The Lives and Deaths of Shelter Animals Katja M Guenther 2020-08-18 "By investigating the . . . connection between the . . . shelter and the community . . . vastly expands . . . notions of intersectionality, democracy, and inclusivity."
—Leslie Irvine, *American Journal of Sociology*
Monster is an adult pit bull, muscular and grey,

who is impounded in a large animal shelter in Los Angeles. Like many other dogs at the shelter, Monster is associated with marginalized humans and assumed to embody certain behaviors because of his breed. And like approximately one million shelter animals each year, Monster will be killed. *The Lives and Deaths of Shelter Animals* takes us inside one of

the country's highest-intake animal shelters. Katja M. Guenther witnesses the dramatic variance in the narratives assigned different animals, including Monster, which dictate their chances for survival. She argues that these inequalities are powerfully linked to human ideas about race, class, gender, ability, and species. Guenther deftly explores internal hierarchies, breed discrimination, and importantly, instances of resistance and agency. "Powerful and timely. . . . Katja M. Guenther unlocks the shelter door and eloquently explains this complicated and contested multispecies space, as she reflects on issues such as witnessing, vulnerability, advocacy, grievability, compassion, and animal resistance." —Carol J. Adams, author of *The Sexual Politics of Meat* "In this compassionate, incisive ethnography . . . Katja M. Guenther illuminates the entangled injustices that shape human relationships with other animals." —Lori Gruen, author of *Entangled Empathy* "With the perfect balance of

intimacy and analytical depth, the author reminds us of how messy things can get when caring and killing become one, or when the value of the animal companion's life is measured by the race, gender, and zip code of the owner." —Bénédicte Boisseron, author of *Afro-Dog*
The Lives of Animals J. M. Coetzee 2000
The Book that Made Me Judith Ridge 2017-03-14 Essays by popular children's authors reveal the books that shaped their personal and literary lives, explaining how the stories they loved influenced them creatively, politically, and intellectually.

Philosophy and Animal Life Stanley Cavell 2009-12-22 This groundbreaking collection of contributions by leading philosophers offers a new way of thinking about animal rights, our obligation to animals, and the nature of philosophy itself.
[The Lives of Animals](#) J. M. Coetzee 2001-05-06 The idea of human cruelty to animals so consumes novelist Elizabeth Costello in her later

years that she can no longer look another person in the eye: humans, especially meat-eating ones, seem to her to be conspirators in a crime of stupefying magnitude taking place on farms and in slaughterhouses, factories, and laboratories across the world. Costello's son, a physics professor, admires her literary achievements, but dreads his mother's lecturing on animal rights at the college where he teaches. His colleagues resist her argument that human reason is overrated and that the inability to reason does not diminish the value of life; his wife denounces his mother's vegetarianism as a form of moral superiority. At the dinner that follows her first lecture, the guests confront Costello with a range of sympathetic and skeptical reactions to issues of animal rights, touching on broad philosophical, anthropological, and religious perspectives. Painfully for her son, Elizabeth Costello seems offensive and flaky, but--dare he admit it?--strangely on target. Here the internationally

renowned writer J. M. Coetzee uses fiction to present a powerfully moving discussion of animal rights in all their complexity. He draws us into Elizabeth Costello's own sense of mortality, her compassion for animals, and her alienation from humans, even from her own family. In his fable, presented as a Tanner Lecture sponsored by the University Center for Human Values at Princeton University, Coetzee immerses us in a drama reflecting the real-life situation at hand: a writer delivering a lecture on an emotionally charged issue at a prestigious university. Literature, philosophy, performance, and deep human conviction--Coetzee brings all these elements into play. As in the story of Elizabeth Costello, the Tanner Lecture is followed by responses treating the reader to a variety of perspectives, delivered by leading thinkers in different fields. Coetzee's text is accompanied by an introduction by political philosopher Amy Gutmann and responsive essays by religion scholar Wendy Doniger,

primatologist Barbara Smuts, literary theorist Marjorie Garber, and moral philosopher Peter Singer, author of *Animal Liberation*. Together the lecture-fable and the essays explore the palpable social consequences of uncompromising moral conflict and confrontation.

