Guides to Library Collection Development

John Thomas Gillespie 1994-08-15 Intended to enhance collection development in school, public, and college libraries, this volume lists and annotates approximately 1,500 significant bibliographies published from 1985 through 1993, with some earlier but still useful publications. Annotations indicate scope of the work, size (often the number of entries), kinds of material included, purpose, arrangement, nature of entries, indexes, special features, and a recommendation. Author, title, and subject indexes provide easy access to the entries. With its deep and comprehensive coverage, this work will help not only in the process of selecting and

acquiring materials for the library but also in the process of identification of items for reference, readers' advisory, interlibrary loan, and collection evaluation.

When Indians Became Cowboys Peter Iverson 1994 Focusing on the northern plains and the Southwest, Iverson traces the rise and fall of individual and tribal cattle industries against the backdrop of changing federal Indian policies. He describes the Indian Bureau's inability to recognize that most nineteenth-century reservations were better suited to ranching than farming. Even though allotment and leasing stifled ranching, livestock became symbols and ranching a new means of resisting, adapting, and living - for remaining Native.

A Rediscovered Frontier Philip Lloyd Jackson 2006 A Rediscovered Frontier describes the changing land use issues taking place in the rapidly growing western United States, paying special attention to the previously unexplored area of private lands planning and local growth

management. A Rediscovered Frontier begins by exploring the term 'New West', describes prototypical land use patterns found throughout the West, and examines the spatial circumstances of rural and small town growth patterns. Intended as a text for college students taking courses in land use planning, a sourcebook for land use planning and environmental management professionals, as well as anyone who cares about western environments, A Rediscovered Frontier addresses the social, economic, political, and above all, geographical realities of land use in the West today.

Searching Out the Headwaters 1993
The People Are Dancing Again Charles Wilkinson 2012-02-01 The history of the Siletz is in many ways the history of all Indian tribes in America: a story of heartache, perseverance, survival, and revival. It began in a resource-rich homeland thousands of years ago and today finds a vibrant, modern community with a deeply held

commitment to tradition. The Confederated Tribes of Siletz Indians twenty-seven tribes speaking at least ten languages were brought together on the Oregon Coast through treaties with the federal government in 1853-55. For decades after, the Siletz people lost many traditional customs, saw their languages almost wiped out, and experienced poverty, killing diseases, and humiliation. Again and again, the federal government took great chunks of the magnificent, timber-rich tribal homeland, a reservation of 1.1 million acres reaching a full 100 miles north to south on the Oregon Coast. By 1956, the tribe had been terminated under the Western Oregon Indian Termination Act, selling off the remaining land, cutting off federal health and education benefits, and denying tribal status. Poverty worsened, and the sense of cultural loss deepened. The Siletz people refused to give in. In 1977, after years of work and appeals to Congress, they became the second tribe in the nation to have its federal

status, its treaty rights, and its sovereignty restored. Hand-in-glove with this federal recognition of the tribe has come a recovery of some land--several hundred acres near Siletz and 9,000 acres of forest--and a profound cultural revival. This remarkable account, written by one of the nation's most respected experts in tribal law and history, is rich in Indian voices and grounded in extensive research that includes oral tradition and personal interviews. It is a book that not only provides a deep and beautifully written account of the history of the Siletz, but reaches beyond region and tribe to tell a story that will inform the way all of us think about the past. Ranching West of the 100th Meridian

Richard L. Knight 2002 Recommended by The Nature Conservancy magazine. Ranching West of the 100th Meridian offers a literary and

thought-provoking look at ranching and its role in the changing West. The book's lyrical and deeply felt narratives, combined with fresh information and analysis, offer a poignant and enlightening consideration of ranchers' ecological commitments to the land, their cultural commitments to American society, and the economic role ranching plays in sustainable food production and the protection of biodiversity. The book begins with writings that bring to life the culture of ranching, including the fading reality of families living and working together on their land generation after generation. The middle section offers an understanding of the ecology of ranching, from issues of overgrazing and watershed damage to the concept that grazing animals can actually help restore degraded land. The final section addresses the economics of ranching in the face of declining commodity prices and rising land values brought by the increasing suburbanization of the West. Among the

contributors are Paul Starrs, Linda Hasselstrom, Bob Budd, Drummond Hadley, Mark Brunson, Wayne Elmore, Allan Savory, Luther Propst, and Bill Weeks. Livestock ranching in the West has been attacked from all sides -- by environmentalists who see cattle as a scourge upon the land, by fiscal conservatives who consider the leasing of grazing rights to be a massive federal handout program, and by developers who covet intact ranches for subdivisions and shopping centers. The authors acknowledge that, if done wrong, ranching clearly has the capacity to hurt the land. But if done right, it has the power to restore ecological integrity to Western lands that have been too-long neglected. *Ranching West of the 100th Meridian* makes a unique and impassioned contribution to the ongoing debate on the future of the New West.

