China Fictions, English Language A. Robert Lee
2008 The world is anything but unfamiliar with diaspora: Jewish, African, Armenian, Roma-Gipsy, Filipino/a, Tamil, Irish or Italian, even

Japanese. But few have carried so global a resonance as that of China. What, then, of literary-cultural expression, the huge body of fiction which has addressed itself to that plurality of lives and geographies and which has come to be known as "After China"? This collection of essays offers bearings on those

written in English, and in which both memory and story are central, spanning the USA to Australia, Canada to the UK, Hong Kong to Singapore, with yet others of more transnational nature. This collection opens with a reprise of woman-authored Chinese American fiction using Maxine Hong Kingston and Amy Tan as departure points. In turn follow readings of the oeuvres of Tan and Frank Chin. A comparative essay takes up novels by Canadian, American and Australian authors from the perspective of migrancy as fracture. Chinese Canada comes into view in accounts of SKY Lee, Wayson Choy, Evelyn Lau and Larissa Lai. Australia under Chinese literary auspices is given a comparative mapping through the fiction of Brian Castro and Ouyang Yu. The English language “China fiction” of Singapore and Hong Kong is located in essays centred, respectively, on Martin Booth and Po Wah Lam, and Hwee Hwee Tan and Colin Cheong. The collection rounds out with portraits of Timothy Mo as British transnational author, a

selection of contextual Chinese British stories and art, and the phenomenon of “Chinese Chick Lit” novels. China Fictions/English Language will be of interest to readers drawn both to “After China” as diasporic literary heritage and comparative literature in general.

Olfactory Concepts of Insect Control -

Alternative to insecticides Jean-François

Picimbon 2019-05-16 Evolution gave rise to a prominent insect diversity at every level of ecological niche. Since then, hordes of insects have threatened human and cattle health as well as most of all green lands and agricultural crops. Now, the insect problem expands from many mutant forms of yellow dengue fever mosquitoes to highly-resistant larvae of most all various phytophageous species. The tremendous expansion of insects is due not only to an increasing resistance capacity to insecticides, but also to a strong capacity for adapting to

different climate and environmental changes, including global warming. Obviously insects display a number of rudimentary systems to build an extremely efficient organism to survive in a changing world. In many species, one pheromone molecule is enough to trigger mating behavior. Therefore, insects have become crucial models not only for evolutionary studies, but also for understanding specific mechanisms underlying sensory-based behaviors. Most of insect species such as ants, beetles, cockroaches, locusts, moths and mosquitoes largely rely on olfactory cues to explore the environment and find con-specifics or food sources. A conglomerate of renowned international scientific experts is gathered to expose the insect problem on the various continents of the planet and propose an alternative to the use of toxic insecticides. Sex pheromones, specific chemical signals necessary for reproduction, and pheromone detection in insects are described with full details of the

olfactory mechanisms in the antennae and higher centers in the brain. Thus, new synthetic pheromones and/or plant odors with specific molecular target sites in the insect olfactory system are proposed for sustainable development in agricultural and entomological industries. Disrupting insect pheromone channels and plant odor detection mechanisms is solemnly envisioned as a unique way to control invasive insect pest species while preserving human and environment safety.

Biology, Ecology and Systematics of

Australian Scelio Paul Dangerfield 2001-12-01
Parasitic wasps of the genus *Scelio* play an important role in the regulation of orthopteran populations and are implicated in suppressing numbers of numerous pest locusts and grasshoppers. This landmark volume provides a full taxonomic treatment of the sixty species of *Scelio* found on the Australian continent and reviews in detail the biology and ecology and host relationships of *Scelio* on a worldwide

basis. Taking an international perspective, the text outlines our current knowledge on topics such as host finding, population biology, and methods and techniques for collection and study in the field. The use of Scelio as biological control agents is discussed and comprehensive checklists document the recorded host relationships of each known species worldwide. There is a full taxonomic revision of all Australian species of Scelio, half of which are newly described. Each species description is complemented with high-quality line drawings, micrographs and distribution maps. In addition, an illustrated key to species enables easy identification of species by non-taxonomists. Biology, Ecology and Systematics of Australian Scelio provides wasp taxonomists, researchers of orthoptera and biological control workers with a basis for detailed studies elsewhere on this economically important group of insects. *Editorial Jottings in the West* Abel Stevens 1854 *The Wolf and The Hunter* Cristian Serban