Animal Wisdom Linda Bender 2014-06-10 How is it that pets are able to travel thousands of miles through unknown territory to reunite with their beloved humans? How can dogs detect cancer with up to a 98 percent accuracy rate, and foresee epileptic or diabetic seizures in their owners? How do animals seem to know an earthquake is coming long before the world's best seismologists? In *Animal Wisdom*, veterinarian and animal advocate Linda Bender offers a wealth of amazing stories and research-based evidence indicating animals have deeply perceptive—even extrasensory—abilities. She shows us that animals are extremely perceptive, intuitive, and psychic and provides step-by-step

practices for honing your natural ability to communicate with them, so that you too can learn to understand their urgent messages about peace, happiness, and the future of the planet. *Animal Wisdom* is for animal lovers and anyone who seeks a deeper, more spiritual connection to these beautiful creatures. The Political Lives of Victorian Animals Anna

Feuerstein 2019-07-04 Examines how liberal thought influenced representations of animals within nineteenth-century animal welfare discourse and the Victorian novel.

The Emotional Lives of Animals Marc Bekoff 2010-10-05 Based on award-winning scientist Marc Bekoff's years studying social communication in a wide range of species, this important book shows that animals have rich emotional lives. Bekoff skillfully blends extraordinary stories of animal joy, empathy, grief, embarrassment, anger, and love with the latest scientific research confirming the existence of emotions that common sense and experience have long implied. Filled with Bekoff's light humor and touching stories, *The Emotional Lives of Animals* is a clarion call for reassessing both how we view animals and how we treat them.

to engage reluctant readers! What happens when a young elephant steps on a buried land mine? What happens when a sea turtle's flipper is injured by a predator? Thanks to recent advances in technology, we have new ways to design and build prosthetic body parts that can help these animals thrive. Meet an Asian elephant named Mosha, a Kemp's ridley sea turtle named Lola, a German Shepherd named Cassidy, a greylag goose named Vitória, and Pirate, a Berkshire-Tamworth pig. Each of these animals was struggling, but through a variety of techniques and technologies, humans created devices that enabled the animals to live and move more comfortably. Discover the stories of how veterinarians, doctors, and even students from around the world used 3D printing and other techniques to build bionic body parts for these amazing animals.

Second Nature Jonathan Balcombe 2010-03-16 For centuries we believed that humans were the only ones that mattered. The idea that animals

had feelings was either dismissed or considered heresy. Today, that's all changing. New scientific studies of animal behavior reveal perceptions, intelligences, awareness and social skills that would have been deemed fantasy a generation ago. The implications make our troubled relationship to animals one of the most pressing moral issues of our time. Jonathan Balcombe, animal behaviorist and author of the critically acclaimed *Pleasurable Kingdom*, draws on the latest research, observational studies and personal anecdotes to reveal the full gamut of animal experience—from emotions, to problem solving, to moral judgment. Balcombe challenges the widely held idea that nature is red in tooth and claw, highlighting animal traits we have disregarded until now: their nuanced understanding of social dynamics, their consideration for others, and their strong tendency to avoid violent conflict. Did you know that dogs recognize unfairness and that rats practice random acts of kindness? Did you know

that chimpanzees can trounce humans in short-term memory games? Or that fishes distinguish good guys from cheaters, and that birds are susceptible to mood swings such as depression and optimism? With vivid stories and entertaining anecdotes, Balcombe gives the human pedestal a strong shake while opening the door into the inner lives of the animals themselves.

Personalities on the Plate Barbara J. King
2017-03-15 "Rooted in the latest science, and built on a mix of firsthand experience (including entomophagy, which, yes, is what you think it is) and close engagement with the work of scientists, farmers, vets, and chefs, *Personalities on the Plate* is an unforgettable journey through the world of animals we eat."--Dust jacket.

“The Inner Life of Animals will rock your world.
This book shows us that animals think, feel and
know in much the same way as we do.”—Sy
Montgomery, bestselling author of *The Soul of
an Octopus* Through vivid stories of devoted
pigs, two-timing magpies, and scheming
roosters, *The Inner Life of Animals* weaves the
latest scientific research into how animals
interact with the world with Peter Wohlleben's
personal experiences in forests and fields. We
learn that horses feel shame, deer grieve, and
goats discipline their kids. Ravens call their
friends by name, rats regret bad choices, and
butterflies choose the very best places for their
children to grow up. In this captivating book,
Peter Wohlleben follows the hugely successful
The Hidden Life of Trees with insightful stories
into the emotions, feelings, and intelligence of

animals around us. Animals are different from us
in ways that amaze us—and they are also much
closer to us than we ever would have thought.