Kansas History Homer E. Socolofsky

1992-04-20 The first volume in the series State

Bibliographies, this book provides comprehensive coverage of secondary materials on Kansas history and also includes useful references to major archival and manuscript collections. Although excellent specialized bibliographies have been published, this volume is the most complete compilation of historical and related materials for the state. Its broad and diverse scope ranges from standard political and economic studies to social and environmental histories, to local studies, and to regional studies with special significance to the state. The volume is divided into sections on prehistory; indigenous population; early exploration; territorial period; statehood; Kansas since 1898; agriculture; economic life; transportation; cultural life; education; science and medicine; social history; general histories and reference guides; local and county history; historiography materials; and historic sites. Entries include informative annotations designed to aid the novice and the scholar. The volume is thoroughly

indexed by author and subject and includes the only existing index for all the major articles appearing over the past 125 years in the Kansas State Historical Society's major publications.

A Bibliographical Guide to the Study of Western American Literature Richard W.

Etulain 1995 The revised and updated edition of this standard reference work in the field of Western American Literature now contains over 6,000 bibliographic references. The topical listings have been expanded to encompass feminist and environmental studies. Rather than attempting to be exhaustive, the editors have chosen the major interpretive works, making the volume useful to both specialists working outside their area and nonspecialists seeking an overview. Broad in its scope, the guide also focuses on a number of special topics: local color and regionalism, popular western literature, western film, Indian literature and Indians in western literature, the environment, women and

families, the Beats, and Canadian western literature. Logically and helpfully organized, the volume will be invaluable to scholars, researchers, students, and general readers.

Shaping the Sierra Timothy P. Duane
1999-06-30 The rural west is at a crossroads, and the Sierra Nevada is at the center of this social and economic change. The Sierra Nevada landscape has always been valued for its bounty of natural resource commodities, but new residents and an ever-growing flood of tourists to the area have transformed the relationship between the region's nature and its culture. In an engaging narrative that melds the personal with the professional, Timothy P. Duane—who grew up in the area—documents the impact of rapid population growth on the culture, economy, and ecology of the Sierra Nevada since the late 1960s. He also recommends innovative policies for mitigating the negative effects of future population growth in this spectacular but threatened region, as well as

throughout the rural west. Today, the primary social and economic values of the Sierra Nevada landscape are in the amenities and ecological services provided by its wildlands and functioning ecosystems. Duane shows how further unfettered population growth threatens the very values which have made the Sierra Nevada a desirable place to live and work. A new approach to land use planning, resource management, and local economic development—one that recognizes the emerging values of the landscape—is necessary in order to achieve sustainable development, Duane claims. Weaving personal experience with outstanding scholarship, he shows how such an approach must explicitly recognize the importance of values and the application of an environmental land ethic to future development in the area.

Different Travellers, Different Eyes Peter Wild

2001 The early American West has been depicted in art as a land of harsh struggles, a place of heavenly miracles, and everything in between. *Different Travellers, Different Eyes* records impressions of life on the nineteenth-and early twentieth-century American frontier by twenty-one artists better known for their paintings, sculptures, and photographs. Most but not all the selections come from journals or diaries kept during trips to the West. Thomas Moran, for instance, notes what others must have felt, that "the impression then made upon me by the stupendous and remarkable manifestations of nature's forces will remain with me as long as memory lasts." That impression of grandeur echoes the vast and dramatic canvasses Moran created on his trips west. *Different Travellers, Different Eyes* is not

an art-history book. The narrators are not art historians. Their works adorn the walls of museums, fill the pages of art books, fetch large sums at auction, and (as reproductions) illustrate histories of the early American West. Chances are slim, however, that the casual reader has read a word these artists wrote. This gathering brings the best of this literary art out of the shadows.

Messages from Frank's Landing Charles Wilkinson 2006 "Billy Frank, Jr., has been celebrated as a visionary, but if we go deeper and truer, we learn that he is best understood as a plainspoken bearer of traditions, a messenger, passing along messages from his father, from his grandfather, from those further back, from all Indian people, really. They are messages about the natural world, about societies past, about this society, and about societies to come. When examined rigorously - not out of any romanticism but only out of our own enlightened self-interest - these messages can be of great practical use to us in this and future years." - Charles Wilkinson, from the Introduction In 1974 Federal Judge

