Linkages in the Landscape Andrew F. Bennett 2003 The loss and fragmentation of natural habitats is one of the major issues in wildlife management and conservation. Habitat "corridors" are sometimes proposed as an important element within a conservation strategy. Examples are given of corridors both as pathways and as habitats in their own right. Includes detailed reviews of principles relevant to the design and management of corridors, their place in regional approaches to conservation planning, and recommendations for research and management.

Urban Stormwater Management in the United States National Research Council 2009-03-17 The rapid conversion of land to urban and suburban areas has profoundly altered how water flows during and following storm events, putting higher volumes of water and more

pollutants into the nation's rivers, lakes, and estuaries. These changes have degraded water quality and habitat in virtually every urban stream system. The Clean Water Act regulatory framework for addressing sewage and industrial wastes is not well suited to the more difficult problem of stormwater discharges. This book calls for an entirely new permitting structure that would put authority and accountability for stormwater discharges at the municipal level. A number of additional actions, such as conserving natural areas, reducing hard surface cover (e.g., roads and parking lots), and retrofitting urban areas with features that hold and treat stormwater, are recommended.

Sport and Physical Education in Germany Ken Hardman 2005-07-26 Sport and physical education represent important components of German national life, from school and community participation, to elite, international level sport. This unique and comprehensive collection brings together material from leading German scholars to examine the role of sport and PE in Germany from a range of historical and contemporary perspectives. Key topics include: * sport and PE in pre-war, post war and re-unified Germany * sport and PE in schools * coach

education * elite sport and sport science * women and sport * sport and recreation facilities. This book offers an illuminating insight into how sport and PE have helped to shape Germany. It represents fascinating reading for anyone with an interest in the history and sociology of sport, and those working in German studies.

Integrating Lifelong Learning Perspectives Carolyn Medel-Añonuevo 2002 This book contains the major papers presented during the International Conference on Lifelong Learning: Global Perspectives on Education, held in Beijing, China, from 1 to 3 July 2001. Almost 200 participants from government agencies, academic institutions, research organizations, multilateral agencies and non-government organizations from 40 countries, shared their policies and practices on lifelong learning in their respective contexts. This compilation illustrates the range of perspectives and practices in different parts of the world. The organizers of this conference, the Beijing Academy of Educational Sciences, the Chinese National Commission of UNESCO, the American Association for Adult and Continuing Education, the Socrates Program of the European Commission and the UNESCO Institute for Education looked forward to the unique opportunity of bringing together such a range of stakeholders, not only for exchanging experiences but more important, to collectively reflect and analyse the implications for policy and educational practices of such discourses and experiences.

The Psychology of Men and Masculinities Ronald F. Levant 2017 This volume synthesizes and evaluates major theories, research, and applications in the psychology of men and masculinities--a thriving, growing field dedicated to the study of how men's lives shape, and are shaped by, sex and gender.

Catechism of the Catholic Church U.S. Catholic Church 2003-03-04 Over 3 million copies sold! Essential reading for Catholics of all walks of life. Here it is - the first new Catechism of the Catholic Church in more than 400 years, a complete summary of what Catholics around the world commonly believe. The Catechism draws on the Bible, the Mass, the Sacraments, Church tradition and teaching, and the lives of saints. It comes with a complete index, footnotes and cross-references for a fuller

understanding of every subject. The word catechism means "instruction" - this book will serve as the standard for all future catechisms. Using the tradition of explaining what the Church believes (the Creed), what she celebrates (the Sacraments), what she lives (the Commandments), and what she prays (the Lord's Prayer), the Catechism of the Catholic Church offers challenges for believers and answers for all those interested in learning about the mystery of the Catholic faith. The Catechism of the Catholic Church is a positive, coherent and contemporary map for our spiritual journey toward transformation.

Masculinities R. W. Connell 2005 This is an exciting new edition of R.W. Connell's ground-breaking text, which has become a classic work on the nature and construction of masculine identity. Connell argues that there is not one masculinity, but many different masculinities, each associated with different positions of power. In a world gender order that continues to privilege men over women, but also raises difficult issues for men and boys, his account is more pertinent than ever before. In a substantial new introduction and conclusion, Connell discusses the development of masculinity studies in the ten years since the book's initial publication. He explores global gender relations, new theories, and practical uses of masculinity research. Looking to the future, his new concluding chapter addresses the politics of masculinities, and the implications of masculinity research for understanding current world issues. Against the backdrop of an increasingly divided world, dominated by neo-conservative politics, Connell's account highlights a series of compelling questions about the future of human society. This second edition of Connell's classic book will be essential reading for students taking courses on masculinities and gender studies, and will be of interest to students and scholars across the humanities and social sciences.