Among Animals Diane Lefer 2014-02-01
Stories that affirm the indelible bond among
humans and animals The relationships among
human and non-human animals go back to the
beginning of time—and the ways in which these
relationships have evolved (and sometimes not)
is the inspiration for this collection of
contemporary short fiction, penned by writers
from across the globe. This diverse collection of
stories explores the ways in which we live

among—and often in conflict with—our non-human counterparts. These stories feature animals from the familiar (dogs and cats) to the exotic (elands and emus), and in these stories animals are both the rescuers and the rescued. Within these pages are glimpses of the world through the eyes of a zookeeper, a shelter worker, a penguin researcher, and a neighborhood stray, among many others—all highlighting the ways in which animals and humans understand and challenge one another. *Among Animals* is a dynamic collection of stories from the world's most gifted contemporary authors—those who pay close attention to the creatures with whom we share our planet, and who inspire us to pay closer attention as well. *Public and Private Life of Animals* P.-J. When Elephants Weep Jeffrey Moussaieff Masson 2009-10-21 This national bestseller exploring the complex emotional lives of animals was hailed as "a masterpiece" by Elizabeth Marshall Thomas and as "marvelous" by Jane Goodall. The popularity of *When Elephants Weep* has swept the nation, as author Jeffrey Masson appeared on Dateline NBC, Good Morning America, and was profiled in *People* for his ground-breaking and fascinating study. Not since Darwin's *The Expression of Emotions in Man and Animals* has a book so thoroughly and effectively explored the full range of emotions that exist throughout the animal kingdom. From dancing squirrels to bashful gorillas to spiteful killer whales, Masson and coauthor Susan McCarthy bring forth fascinating anecdotes and illuminating insights that offer powerful proof of the existence of animal emotion. Chapters on love, joy, anger, fear, shame, compassion, and loneliness are framed by a provocative re-

evaluation of how we treat animals, from hunting and eating them to scientific experimentation. Forming a complete and compelling picture of the inner lives of animals, *When Elephants Weep* assures that we will never look at animals in the same way again. [A Foray into the Worlds of Animals and Humans](#) Jakob von Uexküll 2013-11-30 “Is the tick a machine or a machine operator? Is it a mere object or a subject?” With these questions, the pioneering biophilosopher Jakob von Uexküll embarks on a remarkable exploration of the unique social and physical environments that individual animal species, as well as individuals within species, build and inhabit. This concept of the *umwelt* has become enormously important within posthumanist philosophy, influencing such figures as Heidegger, Merleau-Ponty, Deleuze and Guattari, and, most recently, Giorgio Agamben, who has called Uexküll “a high point of modern antihumanism.” A key document in the genealogy of posthumanist

thought, *A Foray into the Worlds of Animals and Humans* advances Uexküll’s revolutionary belief that nonhuman perceptions must be accounted for in any biology worth its name; it also contains his arguments against natural selection as an adequate explanation for the present orientation of a species’ morphology and behavior. *A Theory of Meaning* extends his thinking on the *umwelt*, while also identifying an overarching and perceptible unity in nature. Those coming to Uexküll’s work for the first time will find that his concept of the *umwelt* holds new possibilities for the terms of animality, life, and the framework of biopolitics.

Do Unto Animals Tracey Stewart 2015-10-20 #1 New York Times bestseller and USA Today bestseller The more we know about the animals in our world and the better we care for them, the better our lives will be. Former veterinary technician and animal advocate Tracey Stewart understands this better than most—and she’s on a mission to change how we interact with

animals. Through hundreds of charming illustrations, a few homemade projects, and her humorous, knowledgeable voice, Stewart provides insight into the secret lives of animals and the kindest ways to live with and alongside them. At home, she shows readers how to speak “dog-ese” and “cat-ese” and how to “virtually adopt” an animal. In the backyard, we learn about building bee houses, dealing nicely with pesky moles, and creative ways to bird-watch. And on the farm, Stewart teaches us what we can do to help all farm animals lead a better life (and reveals pigs’ superpowers!). Part practical guide, part memoir of her life with animals, and part testament to the power of giving back, *Do Unto Animals* is a gift for animal lovers of all stripes.

Animal Cognition Clive L. D. Wynne
2002-03-08 Covering a wide range of key topics, from reasoning and communication to sensation and complex problem-solving, this engagingly-written text presents a comprehensive survey of

contemporary research on animal cognition. Written for anyone with an interest in animal cognition, but without a background in animal behavior, it endeavors to explain what makes animals tick.

