Uniform Appraisal Standards for Federal Land Acquisitions William J.

Kollins 1998-02 These standards have been prepared to promote uniformity in the appraisal of real property among the various agencies acquiring property on behalf of the U.S., by both direct purchase & condemnation. Contents: standards for approaching the solution to certain recurring appraisal problems (cost approach, income approach, highest & best use, etc.); data documentation & appraisal reporting standards (zoning & other land use regulations, contents of appraisal report, etc.); general standards of a miscellaneous nature (impartiality, witness composure, leasehold takings, etc.). Cases & statutes. *Real Estate Law* Robert Aalberts 2008-04-17 Clear, concise, and current, REAL ESTATE LAW, 7e, delivers the latest information on private and public law transactions. Providing a solid survey of real estate law in a generic--rather than state-specific--format, it combines text, short case summaries, longer teaching cases, and practical applications to help students recognize important issues. Chapters build on each other to tell the story of real estate law. Combining practical legal examples with theory, the text does an excellent job of illustrating the principles of law. In addition, it helps readers recognize when an attorney should be consulted. Continuing to emphasize ethical issues, the new edition integrates coverage of public policy issues that relate to real estate law. Insightful exhibits help students understand key concepts, and an excellent assortment of cases challenges readers to apply legal principles

to practical situations. Ideal for majors and non-majors alike, the seventh edition prepares students for the next era in real estate law. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Routledge Handbook of Contemporary Issues in Expropriation Frances Plimmer 2018-09-18 The Routledge Handbook of Contemporary Issues in Expropriation reviews the contemporary major issues involving expropriation (eminent domain/compulsory purchase) in an international context. Expropriation is a right reserved to all governments, and, thus, it has an impact on all societies. This book, the first of its kind, considers the essential issues from the point of view of both developing and developed countries, and their needs for major infrastructure projects. The content covers major issues, principles and policies and includes the experiences of and examples from different countries and regions, including Australia, Asia, China, Europe, India and the USA. Rather than providing an in-depth examination of individual countries' legal systems, the book focuses on international issues, and also provides a reflection on how national experiences can be related to global needs. Key themes include: Nature and quantum of compensation • Land rights and the acquisition of traditional land rights • Issues surrounding 'public interest' • Alternatives to expropriation • The future: "good practice", debate and reform. This handbook is an essential resource for students and researchers in the areas of land policy, land law, property law and rights, and international development.

Contemporary China's Land Use Policy Long Cheng 2020-09-24 This book discusses contemporary China's land use policy - the Link Policy - which calls for land consolidation and rural resettlement to achieve the goal of preserving farmland while also providing more space for urban development. Given the limited analyses and commentaries on the Link Policy in the literature, particularly in English-language articles, the book systematically presents and analyzes China's land use policy by assessing the impacts of the Link Policy on rural life and how effective the Link Policy is in achieving its objectives. It also examines how satisfied farmers are with the policy and what the contributing factors are. Drawing on a critical review of the literature, field observations and interviews with resettled farmers, the book offers insights into China's land use policy, and compares it with similar policy instruments in other countries. Presenting research findings that help readers gain a holistic understanding of the Link Policy in China and its implications, the book is a valuable resource for professionals in other developing countries that are facing similar challenges in terms of balancing urban development and farmland conservation.

Valuing Natural Assets Raymond J. Kopp 2013-10-08 Assessing natural resource damages often requires the use of nonmarket valuation techniques that were developed for use in benefit-cost analyses. Natural resource damage assessment dramatically changes the context for applying them. Two aspects of this context are especially important. First, damages are to be measured by the monetary value of the losses people experience, including their use and nonuse values, because of injuries to natural resources--a process requiring careful delineation of how the injuries connect to the resource's services. Second, a single identified entry--not generalized, anonymous taxpayers--must pay damages based on what is measured, and evaluations of the measurement techniques take place not in agency meeting rooms but in courtrooms. Contributors to *Valuing Natural Assets* examine the ways in which requirements for damage assessment change how the measures are used, presented, received, and defended. Drawing upon their personal involvement with the process and the research issues it has raised--both in providing analysis for defendants or plaintiffs in damage assessment cases and in writing for academic journals--their chapters reflect individual research programs that temper the rigorous demands of scholarship with the equally demanding standards of litigation.

Healthcare Valuation, The Financial Appraisal of Enterprises, Assets, and Services Robert James Cimasi 2014-03-24 A timely look at the healthcare valuation process in an era of dynamic healthcare reform, including theory, methodology, and professional standards In light of the dynamic nature of the healthcare industry sector, the analysis supporting business valuation engagements for healthcare enterprises, assets, and services must address the expected economic conditions and events resulting from the four pillars of the healthcare industry:

Reimbursement, Regulation, Competition, and Technology. *Healthcare Valuation* presents specific attributes of each of these enterprises,

assets, and services and how research needs and valuation processes differentiate depending on the subject of the appraisal, the environment the property interest exists, and the nature of the practices. Includes theory, methodology, and professional standards as well as requisite research, analytical, and reporting functions in delivering healthcare valuation services Provides useful process tools such as worksheets and checklists, relevant case studies, plus a website that will include comprehensive glossaries and topical bibliographies Read *Healthcare Valuation* for a comprehensive treatise of valuation issues in the healthcare field including trends of compensation and reimbursement, technology and intellectual property, and newly emerging healthcare entities.
