic that has been underemphasized in the historiography of anthropology. Tracking the Romantic strains in the the writings of Rousseau, Herder, Cushing, Sapir, Benedict, Redfield, Mead, Lévi-Strauss, and others, these essays show Romanticism as a permanent and recurrent tendency within the anthropological tradition.

*The Young Bonhoeffer* Dietrich Bonhoeffer 2002-11 "Volume 11 in the sixteen-volume Dietrich Bonhoeffer Works English Edition, Ecumenical, Academic, and Pastoral Work: 1931-1932, provides a comprehensive translation of Bonhoeffer's important writings from 1931 to 1932, with extensive commentary about their historical context and theological significance. This volume covers the significant period of Bonhoeffer's entry into the international ecumenical world and the final months before the beginning of the National Socialist dictatorship. It begins with Bonhoeffer's return to Berlin in June 1931 after his year of study in the United States. In the crucial period that followed, Bonhoeffer continued his preparations for the ministry, began teaching at Berlin University, and became active at international ecumenical meetings. His letters and lectures, however, also document the economic and political turbulence on the European and world stage, and Bonhoeffer directly addresses the growing threat of the Nazi movement and what it portends not only for Germany, but for the world. Several of the documents in this volume, particularly the student notes of his university lecture on "The Nature of the Church" and his lectures on Christian ethics, give important insights into his theology at this point. His ecumenical lectures and reports are significant documents for understanding the ecumenical debates of this period"--Publisher description.

**Sanctorum Communio: A Theological Study of the Sociology of the Church.** Dietrich Bonhoeffer Dietrich Bonhoeffer was an important theologian, biblical interpreter, pastor, ecumenist, and leader in the Confessing Church in Germany during the Nazi period. His writings and the example of his life continue to speak to people from many backgrounds. Here, for the first time in English is *Sanctorum Communio* in its entirety, including all material omitted from the original 1930 German publication. Bonhoeffer's doctoral dissertation sets out the theology of sociality that informed all his work, engaging social philosophy and sociology to interpret the church as "Christ existing as church-community." Here are the roots of his commitment to the Confessing Church and the ecumenical movement, and of his actions in the resistance movement for the sake of peace and Germany's future.

*In vivo. Une phénoménologie des moments décisifs de l'existence* Gabor Csepregi 2020-10-06T00:00:00-04:00 In vivo explore des questions fondamentales et des moments cruciaux de l'existence humaine - l'entrée en interaction avec une culture étrangère, la décision de se sortir d'une condition de vie routinière ou malheureuse, une action généreuse posée dans un contexte quotidien ordinaire - en fonction de leur potentiel de transformation de l'existence. En recourant à des illustrations tirées de la vie réelle et d'œuvres de fiction, Gabor Csepregi révèle le rôle primordial des sentiments personnels dans le façonnement de la vie humaine et démontre le pouvoir formateur de la spontanéité en dehors du contexte traditionnel de l'éducation formelle. Ces moments, et notamment la façon dont ils perturbent l'ordre temporel ordinaire constituent des expériences vécues de notre vitalité. « Recourant à un langage clair et précis, In vivo captivera les philosophes et les intellectuels. Csepregi engage un dialogue entre diverses traditions, faisant appel aux meilleurs courants de plusieurs philosophies pour développer un point de vue unique ». - Gaëlle Fiasse, Université McGill

*The Idea of Wilderness* Max Oelschlaeger 1991-01-01 How has the concept of wild nature changed over the millennia? And what have been the environmental consequences? In this broad-ranging book Max Oelschlaeger argues that the idea of wilderness has reflected the evolving character of human existence from Paleolithic times to the present day. An intellectual history, it draws together evidence from

philosophy, anthropology, theology, literature, ecology, cultural geography, and archaeology to provide a new scientifically and philosophically informed understanding of humankind's relationship to nature. Oelschlaeger begins by examining the culture of prehistoric hunter-gatherers, whose totems symbolized the idea of organic unity between humankind and wild nature, and idea that the author believes is essential to any attempt to define human potential. He next traces how the transformation of these hunter-gatherers into farmers led to a new awareness of distinctions between humankind and nature, and how Hellenism and Judeo-Christianity later introduced the unprecedented concept that nature was valueless until humanized. Oelschlaeger discusses the concept of wilderness in relation to the rise of classical science and modernism, and shows that opposition to "modernism" arose almost immediately from scientific, literary, and philosophical communities. He provides new and, in some cases, revisionist studies of the seminal American figures Thoreau, Muir, and Leopold, and he gives fresh readings of America's two prodigious wilderness poets Robinson Jeffers and Gary Snyder. He concludes with a searching look at the relationship of evolutionary thought to our postmodern effort to reconceptualize ourselves as civilized beings who remain, in some ways, natural animals.

**Theory in Social and Cultural Anthropology** R. Jon McGee 2013-08-28 Social and cultural anthropology and archaeology are rich subjects with deep connections in the social and physical sciences. Over the past 150 years, the subject matter and different theoretical perspectives have expanded so greatly that no single individual can command all of it. Consequently, both advanced students and professionals may be confronted with theoretical positions and names of theorists with whom they are only partially familiar, if they have heard of them at all. Students, in particular, are likely to turn to the web to find quick background information on theorists and theories. However, most web-based information is inaccurate and/or lacks depth. Students and professionals need a source to provide a quick overview of a particular theory and theorist with just the basics—the "who, what, where, how, and why". In response, SAGE Reference is publishing the two-volume Theory in Social and Cultural Anthropology: An Encyclopedia. Features & Benefits: Two volumes containing approximately 335 signed entries provide users with the most authoritative and thorough reference resource available on anthropology theory, both in terms of breadth and depth of coverage. To ease navigation between and among related entries, a Reader's Guide groups entries thematically and each entry is followed by Cross-References. In the electronic version, the Reader's Guide combines with the Cross-References and a detailed Index to provide robust search-and-browse capabilities. An appendix with a Chronology of Anthropology Theory allows students to easily chart directions and trends in thought and theory from early times to the present. Suggestions for Further Reading at the end of each entry and a Master Bibliography at the end guide readers to sources for more detailed research and discussion.

*In Vivo* Gabor Csepregi 2019-04-30 The course of human life, punctuated by unexpected and transformative moments, is never uniform. What are the characteristics of such life-defining moments, what responses do they evoke, and how do they transform the lives of those who experience them? *In Vivo* explores foundational questions and pivotal moments of the human experience - engagement with a foreign culture, the decision to break free from unfortunate experiences, a generous action undertaken in the context of an otherwise regular day - in terms of their life-altering potential. Through illustrative examples, both real and fictional, Csepregi reveals the primacy of personal feelings in shaping human life and demonstrates the formative power of spontaneity outside the traditional context of formal education. These moments, and particularly the way they disrupt ordinary temporal order, Csepregi argues, are the lived experiences of our vitality. In an age marked by increasing anxiety about the homogenizing tendencies of contemporary life, *In Vivo* is timely and revelatory. Informed by a range of philosophical thinking and examples from art, music, and literature, it illustrates opportunities for meaningful reflection that are available to everyone, and urges the reader to engage with them.

**Christian Moderns** Webb Keane 2007 "Across much of the postcolonial world, Christianity has often

become inseparable from ideas and practices linking the concept of modernity to that of human emancipation. To explore these links, the author undertakes a rich ethnographic study of the century-long encounter, from the colonial Dutch East Indies to post-independence Indonesia, among Calvinist missionaries, their converts, and those who resist conversion. This book illuminates a wide range of debates in social and cultural theory as it explores language, materiality, and morality".--BOOKJACKET.