The Wounded Animal Stephen Mulhall 2009

Our Wild Calling Richard Louv 2020-11-10 “A book that offers hope.” —The New York Times Book Review “A wondrous tapestry.” —Carl Safina, author of *Beyond Words: What Animals Think and Feel* Audubon Medal winner Richard Louv’s landmark book *Last Child in the Woods* inspired an international movement to connect children and nature. Now he redefines the future of human-animal coexistence. In *Our Wild Calling*, Louv interviews researchers,

theologians, wildlife experts, indigenous healers, psychologists, and others to show how people are connecting with animals in ancient and new ways, and how this serves as an antidote to the growing epidemic of human loneliness; how dogs can teach children ethical behavior; how animal-assisted therapy may yet transform the mental health field; and what role the human-animal relationship plays in our spiritual health. He reports on wildlife relocation and on how the growing populations of wild species in urban areas are blurring the lines between domestic and wild animals. Our Wild Calling makes the case for protecting, promoting, and creating a sustainable and shared habitat for all creatures—not out of fear, but out of love.

The Divine Life of Animals Ptolemy Tompkins

2011-06-07 A journey through 20,000 years of history and myth in search of the answer to a single question: Do animals have souls? Anyone

who has ever mourned the loss of a cherished pet has wondered about the animal soul. Do animals survive the death of the body, or are they doomed to disappear completely when they leave this world behind? Both scientists and religious authorities have long scoffed at the idea of animals in heaven. Yet the question endures. In this wise, immensely readable book, Ptolemy Tompkins embarks on a quest for the answer—taking us on a top-speed tour of the history of the animal soul. Equally at home with mainstream and alternative spiritual philosophies, Tompkins takes us from the savannas of Africa to the earth's first cities to the early days of the great faith traditions of both East and West. Along the way, he shows that, despite what many of us have been taught, the world's various spiritual traditions all have profoundly meaningful things to say about the animal soul, if we simply know where to look. Rescuing these ancient insights and blending them with vivid stories about animals

today—from a dwarf rabbit named Angus to a manatee named Moose to a black bear named Little Bit—The Divine Life of Animals paints a gloriously inclusive picture of the cosmos as a place made up of both matter and spirit, in which animals are every bit as important, spiritually speaking, as the humans with whom they share the world. Though it is startlingly original, *The Divine Life of Animals* also feels strangely and instantly familiar, for it reveals truths that many of us have held in our hearts already, waiting only for someone to give fresh voice to one of the oldest and most trustworthy intuitions we possess. *The Divine Life of Animals* offers a compelling and timeless vision of the relationship between humans and animals that will have you looking at the animals in your life with new eyes.

The Radiant Lives of Animals Linda Hogan 2020-10-13
Winner of the (Inaugural) 2022 National Book Foundation Science + Literature Award
From a celebrated Chickasaw writer, a spiritual meditation, in prose and poetry, on our relationship to the animal world, in an illustrated gift package. Concerned that human lives and the natural world are too often defined by people who are separated from the land and its inhabitants, Indigenous writer and environmentalist Linda Hogan depicts her own intense relationships with animals as an example

we all can follow to heal our souls and reconnect with the spirit of the world. From her modest forest home in Colorado, and venturing throughout the region, especially to her beloved Oklahoma, she introduces us to horses, packrats, snakes, mountain lions, elks, wolves, bees, and so many others whose presence has changed her life. In this illuminating collection of essays and poems, lightly sprinkled with elegant drawings, Hogan draws on many Native nations' ancient stories and spiritual traditions to show us that the soul exists in those delicate places where the natural world extends into human consciousness—in the mist of morning, the grass that grew a little through the night, the first warmth of this morning's sunlight. Altogether, this beautifully packaged gift is a reverential reminder for all of us to witness and appreciate the radiant lives of animals.

The Case for Animal Rights Tom Regan 1983
THE argument for animal rights, a classic since its appearance in 1983, from the moral

philosophical point of view. With a new preface. **Elizabeth Costello** J. M. Coetzee 2017-03-07 J.M. Coetzee's latest novel, *The Schooldays of Jesus*, is now available from Viking. *Late Essays: 2006-2016* will be available January 2018. Since 1982, J. M. Coetzee has been dazzling the literary world. After eight novels that have won, among other awards, two Booker Prizes, and most recently, the Nobel Prize, Coetzee has once again crafted an unusual and deeply affecting tale. Told through an ingenious series of formal addresses, Elizabeth Costello is, on the surface, the story of a woman's life as mother, sister, lover, and writer. Yet it is also a profound and haunting meditation on the nature of storytelling.