Reducing the Odds National Research Council 1999-02-13 Thousands of HIV-positive women give birth every year. Further, because many pregnant women are not tested for HIV and therefore do not receive treatment, the number of children born with HIV is still unacceptably high. What can we do to eliminate this tragic and costly inheritance? In response to a congressional request, this book evaluates the extent to

which state efforts have been effective in reducing the perinatal transmission of HIV. The committee recommends that testing HIV be a routine part of prenatal care, and that health care providers notify women that HIV testing is part of the usual array of prenatal tests and that they have an opportunity to refuse the HIV test. This approach could help both reduce the number of pediatric AIDS cases and improve treatment for mothers with AIDS. Reducing the Odds will be of special interest to federal, state, and local health policymakers, prenatal care providers, maternal and child health specialists, public health practitioners, and advocates for HIV/AIDS patients. Reimagining Global Health Paul Farmer 2013-09-07 Bringing together the experience, perspective and expertise of Paul Farmer, Jim Yong Kim, and Arthur Kleinman, *Reimagining Global Health* provides an original, compelling introduction to the field of global health. Drawn from a Harvard course developed by their student Matthew Basilio, this work provides an accessible and engaging framework for the study of global health. Insisting on an approach that is historically deep and geographically broad, the authors underline the importance of a transdisciplinary approach, and offer a highly readable distillation of several historical and ethnographic perspectives of contemporary global health problems. The case studies presented throughout *Reimagining Global Health* bring together ethnographic, theoretical, and historical perspectives into a wholly new and exciting investigation of global health. The interdisciplinary approach outlined in this text should prove useful not only in schools of public health, nursing, and medicine, but also in undergraduate and graduate classes in anthropology, sociology, political economy, and history, among others.

School, Family, and Community Partnerships Joyce L. Epstein

2018-07-19 Strengthen programs of family and community engagement to promote equity and increase student success! When schools, families, and communities collaborate and share responsibility for students' education, more students succeed in school. Based on 30 years of research and fieldwork, the fourth edition of the bestseller *School, Family, and Community Partnerships: Your Handbook for Action*, presents tools and guidelines to help develop more effective and more equitable programs of family and community engagement. Written by a team of well-known experts, it provides a theory and framework of six types of involvement for action; up-to-date research on school, family, and community collaboration; and new materials for professional development and on-going technical assistance. Readers also will find: Examples of best practices on the six types of involvement from preschools, and elementary, middle, and high schools Checklists, templates, and evaluations to plan goal-linked partnership programs and assess progress CD-ROM with slides and notes for two presentations: A new awareness session to orient colleagues on the major components of a research-based partnership program, and a full One-Day Team Training Workshop to prepare school teams to develop their partnership programs. As a foundational text, this handbook demonstrates a proven approach to implement and sustain inclusive, goal-linked programs of partnership. It shows how a good partnership program is an essential component of good school organization and school improvement for student success. This book will help every district and all schools strengthen and continually improve their programs of family and community engagement.

Trichloroethylene, Tetrachloroethylene and Some Other Chlorinated Agents International Agency for Research on Cancer 2015 This volume of the IARC Monographs provides an assessment of the carcinogenic hazards associated with exposure to seven chlorinated solvents, including trichloroethylene, tetrachloroethylene, and their metabolites

(dichloroacetic acid, trichloroacetic acid, and chloral hydrate). All these agents were previously assessed by IARC Working Groups more than 10 years ago, and new epidemiological and mechanistic evidence has been considered in this reevaluation.

