A Parisienne in Chicago Madame Léon Grandin 2010 This fascinating account of a French woman's impressions of America in the late nineteenth century reveals an unusual cross-cultural journey through fin de siècle Paris, Chicago, and New York. Madame Leon Grandin's travels and extended stay in Chicago in 1893 were the result of her husband's collaboration on the fountain sculpture for the World's Columbian Exposition. Initially impressed with the city's fast pace and architectural grandeur, Grandin's attentions were soon drawn to its social and cultural customs, reflected as observations in her writing. During a ten-month interval as a

resident, she was intrigued by the interactions between men and women, mothers and their children, teachers and students, and other human relationships, especially noting the comparative social freedoms of American women. After this interval of acclimatization, the young Parisian socialite had begun to view her own culture and its less liberated mores with considerable doubt. "I had tasted the fruit of independence, of intelligent activity, and was revolted at the idea of assuming once again the passive and inferior role that awaited me!" she wrote. Grandin's curiosity and interior access to Chicago's social and domestic spaces produced an unusual travel narrative that goes beyond the usual tourist reactions and provides a valuable resource for readers interested in late nineteenth-century America, Chicago, and social commentary. Significantly, her feminine views on American life are in marked contrast to parallel reflections on the culture by male visitors from abroad. It is precisely the dual

narrative of this text--the simultaneous recounting of a foreigner's impressions, and the consequent questioning of her own cultural certainties--that make her book unique. This translation includes an introductory essay by Arnold Lewis that situates Grandin's account in the larger context of European visitors to Chicago in the 1890s.

American Bandstand John Jackson 1999-06-03 "I don't make culture, I sell it" Dick Clark once

remarked. Indeed, the man who reigned as host of American Bandstand for nearly four decades may not have invented rock 'n' roll, but he sold it to the American public better than anyone before or since. Before Clark, rock 'n' roll was the step child of radio--which took to playing records as a cost-saving measure after television siphoned off radios most lucrative sponsors. But it was network television--and specifically Clarks Bandstand--that ultimately legitimized what was then viewed by most adults as vulgar, low-class music, broadcasting a sanitized vision of rock 'n' roll straight into Americas living rooms five afternoons a week. Here is the first book to tell the full story of what happened in front of--and behind--the cameras on Dick Clark's American Bandstand, providing both a history of this landmark show and of the changing styles of rock 'n' roll over four decades. Based on extensive interviews with music business figures, recording stars, and Clark himself, and featuring dozens of rare or never before

published photographs, this is a riveting and uncensored account of a show that managed to survive countless revolutions in popular music. Jackson describes Bandstands humble beginnings in Philadelphia's blue collar south side, the sex scandal that scuttled the first host of Bandstand and enabled Clark to launch his career, the glory days when an appearance on Bandstand was one of the most prized gigs in the music business and when teenagers lined up for blocks hoping to enter the studio, and memorable Bandstand appearances by rock 'n' roll royalty from Chubby Checker and Frankie Avalon, to Jerry Lee Lewis and Jefferson Airplane, to Pink Floyd and Madonna. Here as well is a candid look at the backstage financial maneuvering that allowed Clark to launch a video and entertainment empire worth nearly \$200 million dollars today. Voted Most Likely To Sell The Brooklyn Bridge by his high school classmates, Clark emerges as a cunning business impresario determined to make

millions. Readers learn how Clark decided which eager young singers would appear on the show, how he managed to survive a 1959 Congressional payola investigation that destroyed the careers of many other popular disc jockeys, how much money he earned from his personal financial investments in many of the songs played on Bandstand, and his importance to ABC in its fledgling days as a national television network. As entertaining as it is eye-opening, Dick Clark's American Bandstand will bring back a flood of memories to everyone who lived through that era. It will fascinate everyone interested in popular American culture or in rock 'n' roll history.

Henry Ives Cobb's Chicago Edward W. Wolner 2011-06-30 When championing the commercial buildings and homes that made the Windy City famous, one can't help but mention the brilliant names of their architects—Daniel Burnham, Louis Sullivan, and Frank Lloyd Wright, among others. But few people are aware of Henry Ives

Cobb (1859-1931), the man responsible for an extraordinarily rich chapter in the city's turn-of-the-century building boom, and fewer still realize Cobb's lasting importance as a designer of the private and public institutions that continue to enrich Chicago's exceptional architectural heritage. Henry Ives Cobb's Chicago is the first book about this distinguished architect and the magnificent buildings he created, including the Newberry Library, the Chicago Historical Society, the Chicago Athletic Association, the Fisheries Building for the 1893 World's Fair, and the Chicago Federal Building. Cobb filled a huge institutional void with his inventive Romanesque and Gothic buildings—something that the other architect-giants, occupied largely with residential and commercial work, did not do. Edward W. Wolner argues that these constructions and the enterprises they housed—including the first buildings and master plan for the University of Chicago—signaled that the city had come of age,

that its leaders were finally pursuing the highest ambitions in the realms of culture and intellect. Assembling a cast of colorful characters from a free-wheeling age gone by, and including over 140 images of Cobb's most creative buildings, Henry Ives Cobb's Chicago is a rare achievement: a dynamic portrait of an architect whose institutional designs decisively changed the city's identity during its most critical phase of development.

2010-06-05 Jewelry responds to our most primitive urges, for control, honor, and sex. It is at once the most ancient and most immediate of art forms, one that is defined by its connection and interaction with the body. In this sense it is inescapably political, its meaning bound to the possibilities of the body it lies on. Indeed, the

fate of the body is often bound to the jewelry. This study looks at gender and jewelry in order to gain some understanding into how jewelry is constructed by and constructs not just a single society, but human societies. It will explore how societal traditions that have sprung up around jewelry and ornamentation have affected the possibilities available to women across a broad spectrum of social and ethnic circumstances, determining which have served women well and which are constrictive and destructive. It also examines the possibilities for the intentional creation of feminist jewelry, including an overview of the author's own work.
