Sociology of Families Cheryl Albers

1999-03-11 "Cheryl Albers' reader for use in family sociology courses is a cutting edge collection of articles about cutting edge topics. She addresses nine topics central and critical to family sociology and provided thoughtful articles from diverse perspectives for each, from adolescent childbearing to the construction of family policy. This volume of readings is where the students are. It could enrich any instructor's approach to the burning questions in the field of family sociology." Dana Vannoy, University of Cincinnati

Public and Private Families Andrew J. Cherlin
2000 This text examines the family through two lenses - the familiar private family in which we live most of our personal lives, and the public family in which we, as adults, deal with broader societal issues such as raising the next generation and the care of the elderly. Consequently the selected readings look both at intimate personal concerns, such as whether to marry, as well as societal concerns, such as governmental policies that affect families. The author introduces each chapter, providing helpful lead-ins to the readings that follow. The 32 readings in this edition are comprised of a well-balanced mix of highly accessible selections from the popular press as well as articles from scholarly journals. This reader serves as an excellent companion to other texts in the sociology of marriage and the family and as a useful source of information on its own. It is an excellent supplement to Cherlin's text, *Public and Private Families: An Introduction*. Its 16 chapters, which address contemporary issues

such as the history of the family, welfare and welfare reform, divorce and step-parenting are keyed to the 16 chapters in Cherlin's text.

Weaving a Family Barbara Katz Rothman 2005 A man, a woman, and their biological children, all of the same race, the mythical "nuclear family" has been the bedrock of American cultural, religious, social, and economic life since the Revolutionary War, and even with all the changes we have absorbed in the last sixty years, it essentially remains so. Current trends in adoption, however, have begun to shift the dominant paradigm of the family in ways never before imagined. Professional estimates show that in the United States today, seven million families have been formed by adoption, and 700,000 of them are interracial. These still-growing numbers have begun to radically change the face of the traditional American family. Barbara Katz Rothman, a noted sociologist who has explored motherhood in four previous books and has more recently explored the social implications of the human genome project, now turns her eye toward race and family. Weaving together the sociological, the historical, and the personal, Barbara Katz Rothman looks at the contemporary American family through the lens of race, race through the lens of adoption, and all-family, race, and adoption-within the context of the changing meanings of motherhood. She asks urgent and provocative questions about children as commodities, about "trophy" children, about the impact of genetics, and about how these adopted children will find their racial, ethnic, or cultural identities. Drawing on her own experience as the white mother of a black child, on historical

research on white people raising black children from slavery to contemporary times, and pulling together work on race, adoption, and consumption, Rothman offers us new insights for understanding the way that race and family are shaped in America today. This book is compelling reading, not only for those interested in family and society, but for anyone grappling with the myriad issues that surround raising a child of a different race.

A Sociology of Family Life Deborah Chambers

2022-02-14 Family relations are undergoing dramatic changes globally and locally. At the same time, certain features of family life endure. This popular book, now in a fully updated second edition, explores the growing diversity of family life and presents a comprehensive assessment of recent research on 'family', parenting, childhood and interpersonal ties. A Sociology of Family Life queries assumptions about a disintegration of 'the family' by revealing a remarkable persistence of commitment and reciprocity across cultures, within new as well as traditional family forms. Yet while new kinds of intimate

relationships such as 'friends as family' and same-sex families become commonplace, such personal relationships can still be difficult to negotiate in the face of wider structural norms. With a focus on social factors such as class, gender, race and sexuality, this new edition highlights social inequalities that influence and curb families and personal life transnationally. Alongside substantial new material on cultural and digital transformations, the book features extensive updates on themes and issues ranging from demography, migration, ageing and government policies, to reproductive technologies, employment and care. With a global focus, and blending theory with real-life examples, this insightful and engaging book will remain indispensable to students across the social sciences.