George H. Boldt issued one of the most sweeping rulings in the history of the Pacific Northwest, affirming the treaty rights of Northwest tribal fishermen and allocating to them 50 percent of the harvestable catch of salmon and steelhead. Among the Indians testifying in Judge Boldt's courtroom were Nisqually tribal leader Billy Frank, Jr., and his 95-year-old father, whose six acres along the Nisqually River, known as Frank's Landing, had been targeted for years by state game wardens in the so-called Fish Wars. By the 1960s the Landing had become a focal point for the assertion of tribal treaty rights in the Northwest. It also lay at the moral center of the tribal sovereignty movement nationally. The confrontations at the Landing hit the news and caught the conscience of many. Like the schoolhouse steps at Little Rock, or the bridge at Selma, Frank's Landing came to signify a threshold for change, and Billy Frank, Jr., became a leading architect of consensus, a role

he continues today as one of the most colorful and accomplished figures in the modern history of the Pacific Northwest. In Messages from Frank's Landing, Charles Wilkinson explores the broad historical, legal, and social context of Indian fishing rights in the Pacific Northwest, providing a dramatic account of the people and issues involved. He draws on his own decades of experience as a lawyer working with Indian people, and focuses throughout on Billy Frank and the river flowing past Frank's Landing. In all aspects of Frank's life as an activist, from legal settlements negotiated over salmon habitats destroyed by hydroelectric plants, to successful negotiations with the U.S. Army for environmental protection of tribal lands, Wilkinson points up the significance of the traditional Indian world view - the powerful and direct legacy of Frank's father, conveyed through generations of Indian people who have crafted a practical working philosophy and a way of life. Drawing on many hours spent talking and

laughing with Billy Frank while canoeing the Nisqually watershed, Wilkinson conveys words of respect and responsibility for the earth we inhabit and for the diverse communities the world encompasses. These are the messages from Frank's Landing. Wilkinson brings welcome clarity to complex legal issues, deepening our insight into a turbulent period in the political and environmental history of the Northwest. "The Boldt decision profoundly changed natural resource management in the Pacific Northwest. This book clearly builds an historical base to help guide us today. The wisdom and patience of Billy Frank fill virtually every page. It is required reading for anyone interested in salmon preservation." - Governor Daniel J. Evans "Charles Wilkinson evokes the character and culture of the Nisqually people as well as their deep love for their land. From Chief Leschi to Billy Frank, we see the long thread of cultural continuity, culminating in modern times with this fight for justice." - Ada Deer (Menominee),

University of Wisconsin-Madison Charles Wilkinsonis Moses Lasky Professor of Law at the University of Colorado, Boulder. He is the author of *Fire on the Plateau: Conflict and Endurance in the American Southwest* and numerous other books, including standard texts on Indian and Federal public land law.

[Handbook for Research in American History](#)

Francis Paul Prucha 1994-01-01 When the Handbook for Research in American History was first published, reviewers called it "an excellent tool for historians of all interests and levels of experience . . . simple to use, and concisely worded" (*Western Historical Quarterly*) and "an excellent work that fulfills its title in being portable yet well-filled" (*Reference Reviews*). The *Journal of American History* added, "It is not easy to produce a reference work that is utilitarian and enriching and does not duplicate existing works. Professor Prucha has done the job very well." This second, revised edition takes account of the revolution that is occurring in

bibliographic science as printed reference works extend to electronic databases, CD-ROMs, and online networks such as the Internet. Focusing on and expanding the major section of the original Handbook, it provides information on traditional printed works, describes new guides and updated versions of old ones, notes the availability of reference works and of some full-text sources in electronic form, and discusses the usefulness to researchers of different kinds of material and the forms in which they are available. Extensive cross-referencing and a detailed index that includes authors, subjects, and titles enhance the book's usefulness.

Wyoming History Journal 1990

The Mountainous West William Wyckoff
1995-01-01 Traditional interpretations of the American West have concentrated on the importance of its aridity to the region's cultural evolution and development. But the West is marked by a second fact of physical geography that distinguished it (from the experiences of

settlers) from the east. As pioneers struggled with the climate west of the hundredth meridian, they were also confronted by mountains strewn across the region and offering their own set of limitations and opportunities. This volume focuses on these green islands of the Mountainous West that have witnessed patterns of settlement and development distinct from their lowland neighbors. In thirteen essays, the contributors address the mountains by means of five themes: the mountains as barriers to movement, islands of moisture, a zone of concentrated resources, an area of government control, and a restorative sanctuary. The focus ranges from California's Sierra Nevada to the Rocky Mountains of Colorado, Utah, and Montana. William K. Wyckoff is an associate professor, Department of Earth Sciences, Montana State University. He is the author of *The Developer's Frontier: The Making of the Western New York Landscape* and of articles in many journals, including *The California*

Geographer, Social Science Journal, Geographical Review, and Journal of Historical Geography. Lary M. Dilsaver is a professor in the Department of Geology and Geography, University of South Alabama. The author, with William Tweed, of Challenge of the Big Trees: A Resource History of Sequoia and Kings Canyon National Parks, he has also written articles in journals such as Geographical Review, Annals of Tourism Research, and Yearbook of the Association of Pacific Coast Geographers.
