La Belle James E. Bruseth 2017-03-03 In 1995, Texas Historical Commission underwater archaeologists discovered the wreck of La Salle's La Belle, remnant of an ill-fated French attempt to establish a colony at the mouth of the Mississippi River that landed instead along today's Matagorda Bay in Texas. During 1996-1997, the Commission uncovered the ship's remains under the direction of archaeologist James E. Bruseth and employing a team of archaeologists and volunteers. Amid the shallow waters of Matagorda Bay, a steel cofferdam was constructed around the site, creating one of the most complex nautical archaeological excavations ever attempted in North America and allowing the archaeologists to excavate the sunken wreck much as if it were located on dry land. The ship's hold was discovered full of everything the would-be colonists would need to establish themselves in the New World; more than 1.8 million artifacts were recovered from the site. More than two decades in the making, due to the immensity of the find and the complexity of cataloging and conserving the artifacts, this book thoroughly documents one of the most significant North American archaeological discoveries of the twentieth century.

Jackson's Hallmarks Ian Pickford 2015-10 Since first published in 1991 Pocket Jackson's, as it is most often called, has enjoyed enormous success and is constantly rated as a best seller in the Arts and Antiques category. During the last twenty three years important developments have taken place in the Hallmarking system. Most notably the introduction within Europe of a universally accepted system of marking has led not only to the addition of new marks, but also, to a change of status of several historic marks. This edition brings up to the present day all the date letters and commemorative marks. It also includes the recently introduced marks for Palladium and a section illustrating the Assay Office identification marks of those countries that are signatories to the International Convention marking system. In addition and of importance are the changes made in the early cycles of Dublin date letters which result from recent research by silver scholars in Ireland. AUTHOR: Ian Pickford was born and educated in London and is a Freeman of both the Worshipful Company of Goldsmiths and the City of London and a member of the panel of advisors on Antique Plate (Re: - Fakes and Forgeries) to the Goldsmiths Hall. He is the author of 'Silver Flatware: English, Irish and Scottish, 1660-1980', and editor of 'Jackson's Silver and Gold Marks of England, Scotland and Ireland', both published by the Antique Collectors' Club. Silver in England Philippa Glanville 2013-11-05 First Published in 2005. Silver is unique among the decorative arts in that its raw material is both inherently valuable and infinitely reusable. Its ownership has been a social bench-mark and its form has exercised the skills of sculptors, designers, chasers and engravers, but ultimately it could be, and normally was, melted down and refashioned quite without sentiment. Because of this constant recycling, the survival of any individual object is quite random and unrelated to its uniqueness or otherwise in its period. Hitherto plate historians have focused on individual objects almost to the exclusion of the context - social or economic - from which they came but now that context is seen as crucial in understanding historic plate. So in the first section of this book each chapter considers contemporary attitudes and usage.

Feeding Desire Sarah Coffin 2006 Eating is a social ritual. From dinner dates to everyday suppers, casual picnics to lavish feasts, dining brings people together for far more than satisfying the needs of the body. For centuries, cutlery has served as extensions of our hands, enriching how we experience food and the act of eating. Knives, forks, and spoons come between hand and mouth, articulating the experience of dining. Accompanying an exhibition at the Smithsonian's Cooper-Hewitt, National Design Museum (May 5 - October 29, 2006), Feeding Desire is the first book to showcase the Museum's astonishing permanent collection of American and European cutlery. Complementing and expanding on the content of the exhibition, seven original essays, accompanied by over two hundred lavish color and black-and-white illustrations, relate the surprisingly different histories of the knife, spoon, and fork, and reveal how cutlery has influenced food, fashion, design, mobility, hygiene, and consumption over the centuries. In addition, Feeding Desire looks toward the future of the tools of the table as we progress into the twenty-first century. *Catalogue of Silver in the Grosvenor Museum, Chester* P. J. Boughton 2000 The Grosvenor Museum's silver has been described by Country Life as "one of the country's finest collections". Its greatest strength is Chester hallmarked, between c.1570 and 1992, spanning a wide range of uses. After the collection's growth is set in the historical context of the developing scholarship of the subject, each piece is illustrated, described in detail and with a full background of the design evolution, its maker and ownership. An essential work of reference for all collectors and a rich source for students of the decorative arts and history of silver.
