Understanding Non-Western Philosophy Daniel A. Bonevac 1993 This collection of important readings in African, Asian, and Southern Mediterranean philosophy is the perfect supplement for instructors who wish to

Oneness Philip J. Ivanhoe 2017-11-01 At the center of a constellation of key ideas in East Asian philosophical traditions, there lies a conception of oneness among human beings. Human beings are intricately and inextricably intertwined and share a common destiny with other people, creatures, and things. The ramifications of this idea are wide-reaching, and resonate with important debates and concerns in contemporary Western philosophy, but many at the forefront of their fields in the West are unaware of the fundamental shift in perspective that might be available to them. One of Ivanhoe's aims in this work is to challenge the dominant paradigm of hyper-individualism, which still enjoys a commanding position in a great deal of contemporary theory and practice in the humanities and social sciences, and to describe and advocate for an alternative conception and sense of self, world, and the relationship between them. In particular, Ivanhoe, who has an extensive background in

and has published influential work on virtue ethics and Asian philosophy, investigates the implications of oneness for conceptions of the self, virtue, and human happiness. Through the lens of oneness, he explores topics such as conceptions of the self, selfishness and self-centeredness, virtues, spontaneity, and happiness, drawing support from wide-ranging, interdisciplinary sources. Rather than starting from the standpoint of Western philosophy and then reaching out to Asian philosophy from a distance, Ivanhoe advances a thesis drawn from East Asian sources and explicitly challenges the theoretical asymmetry that is characteristic of most comparative study, which often simply applies Western theories to non-Western material.

Eastern Philosophy Victoria S. Harrison 2013 *Eastern Philosophy: The Basics* is an essential introduction to major Indian and Chinese philosophies, both past and present. Exploring familiar metaphysical and ethical questions from

the perspectives of different Eastern philosophies, including Confucianism, Daoism, and strands of Buddhism and Hinduism, this book covers key figures, issues, methods and concepts. Questions discussed include: What is the 'self'? Is human nature inherently good or bad? How is the mind related to the world? How can you live an authentic life? What is the fundamental nature of reality? Throughout the book the relationships between Eastern Philosophy, Western Philosophy and the questions reflective people ask within the contemporary world are brought to the fore. With timelines highlighting key figures and their contributions, a list of useful websites and further reading suggestions for each topic, this engaging overview of fundamental ideas in Eastern Philosophy is valuable reading for all students of philosophy and religion, especially those seeking to understand Eastern perspectives.

From Athens to America Paul Dykes 2002-01-01

These readings from the literature of western philosophy have been collected to serve a practical home and classroom purposes: to make available to readers a sampling of the ideas of some of history's great thinkers on the subject of human values. The selection is eclectic but not random. The excerpts included have been used in philosophy classes and have been the basis for thoughtful and spirited discussions. The intent of the anthologists is not to instill values but to encourage readers to test their own assumptions and opinions against a variety of ideas and to emerge from the encounter better prepared to shape the values by which they will live their own lives. This book contains selected passages from significant works by some of the most influential thinkers in western civilization, such as: Socrates, Bacon, Kant, Plato, Hobbes, Hegel, Aristotle, Descartes, Schopenhauer, Epicurus, Spinoza, Mill, Epictetus, Locke, Kierkegaard, Marcus Aurelius, Rousseau, Nietzsche, Augustine, Hume, James

[Encyclopedia of Asian Philosophy](#) Oliver Leaman 2006-10-19 Incorporating cultural and religious contexts, this unique Encyclopedia provides a vital guide to the main concepts and thinkers in Asian philosophy - starting with Abhidharma and ending with Zurvan. The main philosophical trends and thinkers in each geographical area are featured, with an emphasis on endtemporary developments and movements. The A-Z structured encyclopedia emphasizes that Asian philosophy is not merely an ancient form of thought but that it is a living philosophy, with roots in the past, and also a potent and animate presence today. This translates into the reciprocal exchange of theories between Eastern and Western thinking, for example of new schools of thought such as orientalism. Requiring no prior knowledge of philosophy, religion or Asian cultures, this book is essential

reading for students, teachers and the interested individual who wishes to gain an understanding of the philosophical basis to Asian cultural systems.