Contesting Stereotypes and Creating Identities Andrew J. Fuligni 2007-05-31 Since the end of legal segregation in schools, most research on educational inequality has focused on economic and other structural obstacles to the academic achievement of disadvantaged groups. But in *Contesting Stereotypes and Creating Identities*, a distinguished group of psychologists and social scientists argue that stereotypes about the academic potential of some minority groups remain a significant barrier to their achievement. This groundbreaking volume examines how low institutional and cultural expectations of minorities hinder their academic success, how these stereotypes are perpetuated, and the ways that minority students attempt to empower themselves by redefining their identities. The contributors to *Contesting Stereotypes and Creating Identities* explore issues of ethnic identity and educational inequality from a broad range of disciplinary perspectives, drawing on historical analyses, social-psychological experiments, interviews, and observation. Meagan Patterson and Rebecca Bigler show that when teachers label or segregate students according to social categories (even in subtle ways), students are more likely to rank and stereotype one another, so educators must pay attention to the implicit or unintentional ways that they emphasize group differences. Many of the contributors contest John Ogbu's theory that African Americans have developed an "oppositional culture" that devalues academic effort as a form of "acting white." Daphna Oyserman and Daniel Brickman, in their study of black and Latino youth, find evidence that strong identification with their ethnic group is actually associated with higher academic motivation among minority youth. Yet, as Julie Garcia and Jennifer Crocker find in a study of African-American female college students, the desire to disprove negative stereotypes about race and gender can lead to anxiety, low self-esteem, and excessive, self-defeating levels of effort, which impede learning and academic success. The authors call for educational

institutions to diffuse these threats to minority students' identities by emphasizing that intelligence is a malleable rather than a fixed trait. *Contesting Stereotypes and Creating Identities* reveals the many hidden ways that educational opportunities are denied to some social groups. At the same time, this probing and wide-ranging anthology provides a fresh perspective on the creative ways that these groups challenge stereotypes and attempt to participate fully in the educational system.

The Global Family Planning Revolution Warren C. Robinson 2007 The striking upsurge in population growth rates in developing countries at the close of World War II gained force during the next decade. From the 1950s to the 1970s, scholars and advocacy groups publicized the trend and drew troubling conclusions about its economic and ecological implications. Private educational and philanthropic organizations, government, and international organizations joined in the struggle to

reduce fertility. Three decades later this movement has seen changes beyond anyone's most optimistic dreams, and global demographic stabilization is expected in this century. The Global Family Planning Revolution preserves the remarkable record of this success. Its editors and authors offer more than a historical record. They discuss important lessons for current and future initiatives of the international community. Some programs succeeded while others initially failed, and the analyses provide valuable guidance for emerging health-related policy objectives and responses to global challenges.

Environmental Consequences of the Chernobyl Accident and Their Remediation International Atomic Energy Agency 2006 The explosion on 26 April 1986 at the Chernobyl nuclear power plant and the consequent reactor fire resulted in an unprecedented release of radioactive material from a nuclear reactor and adverse consequences for the public and the environment. Although the accident occurred nearly two decades ago, controversy still surrounds the real impact of the disaster. Therefore the IAEA, in cooperation with other UN bodies, the World Bank, as well as the competent authorities of Belarus, the Russian Federation and Ukraine, established the Chernobyl Forum in 2003. The mission of the Forum was to generate 'authoritative consensual statements' on the environmental consequences and health effects attributable to radiation exposure arising from the accident as well as to provide advice on environmental remediation and special health care programmes, and to suggest areas in which further research is required. This report presents the findings and recommendations of the Chernobyl Forum concerning the environmental effects of the Chernobyl accident.

Handbook of Population Dudley L. Poston 2006-04-26 This comprehensive handbook provides an overview and update of the issues, theories, processes, and applications of the social science of population studies. The volume's 30 chapters cover the full range of conceptual, empirical, disciplinary, and applied approaches to the study of demographic phenomena. This book is the first effort to assess the entire field since Hauser and Duncan's 1959 classic, *The Study of Population*.

The chapter authors are among the leading contributors to demographic scholarship over the past four decades. They represent a variety of disciplines and theoretical perspectives as well as interests in both basic and applied research.

Manhood Acts Michael Schwalbe 2015-11-17 In *Manhood Acts* Michael Schwalbe offers a new perspective on the social construction of manhood and its relationship to male domination. Schwalbe argues that study of masculinity has lost touch with its feminist roots and has been seduced by the politically safe notion of 'multiple masculinities'. *Manhood Acts* delineates the practices males use to construct 'women' and 'men' as unequal categories. Schwalbe reclaims the radical feminist insights that gender is a field of domination, not a field of play, and that manhood is fundamentally about exerting or resisting control. *Manhood Acts* arrives at the conclusion that abolishing gender as a system of oppression will require more than transgressive self-presentation. It will be necessary to end the exploitive economic relationships that necessitate manhood itself.