Sheds riveting new light on this breathtaking plan' Daily Mail 'A rollicking read' Max Hastings, Sunday Times 'Brilliant and almost absurdly entertaining' New Yorker _____ April, 1943: a sardine fisherman spots the corpse of a British soldier floating in the sea off the coast of Spain and sets off a train of events that would change the course of the Second World War. Operation Mincemeat was the most successful wartime deception ever attempted, and the strangest. It hoodwinked the Nazi espionage chiefs, sent German troops hurtling in the wrong direction, and saved thousands of lives by deploying a secret agent who was different, in one crucial respect, from any spy before or since: he was

dead. His mission: to convince the Germans that instead of attacking Sicily, the Allied armies planned to invade Greece. This is the true story of the most extraordinary deception ever planned by Churchill's spies: an outrageous lie that travelled from a Whitehall basement all the way to Hitler's desk.

Locust Jeffrey A. Lockwood 2009-04-28

Throughout the nineteenth century, swarms of locusts regularly swept across the continent, turning noon into dusk, demolishing farm communities, and bringing trains to a halt as the crushed bodies of insects greased the rails. In 1876, the U.S. Congress declared the locust "the single greatest impediment to the settlement of

the country." From the Dakotas to Texas, from California to Iowa, the swarms pushed thousands of settlers to the brink of starvation, prompting the federal government to enlist some of the greatest scientific minds of the day and thereby jumpstarting the fledgling science of entomology. Over the next few decades, the Rocky Mountain locust suddenly -- and mysteriously -- vanished. A century later, Jeffrey Lockwood set out to discover why. Unconvinced by the reigning theories, he searched for new evidence in musty books, crumbling maps, and crevassed glaciers, eventually piecing together the elusive answer: A group of early settlers unwittingly destroyed the locust's sanctuaries just as the insect was experiencing a natural population crash. Drawing on historical accounts and modern science, *Locust* brings to life the cultural, economic, and political forces at work in America in the late-nineteenth century, even as it solves one of the greatest ecological mysteries of our time.

Ten Years for the Locust Reconsidered Ian G. Hunter 1982
Ben Macintyre's Espionage Files Ben Macintyre 2012-11-18 Agent Zigzag: One December night in 1942, a Nazi parachutist landed in a Cambridgeshire field. His mission: to sabotage the British war effort. His name was Eddie Chapman, but he would shortly become MI5's Agent Zigzag. Dashing and louche, courageous and unpredictable, inside the traitor was a hero, inside the villain, a man of conscience: the problem for Chapman, his many lovers and his spymasters, was knowing where one ended and the other began. Ben Macintyre weaves together diaries, letters, photographs, memories and top-secret MI5 files to create the exhilarating account of Britain's most sensational double agent. Operation Mincemeat: One overcast April morning in 1943, a fisherman notices a corpse floating in the sea off the coast of Spain. When the body is brought ashore, he is identified as a British soldier, Major William Martin of the

Royal Marines. A leather attaché case, secured to his belt, reveals an intelligence goldmine: top-secret documents Allied invasion plans. But Major William Martin never existed. The body is that of a dead Welsh tramp and every single document is fake. Operation Mincemeat is the incredible true story of the most extraordinary deception ever planned by Churchill's spies - an outrageous lie that travelled from a Whitehall basement, all the way to Hitler's desk. Double Cross: D-Day, 6 June 1944, the turning point of the Second World War, was a victory of arms. But it was also a triumph for a different kind of operation: one of deceit... At the heart of the deception was the 'Double Cross System', a team of double agents whose bravery, treachery, greed and inspiration succeeded in convincing the Nazis that Calais and Norway, not Normandy, were the targets of the 150,000-strong Allied invasion force. These were not conventional warriors, but their masterpiece of deceit saved thousands of lives. Their

codenames were Bronx, Brutus, Treasure, Tricycle and Garbo. This is their story.