Religious Studies Scholars as Public

Intellectuals Sabrina D. MisirHiralall 2018-06-13 The prominence of religion in recent

debates around politics, identity formation, and international terrorism has led to an increased demand on those studying religion to help clarify and contextualise religious belief and practice in the public sphere. While many texts focus on the theoretical development of the subject, this book outlines a wider application of these studies by exploring the role of religious studies scholars and theologians as public intellectuals. This collection of essays first seeks to define exactly what makes an intellectual "public". It then goes on to deal with a few questions of concern: How do public intellectuals construct knowledge in religious and theological scholarship? What is the link between public intellectuals of higher education and their role in society? Do higher education institutions have a responsibility to endorse public intellectualism? Looking at the individual and collective role of religious studies scholars and theologians in public life, this book will be of great interest to all scholars and academics involved in religious studies and

theology across the academy.

Introduction to Eastern Thought Marietta

Stepaniants 2002-05-07 Marietta Stepaniants'

introductory text allows a distinctively Eastern

way of thinking to come forth. Four interpretive

essays open the book showing how Indian,

Chinese and Islamic traditions responded to

these questions: How did philosophy arise? What

is the origin of order in the universe? What is

human nature? What is truth? A fifth, unique,

essay shows how Eastern thought has dealt with

Western contact in the 19th and 20th centuries.

In the second half of the book, original

writings—ancient and modern—are placed in

their cultural context by the author and give

access to the thinkers' specific arguments.

Unlike any other text, *Introduction to Eastern*

Thought includes Islamic philosophies alongside

Indian and Chinese traditions. This broader

sense of 'the East,' the combination of

interpretive essays and original sources, the sense of Eastern philosophies as alive and ongoing, are unrivalled by any other textbook. Comparisons within and across traditions make *Introduction to Eastern Thought* an excellent text for students familiar with Western philosophy or beginning philosophy students. Reading Proverbs Intertextually Katharine J. Dell 2018-10-18 Sitting alongside the partner volumes *Reading Job Intertextually* (2012) and *Reading Ecclesiastes Intertextually* (2014) also published in the Library of Hebrew and Old Testament Studies, this addition to the series continues the study of intertextuality in the Hebrew Bible. Dell and Kynes provide the first comprehensive treatment of intertextuality in Proverbs. Topics addressed include the intertextual resonances between Proverbs, and texts across the Hebrew canon, as well as texts throughout history, from the Dead Sea Scrolls to African and Chinese proverbial literature. The contributions, though comprehensive, do not provide clear-cut answers, but rather invite further study into connections between Proverbs and external texts, highlighting ideas and issues in relation to the extra texts discussed themselves. The volume gathers together scholars with specific expertise on the array of texts that intersect with Proverbs and these

scholars in turn bring their own insights to the texts at hand. In particular the contributors have been encouraged to pursue the intertextual approach that best suits their topic, thereby offering readers a valuable collection of intertextual case studies that address a single biblical book.

Becoming T. S. Eliot Jayme Stayer 2021-10-05 "This study offers a rhetorical analysis of how the young T. S. Eliot created a new voice and targeted a modern audience in the poems of his youthful notebook, published in 1996 as *Inventions of the March Hare*. By following Eliot's artistic development and intellectual maturation, the author explores, by chronological steps, how a young man who writes uninspired doggerel transformed himself in twenty months into the author of "The Love Song of J. Alfred Prufrock.""

Ethical Leadership Robert M. McManus 2023-09-06 The world cries out for ethical leaders. We expect the best, but we are often left profoundly disappointed. While leadership

programs may feature ethics as part of their curriculum, the approach is often either simplistic or overly esoteric. This second edition addresses this scarcity of resources for training ethical leaders, providing a primer of several ethical frameworks accompanied by extended examples to help inform decision-making. It also addresses several leadership models that claim an ethical component. The new edition also includes new chapters on the ethics of care and toxic leadership, and new case studies for all chapters. By providing a consistent case analysis based on the Five Components of Leadership Model, readers benefit from a comprehensive approach to understanding ethical leadership.