Hegemonic Masculinity James W. Messerschmidt 2018-04-09 The concept of hegemonic masculinity, formulated by Raewyn Connell more than three decades ago, has been the driving force behind the expanding field of masculinities studies. *Hegemonic Masculinity: Formulation, Reformulation, and Amplification* provides the first comprehensive overview of the concept—from its original conception to how it has evolved over time. The book also examines some of the most powerful ways the concept is being used in contemporary gender studies. *Hegemonic Masculinity* describes the development of the concept, the actual formulation and initial applications of the concept, the eventual reformulation and subsequent applications of that reformulation, and finally, the amplification of the reformulated concept of hegemonic masculinity. The book also includes a chapter theorizing why and how hegemonic masculinities are constructed, and the concluding chapter

chronicles the prospects for social change toward more egalitarian gender relations. *Hegemonic Masculinity: Formulation, Reformulation, and Amplification* brings together for the first time in one volume the history of the concept as well as a discussion and examination of some of the most important research accomplished on hegemonic masculinity over the last thirty years.

It's wall-to-wall David Lapham (Stray Bullets) as the Eisner Award winner writes and illustrates two of Marvel's biggest icons! Daredevil and the Punisher clash as half the East Coast's underworld - in chaos since the Kingpin was deposed - scramble for a shot at the big chair. And as the city descends into chaos, as murder and intimidation become the staples of the day, Daredevil and the Punisher each seek to restore order in their own unique way. For Daredevil - who's anointed himself the city's new "Kingpin" - this means dispensing justice at the end of a billy club. COLLECTING: DAREDEVIL VS. PUNISHER 1-6.

Bridging the Gap Between Practice and Research Institute of Medicine 1998-08-11 Today, most substance abuse treatment is administered by community-based organizations. If providers could readily incorporate the most recent advances in understanding the mechanisms of addiction and treatment, the treatment would be much more effective and efficient. The gap between research findings and everyday treatment practice represents an enormous missed opportunity at this exciting time in this field. Informed by real-life experiences in addiction treatment including workshops and site visits, *Bridging the Gap Between Practice and Research* examines why research remains remote from treatment and makes specific recommendations to community providers, federal and state agencies, and other decision-makers. The book outlines concrete strategies for building and disseminating knowledge about addiction; for linking research, policy development, and everyday

treatment implementation; and for helping drug treatment consumers become more informed advocates. In candid language, the committee discusses the policy barriers and the human attitudes—the stigma, suspicion, and skepticism—that often hinder progress in addiction treatment. The book identifies the obstacles to effective collaboration among the research, treatment, and policy sectors; evaluates models to address these barriers; and looks in detail at the issue from the perspective of the community-based provider and the researcher. Disciplining Reproduction Adele E. Clarke 2022-03-25 Reproductive issues from sex and contraception to abortion and cloning have been controversial for centuries, and scientists who attempted to turn the study of reproduction into a discipline faced an uphill struggle. Adele Clarke's engrossing story of the search for reproductive knowledge across the twentieth century is colorful and fraught with conflict. Modern scientific study of reproduction, human and animal, began in the United States in an overlapping triad of fields: biology, medicine, and agriculture. Clarke traces the complicated paths through which physiological approaches to reproduction led to endocrinological approaches, creating along the way new technoscientific products from contraceptives to hormone therapies to new modes of assisted conception—for both humans and animals. She focuses on the changing relations and often uneasy collaborations among scientists and the key social worlds most interested in their work—major philanthropists and a wide array of feminist and medical birth control and eugenics advocates—and recounts vividly how the reproductive sciences slowly acquired standing. By the 1960s, reproduction was disciplined, and the young and contested scientific enterprise proved remarkably successful at attracting private funding and support. But the controversies continue as women—the targeted consumers—create their own reproductive agendas around the world. Elucidating the deep cultural tensions that have permeated reproductive topics historically and in the present, *Disciplining Reproduction* gets to the heart of the twentieth century's drive to rationalize reproduction, human and nonhuman, in order to control life itself.
