The Routledge Companion to Applied Musicology Chris Dromey 2023-09-19
The Routledge Companion to Applied Musicology brings together academics, artist-researchers, and practitioners to provide readers with an extensive and authoritative overview of applied

musicology. Once a field that addressed music's socio-political or performative contexts, applied musicology today encompasses study and practice in areas as diverse as psychology, ecomusicology, organology, forensic musicology, music therapy, health and well-being, and other public-oriented musicologies. These rapid advances have created a fast-changing field whose scholarship and activities tend to take place in isolation from each other. This volume addresses that shortcoming, bringing together a wide-ranging survey of current approaches. Featuring 39 authors, *The Routledge Companion to Applied Musicology* falls into five parts—Defining and Theorising Applied Musicology; Public Engagement; New Approaches and Research Methods; Representation and Inclusion; and Musicology in/for Performance—that chronicle the subject's rich history and consider the connections that will characterise its future. The

book offers an essential resource for anyone exploring applied musicology.

Who Is Allah? Bruce B.

Lawrence 2015-04-06 This vivid introduction to the heart

of Islam offers a unique approach to understanding

Allah, the central focus of Muslim religious expression.

Drawing on history, culture, theology, politics, and the

media, Bruce B. Lawrence identifies key religious

practices by which Allah is revered and remembered,

illuminating how the very name of Allah is interwoven into the

everyday experience of millions of Muslims. For Muslims, as for adherents of other religions, intentions as well as practices are paramount in one's religious life. Lawrence elucidates how public utterances, together with private pursuits, reflect the emotive, sensory, and intellectual aspirations of the devout. Ranging from the practice of the tongue (speaking) to practices in cyberspace (online religious activities), Lawrence explores how Allah is invoked, defined, remembered, and also debated. While the practice of the heart demonstrates how Allah is remembered in Sufism, the mystical branch of Islam, the practice of the mind examines how theologians and philosophers have defined Allah in numerous contexts, often with conflicting aims. The practice of the ear marks the contemporary period, in which Lawrence locates and then assesses competing calls for jihad, or religious struggle, within the cacophony of an immensely diverse umma, the

worldwide Muslim community. *Current Awareness Abstracts* 1995

Meteorites, Comets, and Planets A.M. Davis 2005-11-21

Volume 1 provides a broad overview of the chemistry of the solar system. It includes chapters on the origin of the elements and solar system abundances, the solar nebula and planet formation, meteorite classification, the major types of meteorites, important processes in early solar system history, geochemistry of the terrestrial planets, the giant planets and their satellite, comets, and the formation and early differentiation of the Earth. This volume is intended to be the first reference work one would consult to learn about the chemistry of the solar system. Reprinted individual volume from the acclaimed *Treatise on Geochemistry* (10 Volume Set, ISBN 0-08-043751-6, published in 2003)