The Animal Book Steve Jenkins 2013 The Caldecott Honor-winning author/illustrator of *What Do You Do With a Tail Like This?* offers a visual feast in this rich treasury that explores the world around us and the extraordinary creatures that we share it with. 50,000 first

[The Stage Lives of Animals](#) Una Chaudhuri 2016-10-04 *The Stage Lives of Animals* examines what it might mean to make theatre beyond the human. In this stunning collection of essays, Una Chaudhuri engages with the alternative modes of thinking, feeling, and making art offered by animals and animality, bringing insights from theatre practice and theory to animal studies as well as exploring what animal studies can bring to the study of theatre and performance. As our planet lives through what scientists call "the sixth extinction," and we become ever more aware of our relationships to other species, Chaudhuri takes a highly original look at the "animal imagination" of well-known plays, performances and creative projects, including works by: Caryl Churchill Rachel Rosenthal Marina Zurkow Edward Albee Tennessee Williams Eugene Ionesco Covering over a decade of explorations, a wide range of writers, and many urgent topics, this volume

demonstrates that an interspecies imagination deeply structures modern western drama.

The Humane Economy Wayne Pacelle

2016-04-19 A major new exploration of the economics of animal exploitation and a practical roadmap for how we can use the marketplace to promote the welfare of all living creatures, from the renowned animal-rights advocate Wayne Pacelle, President/CEO of the Humane Society of the United States and New York Times bestselling author of *The Bond*. In the mid-nineteenth century, New Bedford, Massachusetts was the whaling capital of the world. A half-gallon of sperm oil cost approximately \$1,400 in today's dollars, and whale populations were hunted to near extinction for profit. But with the advent of fossil fuels, the whaling industry collapsed, and today, the area around New Bedford is instead known as one of the best places in the world for whale watching. This transformation is emblematic of a new sort of economic revolution, one that has

the power to transform the future of animal welfare. In *The Humane Economy*, Wayne Pacelle, President/CEO of the Humane Society of the United States, explores how our everyday economic decisions impact the survival and wellbeing of animals, and how we can make choices that better support them. Though most of us have never harpooned a sea creature, clubbed a seal, or killed an animal for profit, we are all part of an interconnected web that has a tremendous impact on animal welfare, and the decisions we make—whether supporting local, not industrial, farming; adopting a rescue dog or a shelter animal instead of one from a “puppy mill”; avoiding products that compromise the habitat of wild species; or even seeing Cirque du Soleil instead of Ringling Brothers—do matter. *The Humane Economy* shows us how what we do everyday as consumers can benefit animals, the environment, and human society, and why these decisions can make economic sense as well.

Mercy For Animals Nathan Runkle 2017-09-12

A compelling look at animal welfare and factory farming in the United States from Mercy For Animals, the leading international force in preventing cruelty to farmed animals and promoting compassionate food choices and policies. Nathan Runkle would have been a fifth-generation farmer in his small midwestern town. Instead, he founded our nation's leading nonprofit organization for protecting factory farmed animals. In *Mercy For Animals*, Nathan brings us into the trenches of his organization's work; from MFA's early days in grassroots activism, to dangerous and dramatic experiences doing undercover investigations, to the organization's current large-scale efforts at making sweeping legislative change to protect factory farmed animals and encourage compassionate food choices. But this isn't just Nathan's story. *Mercy For Animals* examines how our country moved from a network of small, local farms with more than 50 percent of Americans involved in agriculture to a massive

coast-to-coast industrial complex controlled by a mere 1 percent of our population—and the consequences of this drastic change on animals as well as our global and local environments. We also learn how MFA strives to protect farmed animals in behind-the-scenes negotiations with companies like Nestlé and other brand names—conglomerates whose policy changes can save countless lives and strengthen our planet. Alongside this unflinching snapshot of our current food system, readers are also offered hope and solutions—big and small—for ending mistreatment of factory farmed animals. From simple diet modifications to a clear explanation of how to contact corporations and legislators efficiently, *Mercy For Animals* proves that you don't have to be a hardcore vegan or an animal-rights activist to make a powerful difference in the lives of animals.