Eastern Influences on Western Philosophy Macfie A. L. Macfie 2019-08-05 The influence of East on West - of Eastern ideas on Western thought - has become an increasingly vexed issue in recent times. Opinion is divided between two main schools: those who believe that Oriental ideas have exercised a considerable

influence on Western thought, and those who, for a variety of reasons, believe that such influence has remained negligible. In this Reader A. L. Macfie suggests that the reality lies somewhere between these two extremes, and that the interest taken by Western thinkers in Eastern thought in the modern period has moved from one of passing interest, through serious attention, to some level of assimilation and acceptance. *Eastern Influences on Western Philosophy* explores the extent of Oriental influence on European thought, primarily in the period of the Enlightenment and the nineteenth-century period of doubt and scepticism that followed it. As such it is the first Reader to bring together in one place a series of specific historical and textual studies of Oriental influence upon European thinkers. Starting with Malebranche and ending with Heidegger, other Western thinkers considered include Leibniz, Voltaire, Hume, Hegel, Schopenhauer, Emerson, Thoreau, Nietzsche, Jung and Buber. To

accompany the readings the editor's introduction explores the idea of influence in the context of the chosen readings, and at the same time raises the question of how far Edwards Said's thesis regarding Orientalism actually applies to Western thought. **Key Features:*** Reflects increasing interest in relationship between Eastern and Western Philosophy* Covers major European figures from the 18th and 19th centuries and the way Eastern thought influenced them* Substantial editorial introduction places readings in context and explores the influence of the East on the West* Previous work by editor praised for its accessibility

A Source Book in Indian Philosophy Sarvepalli Radhakrishnan 2014-07-17 Here are the chief riches of more than 3,000 years of Indian philosophical thought--the ancient Vedas, the Upanisads, the epics, the treatises of the heterodox and orthodox systems, the commentaries of the scholastic period, and the contemporary writings. Introductions and interpretive commentaries are provided. [Philosophical Questions](#) Bina Gupta 2000 *Philosophical Questions: East and West* is an anthology of source material for use in

comparative courses in philosophy, religion, and the humanities. The readings--derived from the great works of the Indian, Chinese, Japanese, Islamic, and Western intellectual traditions--are presented as answers to some of the most enduring questions in philosophy. Discussions are arranged under the headings of epistemology, metaphysics, ethics, philosophy of religion, aesthetics, and the nature of human being. Each section begins with an introductory essay in which the leading questions and their responses from different traditions are presented in overview. *Philosophical Questions* raises the central questions of comparative philosophy and eloquently argues the need for discarding familiar clichés to make a fresh, unprejudiced study of these traditions. [Eastern Philosophy: Key Readings](#) Oliver Leaman 2002-01-04 Through key readings from primary and secondary sources this book communicates at first hand the principal features of a remarkable range of Eastern

thought - from Buddhism, Confucianism, and Hinduism to Islam, Shinto, and Zoroastrianism. Passages from key texts guide the reader through over ninety major terms, from abhidharma to Zen. Material is drawn not only from such cornerstone texts as the Bhagavad-gita and the Lao-tzu, but also from modern writings on Eastern philosophy and religion.

Essays in East-West Philosophy Charles A. Moore 2021-05-25 In the modern world, provincialism in reflective thinking is dangerous, possibly tragic. If philosophy is to fulfill one of its main functions—that of guiding the leaders of mankind toward a better world—its perspective must become worldwide and comprehensive in fact as well as in theory. This, the motivating theme of the Second East-West Philosophers' Conference held at the University of Hawaii in the summer of 1949, is likewise the theme of this volume, the complete report of that Conference. The goal of the eminent philosophers participating was the discovery of avenues of progress toward a synthesis of Oriental and Occidental thought. They attempted to reach tentative conclusions in the fields of methodology, metaphysics, and ethical

theory. Conference activities consisted of meetings, lectures, discussions, undergraduate courses, and graduate seminars. As far as possible, the proceedings were limited to the study of East-West philosophy; extensive attention was not given to the strictly religious aspects of any philosophical tradition. Participants in the Conference were convinced that philosophy is now entering upon a new stage of development which will be characterized by trans-cultural cooperation and world perspective. This development can be of tremendous significance in world thought and eventually in the lives and actions of the people of the world. Twenty-three of the formal papers presented at the Conference comprise the substance of this book; a significant proposal for synthesis is stated or implied in almost every one. A comprehensive introduction by the editor, a summary of the results and conclusions of the Conference seminars, a who's who of contributors, and an exhaustive index round out

the volume.