2019-04-23 Kai and Caleb Goodacre have been kidnapped just as rumors of a cult sweeping across the reservation leads Maggie and Hastiin to investigate an outpost, and what they find there will challenge everything they've come to know in this "badass" (The New York Times) action-packed sequel to Trail of Lightning. It's been four weeks since the bloody showdown at Black Mesa, and Maggie Hoskie, Diné monster hunter, is trying to make the best of things. Only her latest bounty hunt has gone sideways, she's lost her only friend, Kai Arviso, and she's somehow found herself responsible for a girl with a strange clan power. Then the Goodacre twins show up at Maggie's door with the news

that Kai and the youngest Goodacre, Caleb, have fallen in with a mysterious cult, led by a figure out of Navajo legend called the White Locust. The Goodacres are convinced that Kai's a true believer, but Maggie suspects there's more to Kai's new faith than meets the eye. She vows to track down the White Locust, then rescue Kai and make things right between them. Her search leads her beyond the Walls of Dinétah and straight into the horrors of the Big Water world outside. With the aid of a motley collection of allies, Maggie must battle body harvesters, newborn casino gods and, ultimately, the White Locust himself. But the cult leader is nothing like she suspected, and Kai might not need rescuing after all. When the full scope of the White Locust's plans are revealed, Maggie's burgeoning trust in her friends, and herself, will be pushed to the breaking point, and not everyone will survive.

The Locust and the Bird Hanan al-Shaykh 2009-08-25 In a masterly act of literary transformation, celebrated novelist Hanan al-Shaykh re-creates the dramatic life and times of her mother, Kamila. Married at a young age against her will, Kamila soon fell head-over-heels in love with another man—and was thus forced to choose between her children and her lover. As the narrative unfolds through the years—from the bazaars, cinemas and apartments of 1930s Beirut to its war-torn streets decades later—we follow this passionate woman as she survives the

tragedies and celebrates the triumphs of a life lived to the very fullest.

The Locust Hunter Po Wah Lam 2004 The Locust Hunter, set in the humid and turbulent landscape of 1970s Hong Kong, is a coming-of-age tale that follows the journey of Sundance and his five friends as they try to avenge the killing of his 200-year-old pet tortoise, Lord Baltimore. Their village, encamped between the Big Amber (China) and the looming presence of the American army, teeters precariously between the British ideals and the teachings of Tao and Chinese customs.

The Routledge Book of World Proverbs Jon R. Stone 2006-09-27 The Routledge Book of World Proverbs invites the reader to travel the globe in search of the origins of such words of wisdom, experiencing the rich cultural traditions reflected in each nation's proverbs. This collection contains over 16,000 gems of humour and pathos that draw upon themes from our shared experiences of life. And we are not just

invited to learn about other cultures; proverbs are 'bits of ancient wisdom' and thus teach us about our own history. Drawing together proverbs that transcend culture, time and space to provide a collection that is both useful and enjoyable, The Routledge Book of World Proverbs is, unquestionably, a book of enduring interest.

Mosquito Hunter Clifford Mutero 2017-09-22 Mosquito Hunter is Clifford Muteros first autobiographical account. It focuses on the evolution of his entomological career, which was ignited in his early childhood from around the age of six up to the stage when he completed his PhD studies in insect science at age thirty. It is a one-of-a-kind narration that sets out geosocial, historical, and entomological facts with a brand of humor that has the potential to instruct and

inspire a new generation of would-be natural scientists through the soft lore behind scientific investigation. Set mainly in a quintessentially rural farming community in Central Kenya and also in coastal Kenya, this narration reflects the abundance of stories based on village events, which were enriched by news and music from the wider world via the bridging power of radio. Significantly, *Mosquito Hunter* pays high tribute to the various mentors who inspired the author towards research of the natural environment. Chief among them is his father, Felix Mutero, whose all-round mastery of efficient farming practices provided a master class of sorts to the future scholar. Themes ranging from health, education, love, family, music, poverty, and professional politics are all woven into this telling of the making of that rare species, the African insect scientist.