Justice for Animals Martha C. Nussbaum
2023-01-03 A revolutionary new theory and call to action on animal rights, ethics, and law from

the renowned philosopher Martha C. Nussbaum. Animals are in trouble all over the world. Whether through the cruelties of the factory meat industry, poaching and game hunting, habitat destruction, or neglect of the companion animals that people purport to love, animals suffer injustice and horrors at our hands every day. The world needs an ethical awakening, a consciousness-raising movement of international proportions. In *Justice for Animals*, one of the world's most influential philosophers and humanists Martha C. Nussbaum provides a revolutionary approach to animal rights, ethics, and law. From dolphins to crows, elephants to octopuses, Nussbaum examines the entire animal kingdom, showcasing the lives of animals with wonder, awe, and compassion to understand how we can create a world in which human beings are truly friends of animals, not exploiters or users. All animals should have a shot at flourishing in their own way. Humans have a collective duty to face and solve animal

harm. An urgent call to action and a manual for change, Nussbaum's groundbreaking theory directs politics and law to help us meet our ethical responsibilities as no book has done before.

Wild Justice Marc Bekoff 2009-08-01 Scientists have long counseled against interpreting animal behavior in terms of human emotions, warning that such anthropomorphizing limits our ability to understand animals as they really are. Yet what are we to make of a female gorilla in a German zoo who spent days mourning the death of her baby? Or a wild female elephant who cared for a younger one after she was injured by a rambunctious teenage male? Or a rat who refused to push a lever for food when he saw that doing so caused another rat to be shocked? Aren't these clear signs that animals have recognizable emotions and moral intelligence? With *Wild Justice* Marc Bekoff and Jessica Pierce unequivocally answer yes. Marrying years of behavioral and cognitive research with

compelling and moving anecdotes, Bekoff and Pierce reveal that animals exhibit a broad repertoire of moral behaviors, including fairness, empathy, trust, and reciprocity. Underlying these behaviors is a complex and nuanced range of emotions, backed by a high degree of intelligence and surprising behavioral flexibility. Animals, in short, are incredibly adept social beings, relying on rules of conduct to navigate intricate social networks that are essential to their survival. Ultimately, Bekoff and Pierce draw the astonishing conclusion that there is no moral gap between humans and other species: morality is an evolved trait that we unquestionably share with other social mammals. Sure to be controversial, *Wild Justice* offers not just cutting-edge science, but a provocative call to rethink our relationship with—and our responsibilities toward—our fellow animals.

Re-imagining the Animal in J.M. Coetzee's 'The Lives of Animals'. Unsettling

Boundaries of Representation Amy Wattam
2021-01-14 Master's Thesis from the year 2019 in the subject English Language and Literature Studies - Literature, grade: A, Nelson Mandela Metropolitan University, course: Masters degree research in English Literature, language: English, abstract: This paper re-imagines the animal in J.M. Coetzee's "The Lives of Animals". It focuses on how Coetzee's narrative problematizes dominant discourses through questioning their authority. Furthermore, the narrative offers alternatives to anthropocentric conceptions of the animal that are based upon reason-centred and dualistic thought. The duality of human versus animal is explored alongside other dualities deconstructed in the text, such as fiction versus non-fiction, and philosophy versus literature. Coetzee's representation of these constructs and their interconnectedness is investigated, specifically with regard to positively developing human-animal relations. Through exploring what

Coetzee calls the 'sympathetic imagination', his alternative contribution to the field of human-animal relations will be considered. This study focuses on the space for re-imagination that Coetzee has provided with "The Lives of Animals". It highlights the role literature can and ought to play in this re-imagination, and why this re-imagination is necessary for the development of human-animal relations. Posthumanism will be used as a theoretical lens throughout, as it appears to resonate closely with Coetzee's project. Both the form and the content of the text will be analysed, highlighting their interconnected significance in Coetzee's project and the continued relevance of interventions such as this. J.M. Coetzee's "The Lives of Animals" (1999) is a literary representation of, and intervention into, human-animal relations. It is an experimental literary destabilization of the generic boundaries that underlie the systematic (mis)representation and (mis)treatment of nonhuman animals,

specifically their mass commodification in contemporary societies

The Social Lives of Animals Ashley Ward

2022-03-01 A rat will go out of its way to help a stranger in need. Lions have adopted the calves of their prey. Ants farm fungus in cooperatives. Why do we continue to believe that life in the animal kingdom is ruled by competition? In *The Social Lives of Animals*, biologist Ashley Ward takes us on a wild tour across the globe as he searches for a more accurate picture of how animals build societies. Ward drops in on a termite mating ritual (while his guides snack on the subjects), visits freelance baboon goatherds, and swims with a mixed family of whales and dolphins. Along the way, Ward shows that the social impulses we've long thought separated humans from other animals might actually be our strongest connection to them. Insightful, engaging, and often hilarious, *The Social Lives of Animals* demonstrates that you can learn more about animals by studying how they work

together than by how they compete.
