The Norse Sorceress Leszek Gardela 2023-08-31 Old Norse literature abounds with descriptions of magic acts that allow ritual specialists of various kinds to manipulate the world around them, see into the future or the distant past, change weather conditions, influence the outcomes of battles, and more. While magic practitioners are known under myriad terms, the most iconic of them is the völva. As the central figure of the famous mythological poem *Völuspá* (The Prophecy of the Völva), the völva commands both respect and fear. In non-mythological texts similar women are portrayed as crucial albeit somewhat peculiar members of society. Always veiled in mystery, the völur and their kind have captured the academic and popular imagination for centuries. Bringing together scholars from various disciplinary backgrounds, this volume aims to provide new insights into the reality of magic and its agents in the Viking world, beyond the pages of medieval texts. It explores new trajectories for the study of past mentalities, beliefs, and rituals as well as the tools employed in these practices and the individuals who wielded them. In doing so, the volume engages with several topical issues of Viking Age research, including the complex entanglements of mind and materiality, the cultural attitudes to animals and the natural world, and the cultural constructions of gender and sexuality. By addressing these complex themes, it offers a nuanced image of the völva and related magic workers in their cultural context. The volume is intended for a broad, diverse, and international audience, including experts in the field of Viking and Old Norse studies but also various non-professional history enthusiasts. The Norse Sorceress: Mind and Materiality in the Viking World is a key output of the project *Tanken bag Tingene* (Thoughts behind Things) conducted at the National Museum of Denmark from 2020 to 2023 and funded by the Krogager Foundation.

The Adorned Body Nicholas Carter 2020-09-01 How we dress our bodies—through clothing, footwear, headgear, jewelry, haircuts, and more—is key to the expression of status and identity. This idea was as true for ancient Maya civilization as it is today, yet few studies have centered on what ancient Maya peoples wore and why. In *The Adorned Body*, Nicholas Carter, Stephen Houston, and Franco Rossi bring together contributions from a wide range of scholars, leading to the first in-depth study of Maya dress in pre-Columbian times. Incorporating artistic, hieroglyphic, and archaeological sources, this book explores the clothing and ornaments of ancient Maya peoples, systematically examining who wore what, deducing the varied purposes and meanings of dress items and larger ensembles, and determining the methods and materials with which such items were created. Each essay investigates a category of dress—including headgear, pendants and necklaces, body painting, footwear, and facial ornaments—and considers the variations within each of these categories, as well as popular styles and trends through time. The final chapters reveal broader views and comparisons about costume ensembles and their social roles. Shedding new light on the art and archaeology of the ancient Americas, *The Adorned Body* offers a thorough map of Maya dress that will be of interest to scholars and fashion enthusiasts alike.

Red Man's America Ruth Murray Underhill 2018-12-14 Red Man's America meets the great need for a comprehensive study of Indian societies from the first Stone Age hunters to the American citizens of today. Beginning with the first migrations of primitive man from Siberia in the Old World to Alaska in the New, probably during the latter part of the Pleistocene glaciations, and his subsequent migration southward and eastward, the author takes up in turn the tribes and cultures of the various regions of North America. The material Professor Underhill has gathered from the fields of archaeology, ethnology, and history, together with that drawn from her own experience in the United States Indian Service, produces a fascinating narrative. *Red Man's America* is an important contribution to our heritage of Indian life and lore. "A work for which both sociologist and historian will be forever grateful. The author has combined a long period of study with actual field work in the service of the Indian to produce a work that gives a brief, but well written and accurate, sketch of the origins, backgrounds, and customs of the various North American tribes. . . . There is no other modern single volume that contains as much information on the subject."—E.R. Vollmar, *The Historical Bulletin* "Liveliness in style and illustration, together with perspicacity in content, makes this book a useful introduction to the civilization of the original inhabitants of the land."—*Pacific Historical Review*

Asia's Maritime Bead Trade Peter Francis 2002-01-01 This fascinating study is the first detailed description of the ancient and enduring trade in beads that spans more than two millennia and once stretched from the Middle East to East Asia and affected areas as far apart as West Africa and the American Pacific coast. Beads are universal and among the earliest art forms. Made of glass, semiprecious stone, or precious organic materials such as amber and coral, they were ubiquitous in the ancient world, serving as decorations, magical charms, mnemonic and counting devices, symbols of wealth and status. Much of the ancient bead trade was incorporated in Asian maritime commerce, and many of the beads involved have Asian origins. Peter Francis, Jr., a pioneer in bead studies, incorporates firsthand knowledge of beads and beadmaking in the field with years of solid, scholarly research, effectively eliminating much of the hearsay and speculation that so often characterizes works on beads. In addition to the production, use, and provenance of beads, he examines the importance of the bead trade for the economies of the countries involved and provides insights into the lives of its many participants: artisans, mariners, and merchants. He covers the widely-dispersed Indo-Pacific beads (sometimes called Trade Wind beads or mutisalah), Chinese glass beads, Middle Eastern glass beads, Indian stone beads, heirloom beads in Southeast Asia and Micronesia, and other minor beads and bead industries involved in the trade.

Every project highlights the beads' exciting colors, shapes, sizes, and textures.
