A Glossary of Real Estate Terms Ezra Levy 2000-11 The concept of "consumer protection" (which also implies "licensee protection") plays a major role in our present day business conduct, as it should. The author's personal experience of the lack of extensive knowledge on the part of licensees, let alone untrained personnel and clients, made evident the

need for an accumulation of data under one cover, relating to all fields that a real estate transaction may be faced with. Of necessity, in some instances certain definitions had to be tailored to conform with particular laws. In this book, they were made to conform with present California laws. However, the adaptation to other states should be fairly straightforward.

Example: What is a Chain of Title? A chain of title refers to the consecutive historical transfers in a title on a particular piece of real estate property. These chains start with the current owner of the property and trace their way back to the property's first owner. Reconstructing such a chain can be extremely important when a lender needs complete ownership documentation. Such title documents are generally kept by registry offices with local and municipal governments. The field of real estate places tremendous importance on such a chain of title. Because it can be difficult to construct them, companies have come up with systems to track ownership and

registration of real estate property. One of these is the Torrens Title system. Insurance companies in the United States will provide title insurance on a property. They do this using the chain of title on real estate that the owners are transferring. These chains are so important that many title insurance companies will keep their own private title operations to track such titles so they do not have to rely on only official government records. In cases where it is difficult to come up with a complete chain, abstracts of title can be utilized. Attorneys will sometimes certify these. Lack of a clear chain of title has caused significant problems during the Great Recession of 2008. These problems began when many lending companies made the choice in 1995 to use an electronic registry to hold the title. The best known company in this arena was MERS Mortgage Electronic Registration Systems. The banks tried to use this system so they could sell and purchase mortgages without needing to register ownership changes with the appropriate local governments. Without clear title chains, the banks were often not able to come up with the original titles needed to force foreclosures and evictions as individuals defaulted on their mortgages. A number of states throughout the U.S. sued the banks over these actions. The chain of title is also utilized in intellectual property areas. With the film industry, they refer to documentation that demonstrates the ownership rights of a particular movie. These chains can be used in other creative endeavors in the movie business. If many individuals contributed to the creative work, authorship is owned by a large number of the writers. Note: This example description is shorted due to publish restrictions. Each term is explained with 600 words and more.
